

# TOGO

Region: Sub-Saharan Africa  
Income Category: Low Income

**Human capital - people’s knowledge, skills, and health - drives productivity and growth.** The Human Capital Index Plus (HCI+) measures the human capital a child born today can expect to accumulate over their working life, extending the original HCI by incorporating tertiary education and work experience. This brief summarizes **Togo’s** HCI+ score and its performance in building human capital.

## What is Togo’s HCI+ and what does it mean?

**Togo’s HCI+ score is 136 (out of a maximum of 325), reflecting its investments in health, education, and employment.** A 10-point increase in the index would translate into approximately 10 percent higher future income. Closing the current gaps in these areas relative to high-performing countries with similar GDP per capita would boost future income by 37%.

## How does Togo’s HCI+ compare to other countries?

Togo’s HCI+ is higher than the average for the **Sub-Saharan Africa region (126)** and higher than the average for **low-income countries (116)**.

Among Togo’s income level peers, **Rwanda is the top performer in HCI+.**

## What explains Togo’s HCI+?

The HCI+ has three components corresponding to health, education, and employment.

The HCI+ score for the **Health pillar is 38**, slightly higher than the **regional average of 36**.

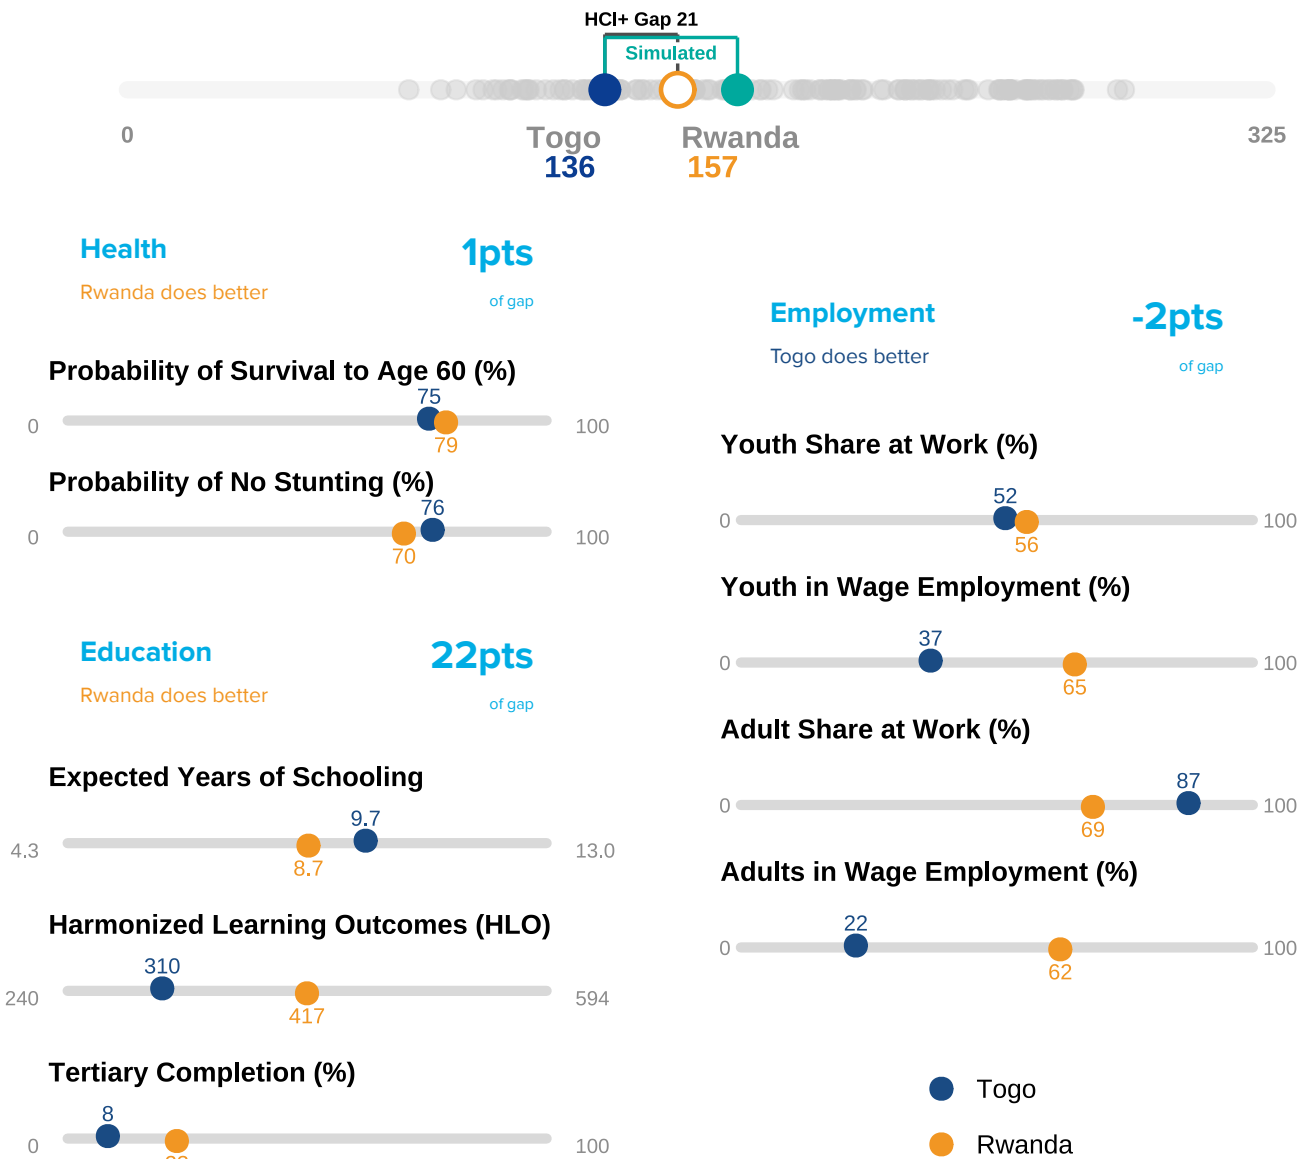

The HCI+ score for the **Education pillar is 63**, slightly higher than the **regional average of 61**.

The HCI+ score for the **Employment pillar is 35**, higher than the **regional average of 29**.

### What indicators are responsible for Togo's HCI+ gap with Rwanda?

Togo's HCI+ score (136) is lower than Rwanda's (157). The indicators that account for the largest share of the HCI+ gap between Togo and Rwanda are **Harmonized Learning Outcomes (HLO), tertiary completion, and adult in wage employment**. Raising these indicators to Rwanda's levels would increase Togo's score to 174, boosting future income by approximately 37.7%.

### What is Togo's HCI+ gender gap?

The HCI+ score for **women in Togo is 128** compared to **144 for men**. The 16-point gap indicates that women's earning potential will be 16% lower than men's due to differences in the human capital acquired by men and women in Togo.

Note: All values are derived from internationally comparable public datasets.
