## Issuance Program Review | Fiscal Years 2021/2022

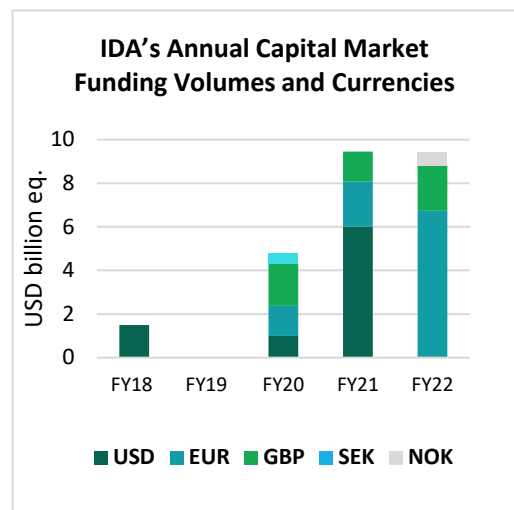

The International Development Association (IDA) is an international organization established in 1960, which is owned by 174 member countries and rated triple-A by the major credit rating agencies. IDA provides financing and knowledge services to many of the world’s developing countries and was created to supplement the activities and objectives of the International Bank for Reconstruction and Development by providing development financing to lower income countries on concessional terms. IDA contributes to the World Bank’s mission to end poverty and promote shared prosperity on a livable planet by providing loans, grants, guarantees and other financial products to the poorest and most vulnerable countries to help meet their development needs.

IDA has primarily financed its operations over the years with its own equity, including regular additions to equity provided by member countries as part of a replenishment process. In 2018, IDA began including market debt in its business model. By prudently leveraging its equity and blending market debt with equity contributions from members, IDA has increased its financial efficiency and scaled up its financing to support escalating demand for its resources while ensuring its long-term financial sustainability through a prudent risk management framework. IDA’s financial portfolio is supported by both donor contributions and market debt. These funds are pooled to support IDA operations. IDA results are therefore reported at the portfolio level. This report should be read in conjunction with [IDA’s Results Measurement System](#) (“RMS”) which tracks the development results in countries supported by IDA operations.

The 19th replenishment of IDA (IDA19) covers July 1, 2020, to June 30, 2022 (fiscal years (FY) 2021 -22). This report provides an overview of IDA commitments and disbursements in FY21 and FY22. All amounts are reported in U.S. dollars (USD or \$) unless otherwise noted.

### Funding Overview

Since its inaugural bond in April 2018, IDA has been issuing triple-A rated bonds in the international capital markets to help scale up IDA’s impact. All IDA projects and programs aim to achieve positive environmental and social impacts and outcomes consistent with the World Bank’s sustainable development mission and goals of reducing poverty and boosting prosperity. IDA Sustainable Development Bonds are consistent with the [Sustainability Bond Guidelines](#), coordinated by the International Capital Market Association. IDA’s Sustainable Development Bond [Framework](#) provides investors with information on how IDA bonds support the financing of sustainable development, including examples of the types of projects and programs that IDA bond proceeds support through the financing of loans to member countries.

IDA issues short-term debt in the form of Euro Commercial Paper (maturing in one year or less) and medium- and long-term debt (with a maturity of greater than one year). IDA issued \$9.5 billion in FY21 and \$9.4 billion in FY22 of Sustainable Development Bonds. In FY22, IDA continued to extend its benchmark curve and issued

bonds with the longest maturity of 20 years. As of June 2022, the borrowing portfolio was \$28.1 billion, \$7.5 billion higher than June 30, 2021.

This table presents outcomes and outputs of IDA-supported activities (operations funded by IDA). For more information, please visit the [IDA Results Measurement System](#) (RMS) which tracks the development results supported by IDA operations in countries. The use of a dash indicates that data is unavailable.

<sup>1</sup> Reflects the IDA-supported results achieved during FY21–22. Some indicators are new and may only have data available for FY21.

<sup>2</sup> FCS denotes “[Fragile and Conflict-affected Situations](#).”

<sup>3</sup> The number of female beneficiaries is not included since these infrastructure services are normally provided to groups (such as at the community, household, or general population level), and data collected and reported are not disaggregated by sex at the client/beneficiary level).

<sup>4</sup> The expected range (or value) corresponds to the net cumulative value expected to be achieved by the end of IDA19 (that is, June 30, 2022). Values shown are for all IDA countries; no standards have been established for FCS.

## OFFERING RESTRICTIONS / DISCLAIMERS

This report is not an offer for sale of securities of the International Development Association (IDA) in any jurisdiction or an inducement to enter into investment activity. No part of this document should form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever. Any offering of IDA securities will take place solely on the basis of the relevant offering documentation including, but not limited to, the prospectus, term sheet, and/or final terms, as applicable, prepared by IDA or on behalf of IDA, and is subject to restrictions under the laws of several countries. IDA securities may not be offered or sold except in compliance with all such laws. For purpose of making an investment decision in any securities offered by IDA, investors should read the applicable offering documentation prepared specifically for such offering, as well as the documents incorporated by reference therein, which, unless otherwise stated therein, does not include this report nor IDA's Sustainable Development Bond [Framework](#).
