

PROJECT SUMMARY

Jordan

PROJECT NAME

Support for Enhancing Jordan's NDC

GRANT OBJECTIVE AND ACTIVITIES

The project will support the government of Jordan, a member of the [NDC Partnership](#), to enhance its NDC and support implementation of the Climate Change By-law. The grant will first support strengthening stakeholder capacities for operation of the Monitoring, Reporting & Verification (MRV) system including calculation of grid emission factor. Second, it will support development of a roadmap for preparation of a 2050 Long-Term Low-carbon and Climate Resilient Strategy (LTS) and pathway for climate mitigation to achieve the near-zero emissions ambition. Finally, the grant will help to develop an NDC implementation plan, working with the Department of Statistics (DOS) in Ministry of Planning and International Cooperation (MOPIC). The WB will also work closely with other key stakeholders identified through the Partnership for Market Partnership (PMR) initiative. This project is being supported through the NDCP Climate Action Enhancement Package (CAEP) and will be implemented in close coordination with Jordan's other implementing partners, the International Renewable Energy Agency (IRENA) and Ricardo-AEA.

COUNTRY FOCAL POINTS

Ministry of Environment, Climate Change Directorate, Ministry of Planning and International Cooperation, Department of Statistics

WORLD BANK GROUP PRACTICE

Environment, Natural Resources, and Blue Economy

Energy and Extractives
