

PROJECT SUMMARY

Morocco

PROJECT NAME

Strengthening the Climate Change Competencies Center (4C)

GRANT OBJECTIVE AND ACTIVITIES

The project aims to strengthen the Climate Change Competencies Center (4C) by setting up its institutional, governance and operational framework, preparing its operational manual and setting up a national performance monitoring system for NDC implementation activities. 4C is a platform of actors from different sectors, including public administration, regional and local authorities, the private sector, research and training institutions, as well as civil society. It is a hub for the development and dissemination of climate change expertise with a regional and Africa focus.
