

PROJECT SUMMARY

Palestine

PROJECT NAME

NDC Update Support

GRANT OBJECTIVE AND ACTIVITIES

The project will support the government of Palestine, a member of the [NDC Partnership](#), to revise and update their NDC, assist in developing an enabling policy environment, and decide on policy implementation plans. In addition, the World Bank will help build capacity for institutions that are administering and implementing policies supporting the NDC. The project will also help develop expertise in project implementation and financing for government counterparts. Additional key activities include developing communications, marketing materials, and technical guidance necessary to familiarize and implement NDC policies. To accomplish this project, the World Bank will collaborate with the other development partners, including the Swedish International Development Agency (SIDA) and the Islamic Development Bank (IsDB). This project is being supported through the NDCP Climate Action Enhancement Package (CAEP).
