

Internship # 8 - Support to the Amazon Sustainable Landscapes Program
Amazon Sustainable Landscapes Program
Location: Washington DC, Colombia or Peru.

Scope of Work, Candidate, Location

The World Bank's Environment, Natural Resources and Blue Economy Global Practice (ENB) provides expertise, technical assistance and financing to help low- and middle-income countries manage land, sea and freshwater natural resources in a sustainable way to help create jobs, improve livelihoods, enhance ecosystem services, decrease pollution and increase resilience to climate change.

The Amazon Sustainable Landscapes Program is looking for an inclusive intern passionate about forest and watershed conservation, sustainable development and nature based solutions that go hand in hand with livelihoods for local communities.

The ideal candidate has a University degree in conservation, forestry, or other degrees related to environmental issues, is fluent in English and in either Spanish or Portuguese, with dominion of the other language an advantage.

The candidate will be helping the team in assembling key information and data on the Amazon that could eventually turn into future projects. Topics may include deforestation, biodiversity in protected areas, carbon stored in the forest and peatlands, water quality, economic valuation studies, sustainable value chains, tourism, legal frameworks and international environmental commitments, and more.

Location: Washington DC, Bogota Colombia, or Lima Peru.
