Making water reuse and resource recovery simple, sustainable and cost effective.
Industrial Manufacturing is a Major Contributor to Climate Change

- 20% of water use
- 22% of CO₂
- 70%+ of water pollution
- Hundreds of thousands of plants
Barriers to Recovery of Resources from Industrial Wastewater Streams

• Lack of cost effective & reliable processes
• Lack of competence for on-site operations
• Legacy regulatory infrastructure & incentives
• Low cost / subsidies for traditional resources
Cambrian’s Solutions Make Generating Clean Water & Energy Easier & Cost Effective

- Advanced biological treatment processes
- Intelligent, data-driven operations
- Simple modular systems
- Sold as a service
Cambrian’s Environmental Impact to Date

- 2B+ gallons treated / saved
- 1.5 GWh+ dirty energy avoided
