

PROJECT SUMMARY

Laos

PROJECT NAME

Enhancing Capacity and Mechanisms for Delivering the NDC

GRANT OBJECTIVE AND ACTIVITIES

The project is focused on enhancing the capacity and mechanisms for implementing and updating **Lao's nationally** determined contribution (NDC). It seeks to bring transformative and systemic impacts by supporting activities around three pillars: i) building the technical and managerial capacity of the Ministry of Natural Resources and Environment (MONRE) and other relevant ministries, ii) enhancing cross-sectoral coordination mechanisms, and iii) establishing an NDC results monitoring and reporting system.

Under the first pillar, the project helps integrate climate change into sectoral development plans and introduce climate mainstreaming and climate finance tracking practices, risk screening, and GHG accounting. Likewise, under the second pillar, it strengthens coordination mechanisms such as the existing technical working group to improve communication, collaboration and effective decision making. Lastly, the NDC results monitoring and reporting system under the third pillar is aimed at enhancing accountability for implementation. Laos is a member of the [NDC Partnership](#) and the support is part of the Climate Action Enhancement Package.
