

EDS01 - OECD Presentation on the Blue Dot Network – December 9, 2022.

The USED hosted OECD and State Department representatives for a discussion on the Blue Dot Network (BDN) – a U.S., Japanese, and Australian – led infrastructure certification program. In her opening remarks, the USED shared her in-depth expertise on infrastructure standards with an appreciative audience comprised of Executive Directors and their staff, World Bank Management, and representatives from the State Department. The event demonstrated U.S. leadership in quality infrastructure and how BDN could complement the World Bank's infrastructure quality standards and supports the new Partnership in Global Infrastructure and Investment (PGII).
