RETIREE MEDICAL INSURANCE PLAN (RMIP)

PLEASE KEEP THIS DOCUMENT FOR EASY REFERENCE

This document, together with the attached benefit summaries is the written plan document and summary plan description for the Retiree Medical Insurance Plan (RMIP). The bolded terms in this document are defined in Section 12, the Glossary. Plan members will be informed of changes and updates to the RMIP. These may occur at any time and will be posted on the World Bank Group’s external website for retirees and eligible family members, www.worldbank.org/hrs.

The RMIP is a self-funded plan that is funded by contributions of former staff and the World Bank Group. The World Bank Group contracts with Insurance Administrators who have fiduciary responsibility for processing plan claims in accordance with the RMIP’s benefits. The Insurance Administrators also provide clinical policies, which are used to determine benefit decisions. In their capacity as plan fiduciaries, the Insurance Administrators manage RMIP claims and are responsible for appeals. The basis for most RMIP claim decisions is medical necessity, and the determination of medical necessity is solely the responsibility of the Insurance Administrator. There is no internal grievance process within the World Bank Group for RMIP claims.¹ RMIP members may, however, appeal adverse claims determinations through the Insurance Administrators as set forth in Section 11.

The RMIP relies on members to understand their coverage and responsibilities and to contact the Insurance Administrator whenever there is a question or concern about coverage. To protect member confidentiality, the World Bank Group does not intervene in claims decisions.

Limited benefits, such as acupuncture and chiropractic visits, are covered without a medical necessity review, but the RMIP limits coverage of these services each year to a predetermined number of visits. Once the stated limit is reached, the benefit ends for the defined period. The World Bank Group will not waive visit limits.

The World Bank Group subsidizes the RMIP as part of its commitment to its former staff and their families to help them meet their insurance needs. The cost of coverage for each retiree under the RMIP depends on the plan in which the member is enrolled (RMIP 1 or RMIP 2), and a number of other factors, as described in detail in Chapter 02 and Appendix C of this document.

We hope members will find this document useful in helping them understand the worldwide medical care coverage offered by the RMIP.

When reading a printed version of this document, members may not be reviewing the most current information. The World Bank Group maintains the current version online on the World Bank Group’s intranet at http://MIP and on the internet at www.worldbank.org/hrs. When launched, this document can be printed in full, or members can search for a specific topic, and print only that information. Printed versions are available upon request.

¹ Disputes concerning eligibility to participate in the RMIP are subject to review through the Bank Group’s internal grievance mechanisms, except for disputes arising out of the Insurance Administrator’s decision and to the requirements relating to mental retardation or physical handicap in the case of eligible dependents.

The **World Bank Group Retiree Medical Insurance Plan (RMIP)** provides worldwide comprehensive medical and prescription drug insurance to eligible former staff who participate in the Staff Retirement Plan of the International Bank for Reconstruction and Development (**Staff Retirement Plan**) and their eligible family members.

The **RMIP** does not cover all medical and prescription drug services and purchases, even if performed or prescribed by physicians. Coverage extends only to "medically necessary" services as defined in the Glossary below.

**RMIP** benefits are designed by the **World Bank Group** and are subject to change. The **World Bank Group** has contractually provided fiduciary responsibility to process **RMIP** claims and appeals to **Insurance Administrators**. These **Insurance Administrators** adjudicate claims according to the **RMIP** plan design and disburse **RMIP** funds on behalf of the **RMIP** to pay claims. The **Insurance Administrators** have no financial incentive related to claims decisions (except to process them quickly and accurately). They are paid a service fee based on the number of **RMIP members**, not on how many claims are processed, reduced or denied.

The **RMIP** is self-funded. This means that the **World Bank Group** and former staff participating in the **RMIP**, and not an insurance company, fund the **RMIP** and pay the claims for eligible medical expenses of **members**. Participating former staff pay monthly contributions, deductibles, **coinsurance** and **cost-shares**, with additional funding from the **World Bank Group**. For additional details on costs of coverage, see Appendix C. It is the responsibility of HR to update the SPD, to exercise due diligence in the selection of Insurance Administrator(s), and to provide the Insurance Administrators with the current SPD. HR engages external consultants to conduct claims audits in order to confirm that the Insurance Administrator follows the SPD in the adjudication of claims.

**01.01 This Document**

This document supersedes any other prior plan document or summary plan description for the **RMIP**.

This document describes the general benefits available under the **RMIP**. Medical and pharmacy services not explicitly listed in this document may or may not be **covered expenses**. If you cannot find what you are looking for in this document, contact your **Insurance Administrator**.

**01.02 RMIP Plan Year**

The **RMIP Plan Year** is January 1 to December 31.

**01.03 Coverage Changes and Plan Termination**

The **World Bank Group** reserves the right to change the benefits of the **RMIP** and the eligibility for the **RMIP** at any time. The **World Bank Group** reviews coverage continually to control costs, and may amend aspects of the **RMIP** in response to changes in medical norms, advances in research,
changes in health economics and any other relevant change. RMIP members will be notified of all changes made and will be informed of these changes predominantly via regular U.S. mail.

Although there is no intention to do so, the World Bank Group also reserves the right to terminate the RMIP following approval of the Executive Directors, and after notifying RMIP participants. The right of the World Bank Group to so change or terminate the RMIP is subject to the limitations on the ability of the World Bank Group to discontinue or modify its benefit programs, as set forth in the Principles of Staff Employment, the Staff Rules, and the Retired Staff Benefits Plan and Trust.

01.04  How the RMIP Works

The RMIP is a fee for service plan\textsuperscript{2} that provides health coverage in which doctors and other providers receive a fee for each service such as an office visit, test, procedure, or other health care service. The plan will either pay the medical provider directly or reimburse members for covered services after members have paid the bill and filed an insurance claim. When medical attention is needed, members can visit the doctor or hospital of their choice; the amount paid by the plan and the member’s co-payment will depend on whether the chosen provider has a participation agreement with the plan.

The RMIP offers coverage for medically necessary services through Retiree Plan 1 and Retiree Plan 2. The Retiree Plan available to each retiree depends on their date of hire, their age and their length of service under the Staff Retirement Plan as of the date their employment with the World Bank Group ended. As used in this document, Plan means coverage under the RMIP, as follows:

i. "Dual" means coverage for the retired staff member and one eligible dependent.
ii. "Family Plan " means coverage for the retired staff member and two or more eligible dependents.
iii. "Individual Plan" means coverage under the RMIP for the retired staff member or that member’s surviving Spouse/Domestic Partner only.

The RMIP does not have a lifetime maximum benefit. This means no overall lifetime limit applies to the covered benefits in the RMIP, however, some covered services may have a benefit-specific annual or lifetime maximum benefit.

For covered services provided in the U.S., members have access to a network of participating providers including specialists and hospitals that meet strict requirements for quality and service. These network providers are independent physicians and facilities that are monitored by the RMIP Insurance Administrators for quality of care, patient satisfaction, cost-effectiveness of treatment, office standards and ongoing training.

\textsuperscript{2} The term “Retiree Medical Insurance Plan” or “RMIP” means medical insurance under the contract of insurance between the World Bank Group and the Insurance Administrator(s) as amended from time to time and for which retired staff members contribute at rates established periodically by the World Bank Group. The term "Insurance Administrator" means the company (ies) with whom the World Bank Group has contracted to administer and adjudicate claim reimbursements for the RMIP.
For **covered services** provided outside of the U.S. and for providers outside of the network, the coverage is provided as **out-of-network benefits**. **Members** generally pay upfront for services and file for reimbursement. For inpatient care, direct billing agreements may be made with the facility. **Members** can contact the **Insurance Administrator** for assistance in such cases.

**NOTE:** If a **member** withdraws from coverage under the **RMIP** at any time, such decision is irrevocable. **Members** may not reactivate coverage under the **RMIP** for any reason.

### 01.05 Online Tools

Each of the **RMIP’s Insurance Administrators** has developed online tools using internet and e-mail to support member services, in addition to phone and fax contact numbers. Use of these services can increase health awareness and maximize **RMIP** utilization.

### 01.06 Patient Confidentiality

Patient confidentiality is a cornerstone feature of the **RMIP**, as with all **World Bank Group** benefits programs. The **RMIP** and the **World Bank Group** comply with **Staff Rule 2.01**, Confidentiality of Personnel Information, and **Staff Rule 2.02**, Confidentiality of Medical Information and Medical Records.

**Insurance Administrators** are prohibited from sharing personal information with the **World Bank Group**. However, **Insurance Administrators** may provide the **World Bank Group** with the financial aspect of claims if there is a need to investigate fraud or misconduct, or to recover funds disbursed for ineligible **RMIP members**.
02 Eligibility and Enrollment

02.01 RMIP Eligibility

02.01.01 Former Staff

The Retiree Plan available to former staff depends on their date of hire, age and length of service under the Staff Retirement Plan as of the date their employment with the World Bank Group ended.

The eligibility requirements for each Retiree Plan are described in the chart below:

<table>
<thead>
<tr>
<th>Eligibility Group</th>
<th>Retiree Plan</th>
<th>Date on Board</th>
<th>Requirements as of Date Employment with the World Bank Group Ended</th>
</tr>
</thead>
</table>
| A*                | Retiree Plan 1 Only | Prior to April 15, 1998 | • Age 62 or older; or  
                      |               |               | • At least age 55, but less than age 62 with 10 years of service under the Staff Retirement Plan; or  
                      |               |               | • At least age 50, but less than age 55 with a combined total of age plus years of service under the Staff Retirement Plan of at least 75. |
| B*                | Retiree Plan 2 (with option to “buy up” to Retiree Plan 1) | Prior to April 15, 1998 | • At least age 50; and  
                      |               |               | • At least 5 years of service under the Staff Retirement Plan; and  
                      |               |               | • Combined total of age plus years of service under the Staff Retirement Plan of at least 60; and  
                      |               |               | • Does not meet the Group A requirements. |
| C                 | Retiree Plan 2 Only | On or after April 15, 1998 | • At least age 50; and  
                      |               |               | • At least 5 years of service under the Staff Retirement Plan; and  
                      |               |               | • Combined total of age plus years of service under the Staff Retirement Plan of at least 60. |

* Only staff enrolled in the Staff Retirement Plan prior to April 15, 1998 are eligible to participate in Eligibility Group A or B.

Former locally-hired staff from Country Offices who held open, term, or local regular appointment are not eligible to participate in the RMIP, but may be eligible to participate in the separate World
Bank Group Retiree Medical Benefits Plan (RMBP). The provisions of this document do not apply to the RMBP.

**NOTE:** If a **member** withdraws from coverage under the **RMIP** at any time, such decision is irrevocable. **Members** may not reactivate coverage under the **RMIP** for any reason.

02.01.02 Retiree Plan 1 Buy-Up

Retirees or survivors of an active staff member who qualify to participate in the **RMIP** as part of eligibility group B, may elect to participate in Retiree Plan 1, rather than Retiree Plan 2. This election must be made at the initial enrollment of the member in the **RMIP**. **Members** who elect to buy-up to Retiree Plan 1 may elect to revert to Retiree Plan 2 as of January 1 of any year by electing to do so prior to January 1 of that year. The decision to switch from Retiree Plan 1 to Retiree Plan 2 is irrevocable. If a **member** elects to go from Retiree Plan 1 to Retiree Plan 2, he or she will no longer be eligible to participate in Retiree Plan 1.

02.01.03 Retirees on Long Term Disability

Retirees whose appointments end during an approved period of Short Term Disability and have been approved for Long Term Disability (LTD) under Staff Rule 6.22 are eligible for coverage under Retiree Plan 1 premium free during the LTD period. After such period ends, such retiree will only remain eligible for coverage under the **RMIP** if he or she meets the eligibility criteria in Section 02.01.01. If coverage is not available under Section 02.01.01 at the end of the LTD period, **members** can enroll in continuation coverage under Section 3.04 for up to 36 months.

02.02 Coverage for Eligible Dependents, i.e., family members

Refer to definition of ‘Eligible Dependents’ in the Glossary.

02.02.01 Spouse/Domestic Partner

Retirees may cover one legal Spouse or registered and HR-approved Domestic Partner under the **RMIP**. Domestic Partner, in the case of a retiree, means a person registered as such with the **World Bank Group** who meets the **World Bank Group**’s otherwise applicable definition of a Domestic Partner, as found in Section 1.02 (g) of Staff Rule 1.01, “General Provisions.”

A retiree may add a Spouse or Domestic Partner to their **RMIP** coverage during retirement. Children of the added Spouse or Domestic Partner that are not children of the retiree (through birth or adoption) are not eligible for coverage under the **RMIP**. Coverage for any newly added Spouse shall be effective one (1) year from the date of the marriage, provided that the retiree notifies HR Operations of the new Spouse within sixty (60) calendar days of the marriage. For cases of Domestic Partners, coverage shall be effective one (1) year from the date that HR Operations has certified the Domestic Partner, provided that the retiree notified HR Operations of the new Domestic Partner within sixty (60) calendar days of their qualification. Spouses/Domestic Partners added to the **RMIP** in retirement will not maintain eligibility for coverage if the retiree dies prior to the expiration of the one year waiting period.
02.02.02 Children and Grand Children

Biological, foster or legally adopted children under age 26 of a retiree or the Spouse or registered Domestic Partner of the retiree (i.e., a stepchild) who is registered with the World Bank Group are eligible to participate in the RMIP.

A grandchild of a retiree is eligible to participate in the RMIP only if he or she is the child of that retiree’s dependent child per Staff Rule 06.02 Dependency (Tax Equivalency) Allowances, and only for the duration the child (the parent of the grandchild) meets the criteria of a dependent child under Staff Rule 06.02 Dependency (Tax Equivalency) Allowances.

If a member has a handicapped child, the child’s coverage may be continued past the RMIP’s maximum age for dependents (age 26). The child is considered handicapped if:

- He or she is unmarried.
- He or she is incapable of self-sustaining employment because of a mental or physical handicap that started when the child was the member’s dependent and before he or she reached age 26.
- He or she depends mainly on the member for support and maintenance.

Members must provide the Insurance Administrator with proof of their child’s handicap no later than 31 days after the child reaches age 26. The Insurance Administrator may require periodic health evaluations of the handicapped child after the initial acceptance of the handicap. Such examinations would be at the Insurance Administrator’s expense. A handicapped child’s coverage ends on the earliest of the following:

- The date the member’s RMIP coverage ends;
- The date the child no longer meets the RMIP’s criteria for being considered handicapped;
- The date the member fails to provide medical evidence that the handicap continues;
- The date the member fails to have any required exam performed.

02.03 When Both Spouses/Domestic Partners Are Eligible

When a Spouse or registered Domestic Partner is eligible for a medical plan sponsored by the World Bank Group in his or her own right, he/she may choose coverage as the primary insured or as a family member under the Spouse/Domestic Partner’s primary insurance. Members may not be covered under any medical plan sponsored by the World Bank Group as both an insured and a family member. Members or their Spouse or registered Domestic Partner, but not both, may enroll children who are joint eligible family members.

02.04 Surviving Family Members Eligibility

02.04.01 Death of an Active Staff Member
If an active staff member participating in the **Staff Retirement Plan**, who meets the requirements of eligibility group ‘A,’ as described in Section 02.01.01 above, dies in service, his or her Spouse, registered Domestic Partner and/or children will be eligible to continue subsidized coverage under Retiree Plan 1.

If an active staff member participating in the **Staff Retirement Plan**, who meets the requirements of eligibility group ‘B,’ as described in Section 02.01.01 above, dies in service, the Spouse, registered Domestic Partner and/or children will be eligible to continue subsidized coverage under Retiree Plan 1 through the buy up option or under Retiree Plan 2.

If an active staff member participating in the **Staff Retirement Plan**, who meets the requirements of eligibility group ‘C,’ as described in Section 02.01.01 above, dies in service, the Spouse, registered Domestic Partner and/or children will be eligible to continue subsidized coverage under Retiree Plan 2.

### 02.04.02 Death of a Retiree Participating in the RMIP

If a retiree participating in the **RMIP** dies, the surviving Spouse or registered Domestic Partner of the retiree receiving subsidized coverage through the **RMIP** will remain eligible for such subsidized coverage.

If a surviving child of a retiree was covered by the **RMIP** before the retiree’s death and is not otherwise covered under the survivor provisions of the **RMIP**, subsidized coverage will continue under the **RMIP** until the earlier of the date the child no longer qualifies as a dependent under Staff Rule 6.02 or the end of the month in which the child reaches age 26.

### 02.04.03 Death of a Deferred Retiree Not Yet Participating in the RMIP

If a retiree who met the **RMIP** eligibility requirements as of the retiree’s date of termination of employment, and deferred such coverage, dies, the surviving Spouse or registered Domestic Partner to whom the deferred retiree was married as of his or her date of termination will be eligible for subsidized coverage under the **RMIP** provided he or she provides proof of medical insurance for the three years preceding enrollment in the **RMIP**. The surviving Spouse or registered Domestic Partner of a deferred retiree may not, however, participate in the **RMIP** prior to the date the deferred retiree would have turned age 50. If the deceased retiree did not have a Spouse or registered Domestic Partner as of his or her date of termination, then any surviving Spouse or Domestic Partner is ineligible for coverage under the **RMIP**.

### 02.04.04 New Dependents of Surviving Dependents

Surviving dependents may not add individuals to their survivor coverage unless the surviving Spouse or registered Domestic Partner is pregnant at the time of the member’s death.

### 02.05 When RMIP Coverage Begins

#### 02.05.01 Retirees
Coverage under the **RMIP** is effective as of the first day of the month following the month in which coverage for a retiree under the **MIP** ceases, provided the retiree applies for **RMIP** coverage on or before or within sixty (60) calendar days following his or her last day of active service. Please note that there is no annual “Open Enrollment” period for the **RMIP**.

Notwithstanding the foregoing, if a member does not apply for **RMIP** coverage before or within sixty (60) calendar days following his or her last day of service, **RMIP** coverage for that individual will be automatically deferred until the retiree elects to begin coverage. To start coverage, the retiree must demonstrate that he or she has maintained continued comprehensive medical insurance coverage for the three years prior to activating coverage under the **RMIP**. In no event will **RMIP** coverage for a retiree begin before the retiree reaches age 50.

**02.05.02 Family Members**

Each person who is a retiree’s eligible family member on the day the retiree becomes eligible for the **RMIP** is also eligible for **RMIP** coverage on that day.

In the case of children fathered by or born to **RMIP members**, the **RMIP** covers the newborn child (or children in the case of multiple births) for the first 60 days of life even if the newborn child is not eligible for coverage (for example, in cases of **RMIP** Continuation where no new family members are permitted to be enrolled).

In the case of adoption, coverage begins when a member takes physical custody of a child for purposes of legal adoption, which must be documented accordingly. All adoptions are reviewed and approved by HR Operations. If coverage is granted for a prospectively adopted child and the adoption is later cancelled or not approved, coverage for the child is cancelled retroactively. Any claims paid on behalf of the child will not be required to be refunded to the **RMIP**.

Coverage for eligible dependent children born or adopted after the first child (or stepchildren due to remarriage) is automatic under Family coverage. **Members** must still notify HR Operations so the child can be added to the **World Bank Group** eligibility records for the **Insurance Administrators**.

Newly eligible family members (Spouse, Domestic Partner and/or their eligible children) must be enrolled within 60 days of initial eligibility, except in the case of a new birth or adoption, for which the enrollment window is extended to the first year, with premiums calculated retroactively to the date of the birth/adoption.
03 When Coverage Ends

03.01 General Rule

RMIP coverage ends on the earliest of:

- the last day of the month following notice from a member that he/she wishes to withdraw from the RMIP or,
- the date of the member’s death.

The World Bank Group can also terminate a member’s coverage as provided in Section 03.03.

Coverage would also end if the RMIP were to be terminated, subject to the provisions of Section 01.03 of this document.

03.02 Family Member’s Coverage

Family member’s coverage under the RMIP ends:

- When the retiree’s coverage ends;
- When eligibility ends, including:
  - Legal Separation, divorce or the termination of a registered Domestic Partnership; and
  - a child’s attainment of age 26, unless determined by the Insurance Administrator to be handicapped before age 26; and
- Upon the death of the retiree. Notwithstanding the foregoing, covered Spouses, registered Domestic Partners and children (including orphaned children) who meet the eligibility requirements will be eligible for coverage under the RMIP, as outlined in Section 2.04 above. Covered Spouses, Domestic Partners and children who do not meet eligibility requirements for the RMIP can continue coverage under RMIP Continuation, as outlined in Section 3.05 below.

Absent a life event that ends eligibility, retirees may not drop a family member from coverage without the written consent of the family member.

03.03 Fraud or Failure to Reimburse Overpayment of Claims

Coverage can be terminated at the World Bank Group’s discretion in cases of fraud committed against the RMIP, intentional misrepresentation of material fact, refusal to refund RMIP overpayments in case of enrollment error or otherwise, or if a member does not pay the required monthly contribution. Coverage can be retroactively terminated with at least 30 days written notice only in the case of fraud against the RMIP, intentional misrepresentation of material fact or failure to pay the required monthly contributions.
03.04  RMIP Continuation

A RMIP member who loses eligibility (for example, if a child reaches age 26 or if a retiree divorces) may continue coverage for up to 36 months. Coverage generally ends on the last day of the month during which the event occurred. RMIP continuation is not available for RMIP members whose coverage was terminated for fraud against the RMIP, intentional misrepresentation of material fact, and misconduct.

03.04.01  Applying for RMIP Continuation

The member must contact HR Operations to register an event that ends RMIP eligibility for themselves or a covered family member:

- In case of divorce or termination of a registered Domestic Partnership, an RMIP Continuation application for the Spouse or registered Domestic Partner will be sent to the retiree, the retiree’s ex-Spouse or former registered Domestic Partner, or the retiree’s ex-Spouse’s or former registered Domestic Partner’s attorney upon processing of the divorce or termination of registered Domestic Partnership after the member has notified HR Operations. The retiree is obligated to facilitate RMIP Continuation for an ex-Spouse or former registered Domestic Partner by timely notifying HR Operations of the divorce or termination of the registered Domestic Partnership by providing the appropriate forms in a timely manner.

- In case a child loses eligibility, retirees must notify HR Operations promptly. If less than 60 days have passed since the child’s coverage ended (not the date of notification), retirees will receive an RMIP Continuation application for him or her.

An applicant has 60 calendar days from the end date of RMIP coverage (and not the date of notification, even if later) to enroll for RMIP Continuation coverage and pay for at least the first month of coverage. The form and payment must be returned to the Insurance Administrator at the address on the form. If this deadline is missed, the RMIP Continuation application is rejected without possibility of later submission.

03.04.02  Cost of RMIP Continuation

The member pays the entire cost of RMIP Continuation coverage. This cost is adjusted each year at the same time RMIP premiums are adjusted (generally January 1). The monthly cost of RMIP Continuation coverage is included with the RMIP Continuation form.

03.04.03  Payment of Premiums for RMIP Continuation

RMIP Continuation premium payments are billed monthly, and payment for the full month is required and non-refundable, even if coverage is required for only a part of the month being paid for. Billing arrangements are made directly between the Insurance Administrator and the member. The member is responsible for informing the Insurance Administrator of billing address changes. Members can pay in advance for future coverage, but non-payment for any reason cancels RMIP Continuation coverage without possibility of reinstatement. The World Bank Group cannot and will not intervene in any billing dispute.
03.04.04 Covered Services under RMIP Continuation

Under RMIP Continuation, all RMIP provisions and benefits remain in effect, and members participating in RMIP Continuation are subject to the same periodic plan design changes and premium adjustments as any other RMIP member.

03.04.05 Changes in RMIP Continuation Coverage

Members may reduce coverage (e.g., Family to Individual) at the time RMIP Continuation is elected, but all members must remain in the same RMIP coverage option in which they participated as of their loss of coverage under the RMIP.

RMIP Continuation applicants may reduce coverage (e.g., drop a family member) but may not add family members. If a member gains a new dependent through childbirth, marriage or registration of a Domestic Partnership during the RMIP Continuation coverage, that individual cannot be added.3

03.04.06 Potential Consequences of Not Electing RMIP Continuation

In considering whether to elect RMIP Continuation, members should take into account that a failure to continue group health coverage may affect their future ability to enroll in other health insurance coverage under United States law.

03.05 Conversion to Limited Coverage under an Individual Plan

03.05.01 Non–U.S. residents

Individual conversion benefits will differ significantly from RMIP benefits and may vary depending on the country of residence for non-U.S. residents. Non-U.S. residents need to contact the international Insurance Administrator 30 days prior to the end of the RMIP continuation.

03.05.02 U.S. Residents

Retired staff ineligible for RMIP or with dependents losing RMIP eligibility and living in the United States should be aware of and consider alternatives to the RMIP Continuation.

03.05.03 Exclusion

Conversion is not available to those who have committed fraud against the RMIP.

3Two exceptions exist. If a female member is pregnant at the time RMIP coverage ends, the RMIP Continuation can be purchased at a higher level of coverage to include the child after birth; provided, however that the premiums for the higher level of coverage will apply immediately. Those enrolled in RMIP Continuation in Family or Family Plus coverage can add biological children born during the RMIP Continuation period. In either case, the member must notify his or her Insurance Administrator of the childbirth. Note: If members are in Family coverage when coverage ends and a child is expected that will move the member to the Family Plus level (5 or more members), members must enroll in Family Plus coverage in RMIP Continuation and immediately begin making premium payments for Family Plus coverage.
04 RMIP Options, Covered Expenses, Deductibles, Co-Payments, and Co-Insurance

04.01 Introduction

This section describes the RMIP's U.S. and international coverage options, deductibles, co-payments, coinsurance, covered expenses and limits, the medical out-of-pocket maximum, in-network versus out-of-network benefits, an overview of pharmacy services, case management, and requirements for prior authorization of medical services.

04.02 Benefit Summaries

Benefit summaries describe the general coverage provided by the RMIP. Specific details on deductibles, copayments, coinsurance, limits and maximums can also be found in those benefit summaries in the Annex below or online at http://rmip for staff and at www.worldbank.org/humanresources for former staff and eligible family members.

04.03 Covered Expenses

Covered expenses must be medically necessary for the member's specific medical condition as determined by the RMIP Insurance Administrators. The RMIP does not cover all medical and prescription drug services and purchases, even if performed or prescribed by a doctor. The Insurance Administrators determine reimbursement for a claim in accordance with the terms of the RMIP. The World Bank Group establishes the benefits design of the RMIP, but the Insurance Administrators determine coverage on each claim. The World Bank Group cannot instruct the Insurance Administrator on how to process an individual claim. The World Bank Group will periodically review plan experience with Insurance Administrators to identify any necessary or desirable adjustments.

This document describes which expenses are limited or not covered by the RMIP. The benefit summaries contain information about general coverage, deductibles and coinsurance percentages. The Insurance Administrator also can confirm coverage of specific services and explain how a claim was reimbursed.

The RMIP does not pay insurance benefits for expenses incurred before coverage starts. The RMIP does not pay insurance benefits after coverage ends, even if the expenses were incurred because of an accident, injury or disease that began or existed while the coverage was in effect.

If a series of services are billed with a lump-sum fee, each service is assigned a pro-rata share (determined by the Insurance Administrator) of the total expense based on the average time or number of visits needed to provide the services. Only the pro-rata share of the expense will be considered as incurred on the date of the service.

04.04 Prior Coverage

Prior coverage may affect the benefits provided through the RMIP. The World Bank Group reserves the right to select a new company to administer the medical care plan, or to replace one plan of
benefits with a different plan. In such cases, the prior coverage may affect the benefits under the new plan:

- The new plan will replace all privileges and benefits provided under any “prior coverage”.
- Any benefits provided under prior coverage may reduce the new plan’s benefits. For example, the use of orthodontia benefits with its life time maximum under the prior coverage would reduce such benefits subsequently accessed under the new plan.

04.05 Deductibles and Co-Payments

For some out-of-network care, and certain types of in-network care, retirees and their enrolled family members must meet an annual deductible before the RMIP starts to pay benefits. There are two types of deductibles: individual and family. The individual deductible applies to each covered family member, with two exceptions. Once covered expenses of two or more members in one family reach the family deductible, no other deductible will be required from any other family member for the rest of the calendar year.

For certain in-network-services, a co-payment is required (a fixed dollar amount) rather than a deductible. The benefit summaries show individual and family deductible amounts and those services that require a co-payment rather than a deductible.

If a member is confined in a hospital for an uninterrupted period that continues from one calendar year to another, the deductible, if any, will be considered satisfied with respect to covered expenses that are incurred by the patient during such period of confinement, provided that:

- The hospital makes a room and board charge; and
- The period of confinement began in a calendar year in which the hospitalized family member had satisfied the deductible.

If the deductible had not been satisfied in the calendar year in which the period of confinement began, then the deductible requirement for subsequent calendar years must be met from covered expenses incurred during or after the end of such uninterrupted period of confinement.

If a retiree (and enrolled family members, if applicable) is covered by both the MIP and the RMIP in the same year, the RMIP annual deductible must be met (regardless of whether the MIP annual deductible was previously met for the same calendar year). However, charges applied towards the

4A single deductible applies to all covered children born of the same pregnancy who receive care for (i) an illness within the first 31 days of life; (ii) an abnormal congenital condition; or (iii) a premature birth. After that medical event, each child reverts to his or her own deductible. Also, a common accident deductible limit provides that an additional benefit may be paid if two or more of the covered family members are injured in the same accident and have covered expenses for care of their injuries. Only one deductible will apply to all covered expenses for all family members who receive care for their injuries due to that accident.
MIP annual deductible during such a year will be applied towards the RMIP annual deductible for that year.

04.06 Medical Out-of-Pocket Maximum

- The RMIP includes an annual limit on the amount of covered expenses members must pay out of their own pocket each year. This is known as the “out-of-pocket maximum” or “stop-loss limit,” and it protects all members against the cost of very high medical expenses by shifting all covered costs to the RMIP after members have paid a certain amount in a given year. The annual out-of-pocket maximums for each option are shown in the benefit summaries. Certain charges do not accrue toward the out-of-pocket maximum and will not be covered after the out-of-pocket maximum is met (Section 06).

- There are two types of out-of-pocket maximums: individual and family.

  **Individual:** When an individual’s share of covered expenses (in-network and out-of-network combined) reaches the individual out-of-pocket maximum, the RMIP pays 100% of his or her covered expenses for the rest of that year. Individual out-of-pocket maximum expenses also contribute to the family out-of-pocket maximum.

  **Family:** When the covered expenses (in-network and out-of-network combined) of two or more family members reach the family out-of-pocket maximum, the RMIP pays 100% of the family’s covered expenses for the rest of that year.

If a retiree (and enrolled family members, if applicable) is covered by both the MIP and the RMIP in the same year, the RMIP annual out-of-pocket maximum must be met (regardless of whether the MIP annual out-of-pocket maximum was previously met for the same calendar year). However, charges applied towards the MIP annual out-of-pocket maximum during such a year will be applied towards the RMIP annual out-of-pocket maximum for that year.

04.07 In-Network Medical Benefits in the U.S.

04.07.01 Payments

The RMIP Insurance Administrator pays in-network benefits directly to the provider. Members may pay certain up-front charges such as an office visit co-payment, but the provider will bill the Insurance Administrator directly and receive reimbursement directly for the claim. The provider may bill members for a deductible, coinsurance for the service, or for non-covered services and members are obligated to pay these invoices.

04.07.02 In-Network Providers in the U.S.

When members use a participating or “in-network” provider, members maximize benefits available under the RMIP. These providers have agreed to accept negotiated rates for services.

Members are responsible for office visit co-payments, any coinsurance, and in some cases the member must meet deductibles as well, depending on the RMIP coverage level.

04.07.03 How to find In-Network Providers
The easiest way to find in-network providers is via the internet on each Insurance Administrator’s website or by calling member services.

04.08 Out-of-Network Benefits

04.08.01 Out-of-Network Medical Services

Out-of-Network providers may charge upfront for their services and require the member to file a claim for reimbursement. If a provider does not file the claim form, members must pay for the service in full and then file the claim form with an original, itemized receipt from the provider that contains the patient’s name, the date and cost of the service, and a diagnosis (the requirement for a diagnosis is waived for services priced below $500). The Insurance Administrator will then reimburse RMIP benefits to the member directly. Claim forms are available on the World Bank Group’s intranet at http://rmip or on the internet at www.worldbank.org/hrs.

Some Out-of-Network providers will file an ‘assigned’ claim on the patient’s behalf and will expect to be paid directly by the Insurance Administrator. The provider will send the patient a balance bill for any portion of the claim not covered by the RMIP.

04.08.02 Out-of-Network Providers

Members can use out-of-network doctors, facilities, or pharmacies, but this may decrease the level of their coverage under the RMIP:

- Members must satisfy an annual deductible before the RMIP begins to pay benefits.

- Once members meet the deductible, members pay a portion of the covered expenses incurred (the coinsurance share), up to the out-of-pocket maximum each year.

- If the provider charges more than the usual and customary charge as determined by the Insurance Administrator, members must pay any expenses above the usual and customary charge. That excess amount does not apply toward the deductible or out-of-pocket maximum. This amount would be shown on the Explanation of Benefits (EOB) as an “Amount Not Covered.”

All non-emergency hospitalizations should be pre-certified by the Insurance Administrator. Members are responsible for ensuring the prior authorization has been done by calling the Insurance Administrator directly prior to or as close as possible to a hospitalization. The admitting physician may do the prior authorization on the member’s behalf, but it is the member’s responsibility to ensure the prior authorization was made.

04.09 Pharmacy Services

04.09.01 Covered Drugs and Pharmacy

Covered drugs and vitamins are those that may be lawfully dispensed only on a doctor’s prescription. Benefits for certain drugs, such as Viagra and Cialis, are available but supplies are limited by the RMIP. See Section 9 below for information on excluded drugs.
The **RMIP** covers the cost of covered drugs prescribed by a licensed doctor for **medically necessary** treatment of an injury, an illness, a condition or a pregnancy in accordance with the provisions of the **RMIP** and established medical norms.

All members are provided pharmacy coverage in the United States through a pharmacy network that includes most large retail chain pharmacies. The pharmacy network also provides mail order pharmacy service for most maintenance drugs. There is no pharmacy network outside of the United States.

### 04.09.02 Prescription Drug Card and Out-of-Pocket Maximum in the United States

- **Members** residing in the United States or outside the United States are provided with discount prescription drug benefits through a Prescription Drug Card program when purchasing drugs in the United States. The **out-of-pocket maximum** for drugs purchased using the card is $1,200 for out-of-pocket expenses per individual per calendar year. The **out-of-pocket maximum** for drugs purchased using the card is $2,400 for out-of-pocket expenses per family per calendar year. Once an individual or family has reached the **out-of-pocket maximum**, coverage is at 100% until the end of the calendar year for all purchases with the Prescription Drug Card.

- **Generic, Preferred Brand and Non-Preferred Brand Drugs** purchased in the United States at a **participating network** or **mail order pharmacy** using the Prescription Drug Card respectively require that members pay increasing levels of coinsurance or copays up to specified maximums. See Section 8 below and the Pharmacy Benefits section of the relevant **benefit summary** for details.

### 04.09.03 Prescription Drugs outside of the United States

**Members** residing or visiting outside the US and purchasing their prescription drugs outside of the United States without the benefit of the prescription drug card need to file their prescription drug expenses as a medical claim and are reimbursed accordingly. When enrolled in the **international option**, **members** do not have a separate **prescription drug out-of-pocket maximum** and prescription drug claims are included in the overall medical **out-of-pocket maximum** for the calendar year.

### 04.10 Benefit Limits

The only benefit limits are those that apply to specific **covered services** and supplies, as described in the relevant sections of this document (e.g., infertility). Such benefit limits are tracked by individual and apply to all coverage through health plans sponsored by the **World Bank Group**. They are not reset upon appointment of a former enrolled family member, or reappointment of a retiree, or a change in medical plan (e.g., moving from the **MIP** to the **RMIP**).

### 04.11 Prior authorization of Hospitalization
All inpatient and outpatient hospital admissions should be pre-certified including emergency cases and mental health admissions. For additional information about prior authorization, please contact the Insurance Administrator.

04.12 Case Management

Case management is an important service to members and their covered family members. Entering case management is the most effective method to ensure that the care received is the most appropriate for the medical condition of the patient. Case management is available when important catastrophic medical conditions are identified. It allows the patient, his family or the treating physician to benefit from expert assistance from the Insurance Administrator and to manage the medical condition in the most effective manner from both a patient care and a cost perspective. Using case management services comes at no additional cost to the member, and there is no benefit penalty if members choose not to participate in case management.

For services in the United States, contact the Insurance Administrator. An individual case manager professionally trained in management of catastrophic illnesses (including inpatient mental health) or accidents will be assigned to the member’s case when appropriate.

04.13 RMIP International Coverage Option

The World Bank Group offers an international coverage option for retirees participating in the RMIP and with a permanent pension mailing address outside of the United States. This section describes the features and procedures related to these coverage options.

04.13.01 Who May Elect an International Coverage Option?

The international coverage option is available to retirees whose principal residence is not in the U.S. Principal residence is determined by the pension mailing address of the retiree.

04.13.02 How to Enroll when Eligible

If members wish to elect the international coverage option, they need to contact HR Operations to confirm their eligibility.

04.13.03 Premiums

Retiree RMIP contributions do not differ based on whether an international coverage option is elected.

04.13.04 Plan Design Differences

The international coverage option is nearly identical in terms of the coverage of benefits provided within the United States. The minor plan design differences between the international coverage option and U.S.-based RMIP coverage are summarized below.

04.13.04.01 Application of Out-of-Pocket Maximums
Under U.S.-based RMIP coverage, there are medical expense out-of-pocket maximums, and in-network prescription drug out-of-pocket maximums for drugs purchased at participating network pharmacies. Under the international option there is only one medical out-of-pocket maximum. The combined out-of-pocket maximum for any member in the international option is the same as for any member in U.S.-based coverage. Coordination of information among the Insurance Administrators ensures consistent and identical application of the out-of-pocket maximum to all RMIP members, including international option members, regardless of where prescription drugs are purchased.

04.13.04.02 Care Outside of the U.S.

As indicated in the Benefit Summaries, services provided outside the U.S. in all coverage options are reimbursed at non-network benefit levels. Retirees who elect an international coverage option and who receive care outside the U.S. are encouraged to use providers (usually hospitals and clinics) that have an agreement with the Insurance Administrator, if available. Participating hospitals, clinics and other providers that have an agreement with the international Insurance Administrator offer direct payment for services provided to RMIP members. This means that such services do not require prepayment by the patient, and the providers bill the Insurance Administrator directly first, and then bill the member for any portion of the cost that is not covered by the RMIP. If members use one of these direct payment providers, members will receive medical care simply by showing their insurance card and will not be required to complete claims forms, prepay for medical services, or provide a certificate of guarantee of their insurability. The provider will bill the Insurance Administrator directly.

The international coverage option Insurance Administrator has in some cases also negotiated discounted fees with providers in various countries, including many of the same providers with whom they have direct payments arrangements. Using such providers offers members and the RMIP savings, since the costs of any given procedure are lower for persons associated with the Insurance Administrator through the RMIP than for other persons.

Members in the RMIP international coverage option are reimbursed in accordance with the RMIP, based on medical necessity and subject to the “usual and customary” level of fees for that service. The international Insurance Administrator maintains an extensive database of the cost of all medical and dental procedures in countries and cities around the world that reflects their international claims payment experience. Under the provisions of the RMIP, charges that exceed the usual and customary charges are reduced, and reimbursement will be based on the maximum usual and customary charges.

04.13.04.03 Care within the U.S.

Members who elect an international option will have an opportunity to utilize any in-network providers for their Insurance Administrator when in the United States. Use of in-network providers offers significant advantages:
• Only a co-payment is charged for physician office visits, regardless of the cost. Expenses other than the office visit fee for additional services such as x-rays, lab tests, etc., will be reimbursed at the appropriate percentage for that benefit category; and

• Lower-cost medical services.

04.14 Switching Between U.S. and International Coverage Options

If retirees participating in an international coverage option move to the U.S. and change their permanent pension mailing address to a U.S. address, their participation in the international coverage option will end, and the retiree and enrolled family members, if applicable, will be automatically enrolled in the U.S.-based plan. Changes to or from an international coverage option are, however, processed only prior to June 15 of any calendar year. For changes later in a calendar year, the effective date of the change in option will be January 1 of the following year.
05 Medical Benefits

The RMIP covers the following, subject to the provisions of Section 06, and all other provisions in this document. To be covered by the RMIP the following services must be provided by a licensed, certified, or otherwise recognized provider who is authorized to provide said service in the concerned field of expertise.

Although a specific service may be listed as a benefit, it will not be covered by the plan unless the Insurance Administrator determines it is medically necessary to prevent, diagnose, or treat the illness, disease, injury or condition.

05.01 Acupuncture Care

The maximum benefit is 30 treatments per calendar year per member.

05.02 Chiropractic Care

The maximum benefit is 30 visits per calendar year per member.

05.03 Durable Medical Equipment and Medical Supplies

05.03.01 Durable Medical Equipment

The RMIP covers charges made for rental or purchase (if a purchase is shown to be more cost effective) of durable medical equipment of a medical or surgical nature such as hospital beds, wheelchairs, respirators and oxygen equipment, artificial limbs, prosthetics.

Durable medical equipment must be prescribed by a medical professional and related to an illness or injury. The prescribed durable medical equipment must be pre-certified by the Insurance Administrator in writing.

See list of exclusions to covered equipment in section 7.06 below.

05.03.02 Medical Supplies

The RMIP covers charges made for:

- Blood or blood plasma not donated or replaced;
- Prosthetic appliances, including adjustable brassieres following partial or total mastectomy;
- Wigs or hairpieces as a prosthetic for hair loss due to injury, disease or treatment of a disease;
- Splints, crutches, braces, and other medical and nursing supplies.

05.04 Emergency Services

05.04.01 Coverage

If the member’s condition is an emergency condition, the RMIP claim will be processed as in-network benefits, regardless of where the treatment was performed and received. However, if the
emergency care is provided by non-participating providers in an in-network facility, the benefit will be processed at the higher in-network level, but charges will be reviewed and are subject to usual and customary charges.

05.04.02 Ambulance Service

Ground ambulance service to the nearest location where the condition can be treated is covered for the patient only. Air Ambulance may also be provided when necessary, as authorized by the Insurance Administrator.

Remember! Use an emergency room for emergencies only. If members use an emergency room for non-emergency care, benefits will be processed at a lower coverage level and the deductible will apply, even at in-network facilities.

05.05 Hearing Care

The RMIP covers expenses for one audiometric exam per calendar year per member and the cost of hearing aids, up to $4,000 per person, once every five plan years.

05.06 Home Health Care

05.06.01 Home Health Care Agency

The RMIP covers up to 120 visits per plan year per condition for home health care expenses when care is provided by a home health care agency as part of a home health care plan, and the care is provided in the member’s home. Each visit by a nurse or a therapist is considered one visit, and one visit consists of up to four hours in one day. Covered expenses include:

- Physical therapy and occupational therapy;
- Medical supplies, including drugs and medicines prescribed or ordered by a duly licensed professional for symptom control, and their administration; and
- Psychological and dietary counseling.

05.06.02 Physicians and Private Duty Nursing Services

The RMIP covers charges made by a physician for covered expenses. Coverage includes private duty nursing charges made by a Registered Nurse (RN) or a Licensed Practical Nurse (LPN) up to 24 hours per day, but not including charges made by:

- The same nurse for more than one 8-hour shift during any day, or
- A nurse who resides in the insured patient’s home or is related to the insured patient by blood or marriage.

05.07 Hospice Care

The RMIP offers a hospice care benefit for members admitted to a hospice care program (inpatient, outpatient or in-home) when a physician has confirmed a life expectancy for the patient of twelve
(12) months or less. Hospice care benefits provide a higher level of coverage than standard medical benefits as detailed below:

05.07.01 Hospice Facility Expenses

Hospice care facilities, hospitals or convalescent facilities providing hospice services are covered for:

- Room and board, and other services and supplies provided to a member while he or she is a full-time inpatient for pain control or other acute and chronic symptom management (refer to section 5.10.1 below for reimbursement under inpatient hospital); and
- Services and supplies provided on an outpatient basis.

05.07.02 Other Hospice Care Agency Expenses

The RMIP covers charges made by a hospice care agency for part-time or intermittent nursing care by a Registered Nurse (RN) or Licensed Practical Nurse (LPN), or a Home Health Aide.

Charges by a Registered Nurse or Licensed Practical Nurse for private duty nursing are covered, up to 24 hours a day if the charges are not made for more than one 8-hour shift by the same nurse in any day, and the charges are not made by a nurse or family member who resides in the insured patient’s home.

05.07.03 Medical or Social Services under a Physician’s Direction for Hospice Care

RMIP coverage includes:

- Assessment of the patient’s social, emotional and medical needs, and the home and family situation;
- Identifying community resources available to the patient;
- Helping the patient make use of these resources;
- Psychological and dietary counseling, including bereavement counseling for the patient;
- Consultation or case management services provided by a physician;
- Physical therapy and occupational therapy;
- Part-time or intermittent home health aide services for up to 8 hours in any one day (these services consist mainly of caring for the patient);
- Bereavement counseling charges for professional services for family counseling prior to or after death of a covered individual (including charges for all insured family members combined for up to $75 per visit for not more than 6 visits in the 3-month period prior to or the 12-month period following the date of death);
- Medical supplies; and
• Drugs and medicines prescribed by a physician.

Charges made by a physician for consulting or case management services, and charges made by a physical or occupational therapist are also covered if the provider is not an employee of a hospice care agency and as long as a hospice care agency is still responsible for the patient’s care.

05.08 Immunizations

The RMIP covers all types of immunizations, including rabies vaccine. However, the RMIP will not reimburse for any immunization provided by the World Bank Group at no charge to an enrolled RMIP member.

The RMIP covers immunizations for allergies and travel immunizations. Travel immunizations are considered preventive care and are covered at 100% when provided by an in-network provider.

05.09 Infertility Services

The RMIP covers the diagnosis and treatment of the underlying cause of infertility. Benefits are payable like any other medical expense subject to the following limits:

• Artificial insemination is limited to six courses of treatment in a patient’s lifetime.

• Ovulation induction with ovulatory stimulant drugs, subject to a maximum of six courses of treatment in a member’s lifetime. (A course of treatment is one cycle of treatment that corresponds to one ovulation attempt.) The woman must have a condition that (i) is a demonstrated cause of infertility, (ii) has been recognized by a gynecologist or infertility specialist, and (iii) was not caused by her partner’s voluntary sterilization or hysterectomy.

The RMIP also covers Advanced Reproductive Technology (ART), payable like any other medical expense. ART includes:

• Invitro fertilization (IVF).

• Assisted hatching.

• Zygote intra-fallopian transfer (ZIFT).

• Gamete intra-fallopian transfer (GIFT).

• Tubal embryo transfer (TET) and pronuclear stage tubal embryo transfer (PROUST).

• Cryo-preserved embryo transfers, including thawing.

• Intracytoplasmic sperm injection (ICSI) or ovum microsurgery.

• Oocyte retrieval via laparoscope or transvaginal needle aspiration of follicles, including insemination in a laboratory dish.

• Care for a member associated with a donor IVF program, including fertilization and culture and services to obtain the sperm of a partner who is also a member of the RMIP.
The **RMIP** has a $50,000 lifetime limit for all professional services and prescription drugs under ART. When applying this lifetime limit, the **Insurance Administrator** will take into account only services rendered under the **RMIP** while the **member** was enrolled in either the **RMIP** or **MIP**. Once the limit is reached, prescription drug coverage for ART also ends.

The **RMIP** does not cover some aspects of infertility services (Section 07.12).

### 05.10 Hospital Services

#### 05.10.01 Inpatient Hospital, Extended Care and Skilled Nursing Facilities

The **RMIP** covers room and board charges based on the semi-private room rate unless the patient is confined to an Intensive Care Unit or the confinement in a private room is required because of a contagious disease. If the **hospital** or extended care facility does not provide semi-private room arrangements, the **RMIP** uses 80% of the private room rate as the semi-private room rate, and applies the **RMIP** benefit percentage to that amount.

The **RMIP** covers charges incurred in connection with a **hospital** confinement, including charges for **hospital** services and supplies other than room and board, general nursing services, special nursing care, other professional services, or any other care, treatment, services or supplies that are included in the room and board charges.

#### 05.10.02 Skilled Nursing Facility Services

The **RMIP** covers skilled nursing facility charges up to 60 days per person per condition per calendar year, provided the confinement is in lieu of a **hospital** confinement and the treatment provided is for skilled nursing services and not custodial care services. These services need not immediately follow a hospitalization.

#### 05.10.03 Convalescent Facility Care

In addition to skilled nursing facility services, **convalescent facility** care for up to 60 days per person per condition per calendar year is provided to a patient who had been confined as an inpatient immediately prior to admission to the **convalescent facility**, and who is recovering from a disease or injury. The **RMIP** covers charges made by a **convalescent facility** for the services and supplies listed below:

- Room and board (as per 5.10.01 above),
- Use of special treatment rooms;
- X-ray and laboratory work;
- Physical, occupational or speech therapy;
- Oxygen and other gas therapy;
- Other medical services provided by a **convalescent facility**. This does not include private or special nursing, or **physician** services; and
• Medical supplies.

05.11 Laboratory Services and Supplies

The RMIP covers:

• Anesthesia and Oxygen and its administration,
• Chemotherapy and Radiation Therapy,
• Laboratory Tests and Services.

05.12 Mammography, Including Screening and Related Physician’s Fees

The RMIP covers charges incurred for mammography, including screening and related physician’s fees. Computer-aided detection (CAD) mammography is considered an integral part of mammography.

05.13 Maternity

The RMIP covers charges by a licensed physician or nurse midwife, resulting from childbirth or miscarriage.

The RMIP also covers at least a 48-hour hospital stay following a normal vaginal delivery and at least a 96-hour hospital stay following a cesarean section.

05.14 Mental Health, Autism Spectrum Disorder and Chemical Dependency

Section 07.15 below lists mental health charges not covered by the RMIP.

05.14.01 Office Visits

The RMIP covers office visits, including office visits via telemedicine (including Skype and telephone counseling), for mental/nervous conditions. In-person office visits are also covered for substance abuse and chemical dependency treatment, and marriage counseling.

05.14.02 Psychiatric Day Treatment Programs

Charges made for full or partial day therapy, under an outpatient psychiatric treatment program or Intensive Outpatient Program (IOP), are covered for treatment of chemical dependency or mental/nervous conditions.

05.14.03 Treatment Programs for Autism Spectrum Disorder

The plan provides coverage for medically necessary treatment for Autism Spectrum Disorder to an annual maximum of $50,000 per patient per year.

05.14.04 Inpatient Treatment for Chemical Dependency and Substance Abuse

Charges are covered for a licensed institution engaged primarily in treating alcoholism or drug addiction. Prior authorization of inpatient care by the Insurance Administrator is not required.
05.14.05 Inpatient Treatment at Institutions Licensed as a Hospital or Medical Facility

Up to five days of inpatient care for evaluation and stabilization are covered without prior authorization. Additional days of inpatient care require prior authorization by an Insurance Administrator.

Benefits for the approved inpatient care for the treatment of mental/nervous conditions are applied in the same manner as approved inpatient care for medical conditions.

05.15 Outpatient Hospital Services

The RMIP covers charges by a hospital for outpatient services, including:

- **Outpatient** medical care and treatment due to surgery;
- Services rendered in a physician’s office or urgent care facility, clinic or ambulatory surgery center;
- **Outpatient** diagnostic x-ray and laboratory tests; and
- All other outpatient services.

05.16 Preventive Care

The RMIP covers in-network preventive care services at 100% without applying a deductible, co-payments or coinsurance. For purposes of preventive care, the RMIP incorporates the U.S. preventive care guidelines with respect to covered items and services. Examples of preventive care services can be found at the following web address: https://www.healthcare.gov/coverage/preventive-care-benefits/

If the associated laboratory tests, x-rays and immunizations are billed separately from the routine office visit fee, they will be processed at the otherwise applicable coverage level. The RMIP does not cover venipuncture fees.

05.17 Prescription Drug Benefits

See Section 8 below.

05.18 Short-Term Therapies

Short-term rehabilitation services are physical therapy, occupational therapy and speech therapy provided on an inpatient or outpatient basis. Restorative short-term rehabilitation helps the patient regain function following an illness, stroke, or accident. Restorative services are subject to medical necessity review by the Insurance Administrator after an initial sixty (60) visits per member per condition per calendar year.
Charges made by licensed or certified occupational therapist, physiotherapists, physical therapists, speech therapists are covered by the RMIP.

Up to 60 visits per calendar year for occupational, physical, and speech therapies combined for enrolled children with a diagnosis of developmental delay or related to developmental delay are covered.

**05.19 Surgery**

The RMIP covers charges made for inpatient or *outpatient* surgical services.

**05.19.01 Cosmetic Surgery**

The RMIP covers:

- Reconstructive surgery to correct the results of an injury;
- Surgery to treat congenital defects (such as cleft lip and cleft palate) which will allow normal bodily function;
- Surgery to reconstruct a breast after a mastectomy that was performed to treat a disease, or as a continuation of a staged reconstructive procedure; if a member elects breast reconstruction in connection with such mastectomy, the member is also covered for surgery and reconstruction on the other breast to produce a symmetrical appearance, prostheses, and treatment of physical complications of all stages of mastectomy, including lymph edemas. Coverage for reconstructive breast surgery will not be denied or reduced on the grounds that it is cosmetic in nature or that it otherwise does not meet the coverage definition of *medically necessary*. Benefits will be provided on the same basis as for any other illness or injury under the RMIP; and
- Rhinoplasty or other nasal reconstruction, and cosmetic surgery, whether or not such surgery is performed because of emotional or psychiatric reasons, provided such surgery is for (a) injuries sustained by the *member* in an accident and the surgery commences within 180 days of the date of the accident, or (b) a congenital malformation. Requests for surgery commencing later than 180 days must be justified by a medical report specifying the details of the recovery.

All other cosmetic surgery services are not covered as outlined in section 7.02 below.

**05.19.02 Second Surgical Opinion**

The RMIP covers charges for a second opinion on the *medical necessity* of a surgical procedure. The proposed surgical procedure must be covered by the RMIP, must be recommended by a physician who also proposed to perform the surgery, and cannot be for an *emergency condition* (so that a *member’s* health is not threatened by delay in an emergency). A second opinion involves an examination of the patient, x-ray and lab work, and a written report by the physician providing the second opinion. The second opinion must be provided by a doctor certified by the American Board
of Surgery or similar organization, and must be completed prior to the proposed surgery being performed.

The RMIP also covers a third surgical opinion, in the case where a second opinion does not confirm the opinion of the physician who proposed the surgery initially, subject to the above cost limits.

The RMIP will not cover the second or third opinion from a physician who is in the same practice or office or legally connected to the physician who initially recommended the surgery or who rendered a prior opinion.

05.19.03 Surgery on Mouth, Jaws, Teeth

Procedures Covered Under the RMIP:

- Biopsy of hard and soft tissues of the oral cavity,
- Bony impacted teeth,
- Jaw fracture care,
- Soft tissue lesions,
- Use of general anesthesia when circumstances require such,
- Freeing of muscle attachments, correction of cleft lip, cleft palate or protruding mandible, and
- Accidental injury to natural teeth.

05.19.04 Sterilization and Abortion

The RMIP covers abortion for female members and voluntary sterilization for male members (i.e., vasectomy), but not the reversal of such surgery. To the extent such procedures constitute preventive care, they are covered at 100% when performed by an in-network provider.

05.19.05 Transplants

The RMIP covers harvest costs incurred by patients relating to donation of organs or bone marrow for transplantation to an RMIP member. Donor costs related to infertility treatment are not covered expenses.

05.20 Transportation Charges

Charges for railroad or regularly scheduled airline service for one round-trip per calendar year per condition are also covered for the patient only, if approved by the Insurance Administrator. The transportation must be for services that are medically necessary as determined by the Insurance Administrator for the transport of the patient to and from the closest facility that can provide needed care or treatment. The RMIP does not cover a taxi or ambulance in lieu of an ambulance.

05.21 Intravenous Immunoglobulin (IVIG)
Intravenous immunoglobulin (IVIG) includes coverage for the treatment of myasthenia gravis if recommended by a qualified neurologist.

05.22 Virtual Colonoscopy

A standard colonoscopy is recommended for members age 50 and over. Services can be authorized for younger members when there is a history of colon cancer in an immediate family member (parents or siblings). Virtual colonoscopy will be covered only if the attending physician certifies it would be medically risky to attempt a standard colonoscopy.

Prior authorization by the Insurance Administrator is required for a virtual colonoscopy.
06 RMIP Coverage Exclusions and Limitations

Coverage is not provided for charges for services and supplies that are not medically necessary, as determined by the Insurance Administrator, for the diagnosis, care or treatment of the disease or injury involved. This limitation applies even if they are prescribed, recommended or approved by the attending physician or dentist.

Medical and pharmacy services not explicitly listed in this document may or may not be covered expenses. When members cannot find what they are looking for in this document, they should contact the Insurance Administrator.

For all benefit provisions, no coverage is provided for charges for the following services and supplies:

- Due to an “on-the-job” injury or illness. On-the-job means employment with any employer or self-employment where the member has a compensable workers’ compensation claim.
- Members would not legally pay if there were no insurance.
- Normally provided free of charge, regardless of the patient’s financial ability to pay. This means the RMIP will not cover charges that are made only because members have medical insurance, unless otherwise prohibited by law.
- For non-emergency care furnished or paid for by a government or government agency.
- For custodial care except as provided under covered expenses of hospice care (Section 05.07).
- For services furnished by persons who are related to the member in any way by blood, marriage or Domestic Partnership.
- For services that exceed the usual and customary charges for that service charged by most providers in the same 3-digit zip code area. For services rendered outside the U.S., the Insurance Administrator will use the usual and customary charge for the area of service, if known to the Insurance Administrator. Otherwise, the Insurance Administrator will use the charges made by providers for that service in New York City (zip code 100xx).
- For services specified by the Insurance Administrator as not covered for a specific condition or diagnosis, unless specifically listed as a covered expense elsewhere in this document or determined as standard medical practice in the country of service by the Insurance Administrator. To find out if a specific service is covered, members need to contact the Insurance Administrator.
- Services or benefits received when the patient has not met an RMIP eligibility condition.
- Registration fees or advance payment fees that are used to guarantee care by, reduce costs of care from, or facilitate delivery of care by the provider, regardless of whether the patient has received or will receive treatment from the provider.
• Services or benefits received in excess of an annual or lifetime limit (e.g., chiropractic visits in excess of 30 visits per patient per calendar year, treatment for Autism Spectrum Disorder in excess of the $50,000 annual limit referred to in section 05.14.03 above, orthodontia or infertility treatments in excess of the lifetime limits, etc.)

• Excluded services, and the following charges do not accrue toward the medical out-of-pocket maximum:
  
  o Charges that are not covered expenses, such as charges listed as an exclusion from coverage and charges in excess of the usual and customary charges; and

  o Charges that are covered expenses but for which no benefit is payable because the dollar or use limit on that benefit has been exceeded (e.g., the annual chiropractic visit limit).

    o Co-payments for medical or mental health office visits.

    o Eligible out of pocket in-network prescription drug expenses, since these expenses are subject to the separate annual Prescription Drug Out-of-Pocket Maximum.
07 Medical Expenses Not Covered

07.01 Convalescent Facilities

Convalescent facility expenses do not cover charges for treatment of drug addiction, alcoholism, senility, chronic brain syndrome, mental retardation or any other mental disorder in such facilities.

07.02 Cosmetic Surgery or Products

Cosmetic surgery or surgical procedures or cosmetic products primarily for the purpose of changing the appearance of any part of the body to improve appearance or self-esteem are not covered except as stipulated in Section 05.19.01.

07.03 Counseling

Mental health counseling coverage excludes:

- Religious counseling;
- Sex counseling, including related services and treatment;
- Pastoral counseling;
- Financial counseling; and
- Legal counseling.

07.04 Custodial Services

Except in certain hospice situations (Section 05.07), the RMIP does not cover custodial services, including:

- Homemaker or caretaker services;
- Sitter or companion services; or
- Respite care for usual providers of custodial care for a patient.

07.05 Educational or Vocational Training

The RMIP does not cover care that is provided mainly for purposes of education, training or vocational rehabilitation, educational services, special education, remedial education or job training.

The RMIP does not cover evaluation or treatment of learning disabilities, minimal brain dysfunction, learning disorders, behavioral training or cognitive rehabilitation.

The RMIP also does not cover services, treatment, educational testing and training related to behavioral (conduct) problems or learning disabilities.

The RMIP does not cover educational or associated room and board expenses for attendance at facilities for problems related to adolescence.
07.06 Equipment and Devices

07.06.01 Durable Medical Equipment

The RMIP does not cover:

- Replacement or repair of durable medical equipment due to loss or negligence.
- Replacement or repair of durable medical equipment due to normal wear or obsolescence without submission of the attending physician’s statement justifying the medical need for replacement or repair.
- Educational or experimental durable medical equipment.
- Durable medical equipment prescribed as a convenience (e.g., blood pressure kit) or accommodation to the patient, even when ordered by a physician.

07.06.02 Other Equipment and Services

The RMIP does not cover items such as, but not limited to:

- Bathroom safety equipment;
- Posture chair/recliner;
- Compression stockings;
- Environmental control equipment (air cleaners, air conditioners, air or water filters, dehumidifiers);
- Exercise equipment;
- Whirlpool equipment;
- Jacuzzi;
- Health club or athletic club fees;
- Professional medical equipment (blood pressure kits, stethoscopes, etc.);
- Non-hospital or water beds;
- Modifications to automobiles or other transportation devices;
- Van and stair lifts;
- Traction devices; and
- Intercoms or communications devices.
07.06.03 Orthopedic Devices

The RMIP does not cover orthopedic shoes, orthotics unless specifically covered per the Insurance Administrator’s coverage criteria, or, for the treatment of a medical condition of the leg, any other supportive devices.

07.07 Environmental Improvements

Coverage excludes care furnished to provide a safe surrounding, including charges for providing an environment free from exposure that could impact a disease or injury.

07.08 Expenses Incurred While Not Eligible for Coverage

The RMIP does not cover charges incurred before a member’s RMIP coverage begins or after a member’s RMIP coverage ends unless specifically provided in this document.

07.09 Experimental or Investigative Treatment

Experimental or investigational treatment is not covered, including any charges for related services or supplies furnished in connection with such care.

07.10 Funeral Arrangements

The RMIP does not cover expenses for funeral arrangements, including autopsies, transportation of remains, or cremation.

07.11 Home Health Care Services

Charges for home health care services are not covered if provided by someone who usually lives with the member or is a relative by blood or marriage, or for transportation charges of a service provider or for a social worker provided through a home health care agency.

07.12 Infertility

The RMIP does not cover the purchase of donor sperm or storage of sperm, expenses of donors of any kind, care of donor egg retrievals or transfers to storage, gestational carrier programs, and home ovulation predictor kits. The RMIP does not cover cryo-preservation (freezing) or storage of cryo-preserved embryos, except in cases where the storage was necessitated by the medical condition of the member at the time of the initially scheduled embryo transfer. In such cases, the RMIP will pay for cryo-preservation and embryo storage until the earlier of the date of embryo transfer or 90 calendar days, as long as:

- The cryo-preservation is performed expediently following the determination that the patient's medical condition could not sustain the originally scheduled embryo transfer attempt;
- Cryogenic thawing procedures are performed expediently following the medical recovery of the patient and within 90 calendar days after the cryo-preservation; and
- The patient was an RMIP member at both the time of the initially scheduled transfer and the time of the second attempt.
07.13 Legal Fees

The RMIP does not cover legal fees, including those related to medical services, appeals, claims, and subrogation.

07.14 Massage Therapy and Spa Treatments

The RMIP does not cover aqua therapy or spa treatments. Massage therapy is covered only as a modality of physical therapy.

07.15 Mental Health

The RMIP does not cover school tuition or expenses, boot camps, wilderness programs, equine therapy programs, custodial expenses in halfway houses, or similar charges relating to mental health care. Also, see Section 07.05.

07.16 Orthopedic Services

The RMIP does not cover treatment of weak, strained or flat feet, instability or imbalance of the feet, unless specifically covered per the Insurance Administrator’s coverage criteria. Charges for cutting, removal or other treatment of corns, calluses or toenails are not covered unless needed because of diabetes or other similar disease. The RMIP does cover charges made for open cutting operation of metatarsalgia or bunion, or partial or complete removal of nail roots.

07.17 Personal Comfort Items

The RMIP does not cover personal comfort items (e.g., television or telephone).

07.18 Postage and Documentation

The RMIP does not cover fees relating to photocopying, mail, translation, delivery or similar services, including those relating to diagnoses, claims or eligibility.

07.19 Sexual Dysfunction

The RMIP does not cover the treatment for sexual dysfunctions or inadequacies, including therapy, supplies and counseling unless the dysfunction has a physiological or organic basis (e.g., benign prostatic hypertrophy).

07.20 Speech Therapy

The RMIP does not cover speech or other therapy to treat lisps, stuttering or accents. Limited coverage of speech therapy is described in Section 5.18.

07.21 Sterilization Reversal

The RMIP does not cover charges for the reversal of male or female sterilization.
07.22 Telephone Including Fax and E-mail

The RMIP does not cover costs relating to telephone, fax, e-mail, etc., including those relating to diagnoses, claims or eligibility correspondence.

07.23 Therapy and Rehabilitation

The RMIP does not cover alternative or experimental therapy or rehabilitation, including (but not limited to) primal therapy, chelation therapy, Rolfing, psychodrama, megavitamin therapy, purging, bio-energetic therapy, vision perception training, and carbon dioxide therapy.

07.24 Transportation Charges

The RMIP does not reimburse transportation costs, including but not limited to mileage, fuel costs, parking, tolls, car rental, etc., even if such expenses relate to the transportation of RMIP members to or from medical or pharmacy providers.

The RMIP does not cover evacuation or repatriation charges. However, the RMIP will cover professional ambulance services and charges for railroad or regularly scheduled airline service for one round-trip per calendar year per condition and per member, if approved by the Insurance Administrator as outlined in Section 05.20.

07.25 Gender Reassignment Surgery

The RMIP does not cover gender reassignment surgery or related services to address gender identity disorder (gender dysphoria) where the condition is the health care provider’s primary diagnosis. The RMIP does cover those accepted services necessary to establish the primary diagnosis.

07.26 Volunteer Services

The RMIP does not cover charges made by a volunteer in connection with services furnished to a member while part of a hospice care program.
Prescription drug benefits are payable for covered drugs a **member** obtains while insured. For RMIP participants that are eligible for participation in the U.S. Medicare program, participation in a Medicare Part D plan, also sponsored by the World Bank Group, is required as a condition of RMIP enrollment. Additional information on the Part D prescription drug plan is contained throughout this document, and in the Evidence of Coverage documentation provided by the Insurance Administrator.

### 08.01 Brand-Name Drugs versus Generic Drugs

Prescription drugs are of two fundamental types—generic and brand-name. A generic drug is therapeutically equivalent and contains the same active ingredients, in the same dosage form, as the brand-name drug. Both types are approved by the U.S. Food and Drug Administration (FDA).

The RMIP encourages the selection of generic prescription drugs in the United States and provides greater coverage and lower copay amounts for generic drugs when drugs are purchased from a retail **participating network pharmacy** or through a **participating mail-order pharmacy**.

Brand-name drugs include preferred and non-preferred drugs. The former include carefully selected brand-name drugs that can assist in maintaining quality care for members. The **Insurance Administrator** has its own list of such drugs and can be contacted to determine if a prescribed medication is considered preferred or non-preferred. Most non-preferred drugs cost more than preferred drugs.

It is important to discuss all treatment options with a **physician**.

### 08.02 Dispense as Written (DAW) Rules

The Dispense as Written (DAW) rules provide an additional incentive for members to use lower-cost generic drugs instead of brand name drugs where there are generic equivalents available. When a generic equivalent is available, members will pay more for the cost of their medicines, based on the applicability of the DAW rules.

If:

1. **the prescribing physician writes “DAW” on the prescription and has not documented medical necessity for the brand-name drug**; or

2. **If the member asks the pharmacist to dispense the brand-name drug when a generic equivalent is available**

Then, the member pays the difference between the price of the equivalent generic drug and the price of the preferred/non-preferred brand-name drug, plus the normal cost share of that drug.

Under either scenario, the member’s total cost shall not exceed the price of the brand name drug.

The amount the member pays over the drug’s normal cost share does not contribute to meeting the member’s **Out of Pocket Maximum** for prescription drugs.
The DAW Rule does not apply to Medicare Part D participants when their prescription is processed in a Medicare Part D drug plan.

08.03 Network Pharmacies

08.03.01 Retail In-network

Retail In-network prescription benefits are managed by Insurance Administrators, and not by the World Bank Group. Prescriptions obtained at a participating network pharmacy are delivered upon presentation of the member’s insurance card. The negotiated discount and RMIP coverage are applied at the point of purchase and no claim forms are required. Members will pay the applicable coinsurance.

Purchases made at a participating network pharmacy without presenting the insurance card will be treated as out-of-network. Members will have to pay the full cost of the prescription at the time of purchase and file a medical claim with the medical claim’s Insurance Administrator and the member’s benefits will be reduced.

08.03.02 Mail Order

The prescription drug Insurance Administrator offers mail order service within the United States. Mail order service is not available to mailing addresses outside of the United States. Mail order provides additional discounts and is suited to long-term maintenance prescriptions for ongoing or chronic conditions.

08.03.03 Specialty Drugs

Specialty drugs are high-cost biotech drugs, usually injectables, used to treat serious, chronic conditions, which can be dispensed only under close medical supervision. These specialty drugs are shipped free to the patient’s home or doctor’s office. The Insurance Administrator provides refill reminders, nurse and care coordinators to answer questions about the drug/condition, ancillary supply such as syringes, and other services. Examples of Specialty drugs include chemotherapy drugs, infertility drugs, human growth hormone drugs, drugs for multiple sclerosis, and drugs for rheumatoid arthritis.

08.03.04 Prescription Drug Tiers

The RMIP utilizes a multi-tiered benefit for prescription drug purchases at network pharmacies in the United States. Members retain free choice of prescription drugs, but members maximize savings by using generic and preferred brand-name drugs. Benefits for generic, preferred brand, and non-preferred brand prescription drugs are shown in the benefit summaries.

08.04 Out-of-Network Pharmacies

Members, who purchase prescriptions from an out-of-network pharmacy or outside of the United States, must pre-pay the entire cost, and then submit a medical claim to the Insurance Administrator for reimbursement.

08.05 Prior Authorization
08.05.01 General Information

The Insurance Administrators are authorized to obtain any information deemed necessary to fill or reimburse a prescription. The Insurance Administrator may review any prescription for medical necessity and compliance with the provisions of the RMIP and established medical norms.

08.05.02 Infertility Drugs

Infertility drugs require preauthorization and are not covered if the member has exceeded any lifetime limit for corresponding medical infertility services as specified in the benefits summaries.

08.05.03 All Other Drugs

Certain covered drugs require preauthorization prior to dispensing at a participating network pharmacy, or prior to reimbursement by the Insurance Administrator.

08.06 Dispensing Limit

08.06.01 Dispensing Limit Generally

The dispensing limit when using a participating network or mail-order pharmacy is a 90-day supply when supported by a corroborating prescription from a doctor or dentist. A vacation override can be made for up to a 180-day supply by seeking prior authorization from the Insurance Administrator. Requests for supplies of 181 days to 365 days must be approved by the Insurance Administrator and the World Bank Group. The supply cannot exceed 365 days.

08.06.02 Dispensing Limit for Members in RMIP Continuation

The dispensing limit for all prescription drug purchases by members in RMIP Continuation is 90 days, regardless of whether the purchase is from a retail pharmacy or through the mail-order service.
09 Prescription Drug Exclusions and Limitations

Prescription drug expenses not covered include:

- Over-the-counter products (including over-the-counter vitamins and nicotine products) other than diabetic supplies or products defined as preventive care. This applies even if a **physician** prescribes the over-the-counter product.

- Therapeutic devices or appliances (i.e., hypodermic needles, syringes, etc., other than diabetic supplies).

- Anorexics or appetite suppressants available over the counter are excluded.

- Beauty aids.

- Blood and blood plasma. This is covered as a medical expense. See Section 05.03.02.

- Cosmetics and cosmetic drugs.

- Dietary supplements other than those administered internally, or those that may be lawfully dispensed only with a doctor’s prescription (such as prescribed prenatal vitamins and vitamins available only by prescription for specific medical conditions).

- **Experimental** or investigative drugs or substances which the U.S. Food and Drug Administration (FDA) has not approved for general use, or for drugs labeled “Caution: Limited by Federal law to investigational use.” This exclusion includes the “off-label use” of drugs for an indication or in an age group, dosage, or route of administration not approved by the FDA.

- Topical Rogaine or Minoxidil, or any other drug used for cosmetic purposes other than to treat an illness or injury.

- Hair loss drugs, unless the hair loss is due to an illness or injury sustained in an accident that takes place while the **member** is covered under the **RMIP**.

- Charges that are incurred before the **member’s** coverage under the **RMIP** begins, or after the **member’s** coverage under the **RMIP** ends.

- Charges for prescribed nicotine products in excess of a six-month supply during a person’s lifetime while the **member** is insured under the **RMIP**.

- Any prescription refill in excess of the number or supply specified by the doctor or dentist.

- Any prescription dispensed more than one year after the doctor’s or dentist’s order.

- Any drug that may be obtained without charge under any government program in which the member is eligible to participate.

- Any drug for which a **member** would not legally have to pay if there were no insurance for prescription drugs.
- Any drug or its administration for which a terminally ill member is entitled to benefits under the RMIP's hospice care coverage. See Section 05.07.

- Any drug prescribed for treatment of an on-the-job injury or illness, where the insured has a compensable workers’ compensation claim for that injury or illness.

- Any drug that is not medically necessary. For prescribed drugs that require the Insurance Administrator to determine medical necessity, the Insurance Administrator requires evidence of an existing medical condition that meets the RMIP criteria. Such documentation must be submitted by a physician, including the member's name, date of birth, diagnosis, statement as to the medication, benefits of the prescribed medicine and other medications which have proved to be ineffective in the member's treatment.

- Charges made by an out-of-network pharmacy which are in excess of usual and customary charges.

- Drugs approved by the U.S. Food and Drug Administration for a class of patient different from the insured, e.g., a drug approved for children taken by an adult, unless specifically approved by the Insurance Administrator.

NOTE: Amounts paid for these items do not apply to the annual Out of Pocket Maximum for prescription drugs.
Coverage under more than one health plan is not unusual. For example, a member may have coverage under a Spouse’s health plan as well as the RMIP. Or, if over age 65, a member residing in the US may be covered under both the RMIP and Medicare. When more than one health plan pays benefits, these benefits must be coordinated to ensure that the total benefits paid for a health care service by all insurers do not exceed what the RMIP recognizes as a covered expense. The following information explains how benefits are coordinated between RMIP and other plans, and the premium discounts or reimbursements that members and their eligible family members receive for their participation in national health plans.

**10.01 What “Other Plans” Means**

An “other plan” is any other type of health expense coverage under:

- Government-provided or government-subsidized national health plans such as Medicare in the U.S.
- Group health insurance.
- Any other type of health coverage for persons in a group. This includes plans that are insured and those that are not.

There is no coordination with individual health plans.

**10.02 National Health Plans for Retirees**

**10.02.01 Enrollment Requirement**

RMIP participants (including retirees and any Spouse/Domestic Partner or eligible dependent) are obligated to join any national health plan for which they are eligible in their country of residence and in which they can participate on the same terms as other nationals of that country. Members must report enrollment in any national plan to HR Operations. The Insurance Administrator will coordinate RMIP coverage with any national health plan coverage. Failure to enroll in a national health plan in a timely way may result in lower RMIP benefits and higher costs for the individual and the RMIP as a whole.

U.S. Citizens and Permanent Residents

U.S. citizens and permanent residents are required by RMIP to enroll in Medicare Part A provided they meet the eligibility requirements that enable them to enroll without being required to pay a premium for Part A. Even if they are not eligible for premium-free Part A benefits, U.S. citizens and permanent residents who meet eligibility requirements must enroll in Medicare Part B and pay the premium associated with Part B. Because enrollment in Part B will reduce RMIP’s costs, RMIP will reimburse members for the costs of their participation in Part B. Please note that failure to enroll in Medicare Part B in a timely fashion may result in the assessment of a late enrollment penalty by the U.S. Government. This late enrollment penalty is not eligible for reimbursement by the RMIP. Eligible participants should **not** enroll in Medicare Part D on their own as their enrollment will be coordinated...
by HR and the Insurance Administrator for the WBG-sponsored Employer Prescription Drug Plan when they become eligible.

RMIP Members Eligible for Non-U.S. National Health Plans

RMIP members whose permanent residence is outside of the U.S. and who are eligible for a non-U.S. national health plan must enroll in that national health plan.

10.02.02 Premium Reimbursement and Reductions

U.S. Citizens and Permanent Residents Enrolled in Medicare

**RMIP members** who are eligible for and enroll in Medicare Parts B and D will be reimbursed for the standard Medicare Part B premium and any applicable Income Related Monthly Adjustment Amount (IRMAA) for Parts B and D.

Reimbursement for the standard Medicare Part B premium will be effective on the first of the month in which the **RMIP member** submits proof of enrollment, or the effective date of Medicare Part B coverage, whichever is later (i.e. a copy of the Medicare card showing Part B coverage) to HR Operations. **RMIP members** must apply for IRMAA reimbursement annually to HR Operations to obtain reimbursement of this portion of the Medicare premium. As noted above, participants are required to join Medicare Part A only if they can do so without paying a premium. Consequently, Medicare Part A premiums are not reimbursable by the **RMIP**.

RMIP Members Enrolled in Non-U.S. National Health Plans

A premium reduction under the **RMIP** may be available to members who permanently reside outside of the U.S. and who enroll in the national health plan of their country of permanent residence. In contrast, a resident of the U.S. who is enrolled in a Canadian provincial national health scheme would not be eligible for an **RMIP** premium reduction even if he or she were a Canadian citizen. In this example, the **RMIP** discount would become available only if the **RMIP** member changed his or her permanent residence to Canada. The **World Bank Group** may audit the participation of any **member** in a national health plan.

Premium reductions become effective as of the first day of the month following the date HR Operations is notified that a **member** has enrolled in an applicable national health plan or the effective date of applicable national health plan coverage, whichever is later. Annex C has more information on the calculation of premium reductions.

10.03 Coordination Method

To ensure that payments by multiple parties do not exceed what RMIP considers the total cost of a covered service, benefits are coordinated in such a manner as to ensure that the **RMIP** will pay either:

- its regular benefits in full; or
- a reduced amount of benefits.
Benefits paid by RMIP may be reduced by either the “coordination method” (Retiree Plan 1) or the “exclusion method” (Retiree Plan 2).

10.03.01 Coordination Method (Retiree Plan 1)

Retiree Plan 1 uses the “coordination method”, which compares the amount of allowable expenses the RMIP would have paid to the amount the other insurance coverage actually paid. Under this method, the RMIP will pay the balance of all unpaid expenses, including the other insurance coverage’s deductibles and co-payments, up to the limit it would have otherwise paid. Therefore, under the coordination method, it is possible for a member to receive 100% reimbursement for an allowable RMIP expense.

In the following example of the coordination method, assume the provider is participating in both plans, the deductible for both plans has been met and that in this case Medicare has a 20% coinsurance rate and RMIP1 a 10% coinsurance rate.

<table>
<thead>
<tr>
<th>Cost Element</th>
<th>Medicare</th>

<td>$1,200</td>
<td>$1,350</td>
</tr>
<tr>
<td>Benefit Paid By Each Plan</td>
<td>$1,200</td>
<td>$300</td>
</tr>
</tbody>
</table>

Total Benefit Paid: $1,500  
Patient Responsibility $ 0

10.03.02 Exclusion Method (Retiree Plan 2)

Retiree Plan 2 uses the “exclusion method”, which takes the amount of “allowable expenses” under the RMIP incurred by the member for whom a claim for benefits is filed, minus any benefits paid by “other plan(s)” and applies the RMIP coverage rules to the resulting balance. If another plan provides benefits in the form of services, rather than cash, the cash value of such services is used for this purpose.

“Allowable expenses” for this purpose mean any medically necessary and reasonable health expenses, part or all of which are covered under any of the plans involved.

In the following example of the exclusion method, assume the provider is participating in both plans, the deductible for both plans has been met and that both plans have the same coinsurance rates used in the example above.

10.04 Coordination Rules for Plans Other Than Medicare

The Plan has adopted a coordination of benefits provision that conforms to the Model COB Regulation adopted by the National Association of Insurance Commissioners in June 1985, as modified from time to time.

To find out if RMIP benefits will be reduced as a result of coordination, the Insurance Administrator must first determine which plan pays benefits first. For queries about the order of coverage, members should contact the Insurance Administrator.

The determination of which plan pays first (the “order of coverage”) is as follows:

- The plan without a coordination of benefits provision determines its benefits before the plan that has such a provision.
- The plan that covers a person as a staff member or retiree determines its benefits before the plan that covers the person as a dependent. If the person is a member and is eligible for Medicare and is not actively working, Medicare pays first.

Under the Medicare Secondary Payer rules, the order of benefits is as follows:

- The plan that covers the person as a dependent of a working Spouse pays first;
- Medicare pays second; and
- The plan that covers the person as a retiree pays third.5

When coordinating with Medicare, the Insurance Administrator may use Medicare’s determination of Allowable Expenses (MAE) or the Plan’s determination of Allowable Expenses as the basis of determining whether and to what extent additional benefits are payable by the Plan. Three claim situations could arise:

- **Medicare Participating Provider**—The provider’s charge cannot exceed MAE. Once paid by Medicare, the claim is processed by the Insurance Administrator using MAE. The Retiree’s Medicare out of pocket expense, i.e., coinsurance and deductibles, is based on MAE. The RMIP would use MAE to determine what it would pay. With COB, up to 100 percent of

---

5 This type of situation arises when a person, who is a Medicare beneficiary, is also covered under his or her own group health plan as a retiree and under a group health plan as a dependent of an active employee. In this situation, each of the three plans is secondary to the other as the following illustrates: (1) Medicare is secondary to the group health plan covering the person as a dependent of an active employee as required pursuant to the Medicare secondary payer rules; (2) the group health plan covering the person as a dependent of an active employee is secondary to the group health plan covering the person as a retiree; and (3) the group health plan covering the claimant as a retiree is secondary to Medicare because the plan is designed to supplement Medicare when Medicare is the primary plan.
MAE could be covered. **RMIP Allowable Expense** is not relevant since there is no charge in excess of MAE.

- **Non-participating Provider.** If a provider chooses not to become a Medicare participating provider, he may either accept or decline assignment of Medicare benefits. If the provider accepts assignment, then COB is as described above for a participating Medicare provider. If the provider does not accept assignment, he cannot by law charge the Medicare Retiree more than 115 percent of the Medicare fee schedule. The Medicare Retiree is not responsible for billed amounts in excess of 115 percent of MAE. Medicare will pay its portion, and the **Insurance Administrator** will process the balance based on the **RMIP’s benefit provisions**. The **Insurance Administrator** would use the 115 percent of the fee schedule as the MAE. As with the Medicare participating provider, there is no **RMIP Allowable Expense** to refer to for COB.

- **Providers who opt out of Medicare.** A provider opting out of Medicare enters into private contracts with Medicare Retirees. Under these contracts, the Retirees waive their rights to limit their payments to what Medicare allows, and they agree to pay the provider’s full charges. It is our understanding that these claims cannot be submitted to Medicare by the Retiree or the provider. In such cases, the **Insurance Administrator** will pay based on the **RMIP’s Allowable Expense** and no COB would occur. RMIP participants must submit a copy of the provider’s letter to Medicare opting out of the Medicare payment structure when submitting the first claim from that provider for reimbursement under the RMIP.

For a dependent child, whose parents are married or are living together, whether or not they have ever been married, **the plan of the parent whose birthday occurs earlier in the calendar year pays first.** This means that if a **member** were born in April and the Spouse/Domestic Partner was born in October, the **member’s** plan is considered primary and pays benefits first, even if the Spouse/Domestic Partner is older than the **member**. When both parents’ birthdays occur on the same day, the plan that has covered the parent the longest pays first. If the other plan does not have the parent birthday rule, the other plan’s coordination of benefits rule applies.

When the parents of a dependent child are divorced, or separated:

- If there is a court decree which states that the parents will share joint custody of a dependent child, without stating that one of the parents is responsible for the health care expenses of the child, the “birthday rule” described above applies.
- If a court decree gives financial responsibility for the child’s medical, dental or other health care expenses to one of the parents, the plan covering the child as that parent’s dependent determines its benefits before any other plan that covers the child as a dependent. If there is no such court decree, the order of benefits will be that the plan of the parent who has custody pays benefits before the plan of the step-parent with whom the child resides, which pays benefits before the plan of the parent who does not have custody.
If an individual has coverage as an active employee or dependent of such employee, and as a retired or laid-off employee, the plan that covers the individual as an active employee or dependent of such employee is primary.

The benefits of a plan which covers a person under a right of continuation under federal or state laws will be determined after the benefits of any other plan which does not cover the person under a right of continuation.

If the above rules do not establish an order of payment, the plan that has covered the person for the longest time will pay benefits first.

To administer the coordination rules, the Insurance Administrator can release or obtain data. The Insurance Administrator can also make or recover payments.

10.05 Coordination and Prescription Drug Benefits

Prescription drug benefits and out-of-pocket expenses do not coordinate with other plans, even if the other plan covers prescription drugs as a benefit. The only exception to this rule is with respect to the Medicare Part D benefit, which coordinates with other plans, such as the World Bank Group sponsored plan for Medicare eligible RMIP participants, pursuant to the rules of the Medicare system.

10.06 Right of Recovery and Subrogation

The RMIP may recover benefits paid for expenses incurred by a member due to an injury or illness for which another person (called the “third party”) may be liable. If a member incurs expenses that would be covered under the RMIP because an injury, illness or condition caused by the actions or omissions of a third party (“covered expenses”), he or she must notify the Insurance Administrator of any claim, right of recovery, demands, actions or lawsuit that the member may have against the third party for covered expenses (“third party claims”). Notice must be provided within a reasonable time, but no more than 30 calendar days after the member knows or should have known of the actions, omissions, or events that form the basis for any third-party claims.

In this case, the RMIP has the right to pursue all rights of recovery against the third party or a person’s insurance carrier, for example in the event of a claim under the uninsured or underinsured auto coverage provision of an auto insurance policy. The RMIP shall be subrogated to any and all third-party claims. The member may do nothing to prejudice the RMIP’s right to subrogation or reimbursement. Furthermore, the RMIP may, but need not, in its sole discretion, require a member as a precondition to payment of covered expenses by the RMIP to sign a subrogation and reimbursement agreement and to agree, in writing, to assist the RMIP to secure its right to subrogation and reimbursement from a third party.

The RMIP also has the right to recover from the insured person amounts received by judgment, settlement, payment or compensation (regardless of fault, negligence or wrong doing) or otherwise from the third party, his or her insurance carrier, or any other person or entity. The RMIP may also
recover refunds from providers for services already reimbursed by the RMIP. The member must execute and deliver any documents required, and do whatever is necessary to secure the Insurance Administrator’s rights of recovery and will cooperate fully with the Insurance Administrator or its subcontractors in recovery attempts.

The member has an obligation to notify the Insurance Administrator immediately in writing of the receipt of an amount of any recovery. The member has a duty to hold the recovery separately and not commingle it with any other assets until the RMIP is repaid in full. The member also agrees that the RMIP has an equitable lien by agreement on the portion of any such recovery paid by the RMIP for covered expenses and a constructive trust on the entire recovery.

The RMIP has the right to be reimbursed first from any such recovery for covered expenses paid or payable in the future by the RMIP whether or not the member’s recovery was less than the actual damages incurred and whether or not the member has been made whole. These rights of first priority in contravention of the make whole or similar doctrine shall not be affected or limited in any way by the manner in which the member or any person or entity paying any recovery designates or characterizes the recovery or any portion of the recovery. The member must repay the RMIP in full out of the recovery for all covered expenses that have been paid by the RMIP and that are reasonably foreseeable at the time of recovery. Reimbursement to the RMIP will be without reduction, set-off or abatement for attorneys’ fees or costs incurred by the member in collecting the recovery.
11 Claims, Payments and Appeals

11.01 Keeping Records of Expenses

Records of health expenses for Retired Staff and all covered family members will be required when filing a claim for benefits. Of particular importance are:

- Names and addresses of doctors, dentists and other care providers;
- Dates on which expenses are incurred; and
- Copies of all health care bills and receipts.

11.02 Claims

11.02.01 Filing Claims

A claim must include an original itemized receipt showing the patient’s name, date of service, provider name, and diagnosis (the requirement for a diagnosis is waived for medical claims priced below $500). It should show each service or supply provided with the associated fee.

If an in-network provider is used, he or she will file claims on the member’s behalf. However, if an out-of-network provider is used, the member (or the member’s legally authorized representative) is responsible for filing his own claims if the provider does not do so on his behalf.

To file a claim, a claim form must be completed. RMIP claim forms are available from the Insurance Administrator or from the internet at www.worldbank.org/hrs. The instructions for completing the form and a mailing address are included on each form.

All claims must be filed promptly. A claim that is filed beyond the end of the calendar year following the year in which the service was incurred will not be accepted. For example, if a service is incurred during 2016, the corresponding claim may be filed up until December 31, 2017.

11.02.02 Urgent Care Claims

This type of claim includes those situations commonly treated as emergencies. If a treating physician believes that a member has an urgent care claim, the member or his representative must provide notice to the Insurance Administrator. If the claim is an urgent care claim, the member or his authorized representative will be notified of the Insurance Administrator’s decision about the claim not more than 72 hours after receipt of a complete claim. If the claim does not include sufficient information for the Insurance Administrator to make a decision, the member or his representative will be notified of the need to provide additional information within 24 hours after receipt of the incomplete claim. The member will have at least 48 hours to respond to this request. The Insurance Administrator will inform the member of its decision within 48 hours of receipt of the additional information.

11.02.03 Prior Authorization (Pre-Service Claims)
A prior authorization claim is a claim for which a member must get approval before obtaining medical care or treatment. This process is also often referred to as a pre-service claim. If prior authorization is requested, the Insurance Administrator will notify the member of its initial determination not more than 15 days from the date it receives a complete request for prior authorization. If more time is needed, the member will be notified that an additional processing period is required. If an extension is due to a failure to submit all the necessary information to make a determination, the member will have at least 45 days to provide the additional information requested. Members are encouraged to request a pre-authorization for services exceeding $500.

11.02.04 Post-Service Claims

A post-service claim is a claim for which payment is requested after medical care or treatment has already been provided. If the claim is a post-service claim, the member will be notified if the complete claim is denied in whole or in part within 30 days after it is received. If more time is needed for review, the member will be notified that an additional processing period is required. If an extension is due to a failure to submit all of the necessary information to decide the claim, the member will have at least 45 days to provide the additional information requested.

11.02.05 Concurrent Care Claims for Ongoing Treatment

A concurrent care decision occurs where the RMIP approves an ongoing course of treatment to be provided over a period of time or for a specified number of treatments. There are two types of concurrent care claims: (a) where reconsideration of the approval results in a reduction or termination of the initially approved period of time or number of treatments; and (b) where an extension is requested beyond the initially approved period of time or number of treatments.

- **Concurrent Care Early Termination.** A decision by the RMIP to reduce or terminate an initially approved course of treatment may be appealed. Notification of a decision by the RMIP to reduce or terminate an initially approved course of treatment shall be provided sufficiently in advance of the reduction or termination to allow an appeal of this determination and receive a decision on the appeal prior to the reduction or termination. All requests shall be decided in the otherwise applicable time frames for the type of claim (pre-service, post-service, or urgent care).

- **Concurrent Care Extension Request.** If there is a request to extend a concurrent care decision involving urgent care and if the claim is made at least 24 hours prior to the end of the initially approved period of time or number of treatments, the claim shall be decided within no more than 24 hours after receipt of the claim. Any other request to extend a concurrent care decision shall be decided in the otherwise applicable time frames for the type of claim (pre-service, post-service, or urgent care).

11.03 Review and Denial of Claims - Members in U.S. Plan Options

11.03.01 Review of Claims

The Insurance Administrator has fiduciary responsibility to review and process claims in accordance with the RMIP. The Insurance Administrator must process a claim based on material submitted, and
if insufficient medical information is provided, they may be obliged to deny a claim. The Insurance Administrator cannot “put aside” a claim pending receipt of additional information, so if a claim is incomplete, the member will be notified and provided time (48 hours for urgent care claims and 45 days for pre-service and post-service claims) to provide additional information. If the additional information is not provided within the applicable timeframe, the claim will be denied and that message conveyed on the explanation of benefits. If the member obtains the necessary information for a post-service claim after the 45-day period has elapsed, the member can submit the information to the Insurance Administrator and the claim will be re-opened and processed.

The World Bank Group does not review medical claim information, and cannot and will not instruct the Insurance Administrator on specific claim reimbursements. The World Bank Group’s internal grievance procedure is not available to review RMIP claim disputes. Resolution of claim disputes is the responsibility of the Insurance Administrator.

11.03.02 Denial of Claims

If all or part of a claim is denied, the Insurance Administrator will notify the member of the denial (also called an adverse benefit determination). All denials will be in writing, unless the claim involves urgent care, in which case notice of the denial may initially be made orally. A denial notice will:

- State specific reason(s) for the denial, with specific references to the RMIP provision(s) on which the denial was based;
- List any additional material or information that may be needed to perfect the claim and explain why such material or information is necessary;
- Include any internal rule, guideline, protocol, or other similar criterion relied upon or a statement that a copy of such will be provided upon request and free of charge;
- Include an explanation of the scientific or clinical judgment for a determination based on a medical necessity, experimental treatment or similar exclusion or limit, applying the terms of the RMIP to the medical circumstances of the member, or a statement that such explanation will be provided upon request and free of charge;
- Include information sufficient to identify the claim, including the date of service, the health care provider, the claim amount, and the denial codes and their meanings, if applicable;
- Include a statement that diagnosis and treatment codes and their meanings, if applicable, will be provided upon request and free of charge; and
- Include a description of the standard, if any, used in making the benefit determination.

The notice will also describe in detail how to have the decision reviewed, the review procedures, how to file an appeal, and the applicable time frame for requesting review (including, in the case of a claim involving urgent care, a description of the expedited review process applicable to such claim). The notice will also describe the external review process.

11.04 Appeals – Members in U.S. Plan Options
11.04.01 Filing an Appeal

In accordance with Staff Rule 6.12, Participation in the Medical Insurance Plan, RMIP claims decisions are not subject to the World Bank Group internal grievance mechanisms, such as the Peer Review Committee or the Administrative Tribunal.

If a claim has been denied, the denial can be appealed to the Insurance Administrator and reviewed. The member must file the appeal, and the Insurance Administrator must review the appeal, within the time frames provided below. An employee of the Insurance Administrator other than the employee involved in the initial benefit determination or a subordinate of such individual will be appointed to decide the appeal. Please note that the time frames differ based on the category of benefit and the type of claim.

A member has 180 days after the receipt of the denial notice to request a review of the denial. The request for a review must be in writing unless the claim involves urgent care, in which case the request may be made orally and documentation may be provided by facsimile or other expeditious method. The Insurance Administrator must respond within the time frames provided below.

- **Urgent Care Claims.** Not later than 72 hours after receiving a request for review.
- **Prior Authorization (Pre-Service Claims).** Not later than 30 days after receiving a request for a review.
- **Post-Service Claims.** Not later than 60 days after receiving a request for a review.
- **Concurrent Care Claims for Ongoing Treatment.** For early termination claims—before the proposed reduction or termination takes place. For extension request claims—the appeal time frame for urgent care, pre-service, or post-service claims (as described above), as appropriate to the request.

11.04.02 Appeals Process

In connection with the right of a member to appeal the denial, in whole or in part, of a claim for benefits, the member may request, free of charge, reasonable access to and copies of all relevant documents, records, and other information related to the claim, unless such relevant documents, records or other information are privileged. The member can also submit comments, documents, records, and other relevant information regarding why the claim should not be denied. These submissions must be in writing.

If the claim was denied based on a medical judgment, the Insurance Administrator will consult with a health care professional with appropriate training and experience. The health care professional consulted for the appeal will not be the professional (if any) consulted during the prior determination, nor a subordinate of such professional.

11.04.03 Decision on Appeal

The decision will be sent to the member in writing. A denial will:
State the specific reasons(s) for the denial, with specific references to the RMIP provision(s) on which the denial was based;

Include any internal rule, guideline, protocol, or other similar criterion relied upon or a statement that a copy of such will be provided upon request and free of charge;

Include an explanation of the scientific or clinical judgment for a determination based on a medical necessity, experimental treatment or similar exclusion or limit, applying the terms of the RMIP to the member’s medical circumstances, or a statement that such explanation will be provided upon request and free of charge;

Include information sufficient to identify the claim, including the date of service, the health care provider, the claim amount, and the denial codes and their meanings, if applicable;

Include a statement that diagnosis and treatment codes and their meanings, if applicable, will be provided upon request and free of charge;

Include a description of the standard, if any, used in making the benefit determination;

Include a discussion of the final appeal denial decision (also called a final adverse benefit determination);

State that the member is entitled to receive, upon request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to the claim for benefits; and

Describe the second appeal procedures;

11.05 Second Appeal – Members in U.S. Plan Options

If your appeal is unsuccessful and the coverage denial is upheld, you have the right to request a second level appeal within 60 calendar days after receiving the decision on the first level appeal.

For non-medical necessity reviews, an Insurance Administrator appeals analyst that was not involved in the first level appeal will review the claim. Examples of appeals that fall into this category include appeals for usual and customary charges, cutbacks, as well as those expenses not covered in Section 07, Medical Expenses Not Covered, and Appendix Section A03, Dental Expenses Not Covered.

If the first level appeal was denied based on a medical judgment, the Insurance Administrator will consult with a health care professional with appropriate training and experience. The health care professional consulted for the second level appeal will not be the professional (if any) consulted during the original claim determination or the first level appeal, nor a subordinate of such professional.

The decision will be sent to the member in writing. A denial will:
• State the specific reasons(s) for the denial, with specific references to the RMIP provision(s) on which the denial was based;

• Include any internal rule, guideline, protocol, or other similar criterion relied upon or a statement that a copy of such will be provided upon request and free of charge;

• Include an explanation of the scientific or clinical judgment for a determination based on a medical necessity, experimental treatment or similar exclusion or limit, applying the terms of the RMIP to the member’s medical circumstances, or a statement that such explanation will be provided upon request and free of charge;

• Include information sufficient to identify the claim, including the date of service, the health care provider, the claim amount, and the denial codes and their meanings, if applicable;

• Include a statement that diagnosis and treatment codes and their meanings, if applicable, will be provided upon request and free of charge;

• Include a description of the standard, if any, used in denying the benefit determination;

• Include a discussion of the final appeal denial decision (also called a final adverse benefit determination);

• State that the member is entitled to receive, upon request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to the claim for benefits;

• Describe any available voluntary appeal procedures; and

• Describe any external review procedures, describe how to request external review, and provide information about the applicable time frame for requesting review (including any expedited time frame that may apply to an urgent care claim).

11.06 External Review – Members in U.S. Plan Options

RMIP members have the right to file an appeal from an adverse benefit determination relating to service(s) that were received or could have been received from a health care provider under the RMIP.

11.06.01 Eligibility for External Review

The external review process under the RMIP gives members the opportunity to receive review of an adverse benefit determination (including a final internal adverse benefit determination (claim denial)) conducted pursuant to applicable law. A request will be eligible for external review if the following are satisfied:

• The adverse benefit determination is based on a lack of medical necessity, or the treatment at issue is considered experimental and/or investigational; or

• The Insurance Administrator does not adhere to all claim determination and appeal requirements under U.S. federal law; or
- The standard levels of appeal have been exhausted; or
- The appeal relates to a rescission, defined as a cancellation or discontinuance of coverage that has retroactive effect; and,
- The amount in dispute exceeds $500.

An adverse benefit determination based upon eligibility is not eligible for external review.

If upon the final standard level of appeal, the coverage denial is upheld and it is determined that the member is eligible for external review, the member will be informed in writing of the steps necessary to request an external review.

If external review is requested, an independent review organization will refer the case for review by a neutral, independent clinical reviewer with appropriate expertise in the area in question. The decision of the independent external expert reviewer is binding on the member, the Insurance Administrator and the RMIP unless otherwise allowed by law.

11.06.02 Requesting External Review

To request an external review, the member must request such a review in accordance with the procedures established by the Insurance Administrator within 123 calendar days of the date the member received the adverse benefit determination or final internal adverse benefit determination notice. If the last filing date would fall on a Saturday, Sunday or federal holiday, the last filing date is extended to the next day that is not a Saturday, Sunday or federal holiday. The member also must include a copy of the notice and all other pertinent information that supports the request.

If the member files a voluntary appeal, any applicable statute of limitations will be tolled while the appeal is pending. The filing of a claim will have no effect on the member's rights to any other benefits under the RMIP. However, the appeal is voluntary and the member is not required to undertake it before pursuing legal action.

If the member chooses not to file for voluntary review, the RMIP will not assert that the member has failed to exhaust his or her administrative remedies because of that choice.

11.06.03 Preliminary Review

Within 5 business days following the date of receipt of a request for external review, the Insurance Administrator must provide a preliminary review determining the following: the member was covered under the RMIP at the time the service was requested or provided, the determination does not relate to eligibility, the member has exhausted the internal appeals process and the member has provided all paperwork necessary to complete the external review.

Within one business day after completion of the preliminary review, the Insurance Administrator must issue to the member a notification in writing. If the request is complete but not eligible for external review, such notification will include the reasons for its ineligibility. If the request is not complete, such notification will describe the information or materials needed to make the request.
complete, and the Insurance Administrator must allow the member to perfect the request for external review within the 123 calendar day filing period or within the 48-hour period following the receipt of the notification, whichever is later.

11.06.04 Referral to External Review Officer (ERO)

The Insurance Administrator will assign an ERO accredited as required under federal law, to conduct the external review. The assigned ERO will notify the member in a timely manner in writing of the request’s eligibility and acceptance for external review, and will provide an opportunity for the member to submit in writing, within 10 business days following the date of receipt, additional information that the ERO must consider when conducting the external review. Within one (1) business day after making the decision, the ERO must notify the member, the Insurance Administrator and the RMIP.

The ERO will review all of the information and documents received in a timely manner. In reaching a decision, the assigned ERO will review the claim and not be bound by any decisions or conclusions reached during the RMIP’s internal claims and appeals process. In addition to the documents and information provided, the assigned ERO, to the extent the information or documents are available and the ERO considers them appropriate, will consider the following in reaching a decision:

- The member's medical records;
- The attending health care professional's recommendation;
- Reports from appropriate health care professionals and other documents submitted by the Insurance Administrator, the member, or the member’s treating provider;
- The terms of the RMIP to ensure that the ERO's decision is not contrary to the terms of the plan, unless the terms are inconsistent with applicable law;
- Appropriate practice guidelines, which must include applicable evidence-based standards and may include any other practice guidelines developed by the U.S. federal government, national or professional medical societies, boards, and associations;
- Any applicable clinical review criteria developed and used by the Insurance Administrator, unless the criteria are inconsistent with the terms of the RMIP or with applicable law; and
- The opinion of the ERO's clinical reviewer or reviewers after considering the information described in this notice to the extent the information or documents are available and the clinical reviewer or reviewers consider appropriate.

The assigned ERO must provide written notice of the final external review decision within 45 days after the ERO receives the request for the external review. The ERO must deliver the notice of the final external review decision to the member, the Insurance Administrator and the RMIP.

The ERO’s decision will contain:
• Information sufficient to identify the claim, including the date(s) of service, the health care provider, any applicable claim amount, and the diagnosis and treatment codes and their meaning;

• A general description of the reasons for the previous denial and the reasons review was requested;

• The date the ERO received the request for review and the date of its decision;

• References to the documentation, specific coverage provisions, and evidence-based standards considered in reaching its decision;

• A discussion of the reasons for its decision and any evidence based-standards it relied on in making its decision; and

• A statement that its decision is binding, except to the extent that other remedies are available under state or federal law.

After a final external review decision, the ERO must maintain records of all claims and notices associated with the external review process for six years. An ERO must make such records available for examination by the claimant, the RMIP, or federal oversight agency, if applicable, upon request, except where such disclosure would violate U.S. federal privacy laws.

Upon receipt of a notice of a final external review decision reversing the adverse benefit determination or final internal adverse benefit determination, the RMIP must immediately provide coverage or payment (including immediately authorizing or immediately paying benefits) for the claim.

11.06.05 Expedited External Review

The RMIP allows a member to request an expedited external review at the time the member receives:

• An adverse benefit determination if the adverse benefit determination involves a medical condition for which the time frame for completion of an expedited internal appeal would seriously jeopardize the member’s life or health or would jeopardize the member’s ability to regain maximum function and the member has filed a request for an expedited internal appeal; or

• A final internal adverse benefit determination, if the member has a medical condition where the time frame for completion of a standard external review would seriously jeopardize the member’s life or health or would jeopardize the member’s ability to regain maximum function, or if the final internal adverse benefit determination concerns an admission, availability of care, continued stay, or health care item or service for which the member received emergency services, but has not been discharged from a facility.

Immediately upon receipt of the request for expedited external review, the Insurance Administrator will determine whether the request meets the reviewability requirements set forth above for
standard **external review**. The **Insurance Administrator** must immediately send the **member** a notice of its eligibility determination.

Upon a determination that a request is eligible for **external review** following preliminary review, the **Insurance Administrator** will assign an **ERO**. The **ERO** shall render a decision as expeditiously as the **member**’s medical condition or circumstances require, but in no event more than 72 hours after the **ERO** receives the request for an expedited **external review**. If the notice is not in writing, within 48 hours after the date of providing that notice, the assigned **ERO** must provide written confirmation of the decision to the **member**, the **member**’s **Insurance Administrator** and the **RMIP**.

11.07 Review and Denial of Claims – Members in International Plan Options

11.07.01  Review of Claims

The **Insurance Administrator** has fiduciary responsibility to review and process claims in accordance with the **RMIP**. The **Insurance Administrator** must process a claim based on material submitted, and if insufficient medical information is provided at time of submission, the **Insurance Administrator** may be obliged to deny a claim. The **Insurance Administrator** cannot “put aside” a claim pending receipt of additional information, so if a claim is incomplete, it will be denied and the member will be notified within 10 working days of the denial. If the **member** obtains the necessary information for a post-service claim within the **RMIP** deadline for filing claims, the member can submit the information to the **Insurance Administrator** and the claim will be re-opened and processed.

The **World Bank Group** does not review medical claim information, and cannot and will not instruct the **Insurance Administrator** on specific claim reimbursements. The **World Bank Group**’s internal grievance procedure is not available to review **RMIP** claim disputes. Resolution of claim disputes is the responsibility of the **Insurance Administrator**.

11.07.02  Denial of Claims

If all or part of a claim is denied, the **Insurance Administrator** will notify the **member** of the denial (also called an **adverse benefit determination**). All denials will be in writing. A denial notice will:

- Include information sufficient to identify the claim, including the date of service, the health care provider, the claim amount, and the denial codes and their meanings, if applicable;

- State specific reason(s) for the denial, with specific references to the **RMIP** provision(s) on which the denial was based; and

- List any additional material or information that may be needed to perfect the claim and explain why such material or information is necessary.

The notice will also describe in detail how to have the decision reviewed, the review procedures, how to file an appeal, and the applicable time frame for requesting review.
11.08  Appeals – Members in the International Plan Options

11.08.01 Completeness of information

If a claim is denied, the member should verify that the Insurance Administrator possessed and processed complete information with regard to the diagnosis and treatment.

11.08.02 Filing an Appeal

In accordance with Staff Rule 6.12, Participation in the Medical Insurance Plan, RMIP claims decisions are not subject to the World Bank Group internal grievance mechanisms, such as the Appeals Committee or the Administrative Tribunal.

If a claim has been denied, the denial can be appealed to the Insurance Administrator and reviewed. A member has 60 days after the receipt of the denial notice to request a review of the denial. The request for a review must be in writing unless the claim involves urgent care, in which case the request may be made orally and documentation may be provided by fax or other expeditious method.

To obtain a review, the member or his/her representative should submit a request to the Insurance Administrator. The request should include:

- identifying information, including:
  - the group name (World Bank Group RMIP);
  - the Retired Staff Member’s name and UPI number; and
  - the patient’s name and date of birth;

- which claim the Insurance Administrator should review:
  - provider name;
  - invoice date; and
  - claim processing date.

- the reason that the claim should be reviewed

In connection with the right of a member to appeal the denial, in whole or in part, of a claim for benefits, the member may request, free of charge, reasonable access to and copies of all relevant documents, records, and other information related to the claim, unless such relevant documents, records or other information are privileged. The member can also submit comments, documents, records, and other relevant information regarding why the claim should not be denied. These submissions must be in writing.
11.08.03 Appeals Process

The Insurance Administrator must respond within the time frames provided below.

- **Urgent Care Claims.** Not later than 72 hours after receiving a request for review.
- **Prior Authorization.** Not later than 60 days after receiving a request for a review.
- **Post-Service Claims.** Not later than 60 days after receiving a request for a review.
- **Concurrent Care Claims for Ongoing Treatment.** For early termination claims—before the proposed reduction or termination takes place. For extension request claims—the appeal time frame for urgent care, prior authorization, or post-service claims (as described above), as appropriate to the request.

Someone, other than an individual involved in the initial benefit determination or a subordinate of such individual, will be appointed to decide the appeal. Please note that the time frames differ based on the category of benefit and the type of claim.

If the claim was denied based on a medical judgment, the Insurance Administrator will consult with a health care professional with appropriate training and experience. The health care professional consulted for the appeal will not be the professional (if any) consulted during the prior determination, nor a subordinate of such professional.

11.08.04 Decision on Appeal

The decision will be sent to the member in writing. A denial will:

- Include information sufficient to identify the claim, including the date of service, the health care provider, the claim amount, and the denial codes and their meanings, if applicable;
- State the specific reasons(s) for the denial, with specific references to the RMIP provision(s) on which the denial was based;
- Include any internal rule, guideline, protocol, or other similar criterion relied upon or a statement that a copy of such will be provided upon request and free of charge;
- Include an explanation of the scientific or clinical judgment for a determination based on a medical necessity, experimental treatment or similar exclusion or limit, applying the terms of the RMIP to the member’s medical circumstances, or a statement that such explanation will be provided upon request and free of charge;
- Include a description of the standard, if any, used in making the benefit determination;
- State that the member is entitled to receive, upon request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to the claim for benefits, unless such relevant documents, records or other information are privileged;
● Describe any external review procedures, describe how to request external review, and provide information about the applicable time frame for requesting review (including any expedited time frame that may apply to an urgent care claim).

11.09 Payment of Benefits

If members pay for a service in full, generally members should file the claim. If the provider files the claim on the member's behalf, members risk overpaying the provider. If the Insurance Administrator receives a claim form where the provider states that the “assignment signature is on file,” the Insurance Administrator, not the member, must pay the provider. If the member also has paid the provider, then the provider would be paid twice and members would need to seek reimbursement from the provider.

Refer to sections 04.07.01 and 04.08.01 for details on how in-network and out-of-network benefits, respectively, are paid by the Insurance Administrator.

11.09.01 Domestic Disputes and Estrangement

The World Bank Group complies with Staff Rule 2.01, Confidentiality of Personnel Information, which allows disclosure of RMIP coverage information (including RMIP identification cards) to a family member covered by the RMIP without authorization by the retiree.

In cases of estrangement between retirees and their covered family members, if a covered family member pays a medical expense, and if a claim reimbursement is sent to the retiree for such a claim, the retiree must pay the reimbursed amount to the covered family member within five business days of receipt of the claim reimbursement from the Insurance Administrator. Withholding such payments is considered fraud on the RMIP, and is an ethical violation that could result in penalties imposed by the World Bank Group up to and including permanent cancellation of medical insurance coverage.

11.09.02 Claim Payment Options

Claims for members with a U.S. address are reimbursed by check in U.S. dollars unless the member elects otherwise. U.S. residents and non-residents may elect to have claim reimbursements paid to them via direct deposit by following the process set forth by each Insurance Administrator.

There are no restrictions against making payments in any other currencies, as long as there are no legal restrictions. If a request is received for EFT in a currency other than US dollars, the Insurance Administrator attempts such arrangements. However, this delays the processing of the claim.

11.10 Adjustment Rule

If a member in eligibility group B changes his or her coverage from Retiree Plan 1 to Retiree Plan 2, or moves from the World Bank Group Medical Insurance Plan to the RMIP, benefits for claims incurred after the effective date of the change will be paid according to the provisions for the RMIP or the newly elected Retiree Plan. In other words, there are no vested rights to benefits based on provisions in effect before the adjustment date. If benefits increase because of a change, such an
increase applies only to claims incurred on or after the effective date of the increase, not to claims incurred prior to that date.

11.11 Misstatement of Fact

If there is any misstatement of fact that affects coverage under the RMIP, the true facts will be used to determine the coverage that applies. If it is proved that a retiree or his covered family members have committed fraud on the RMIP or an intentional misrepresentation of a material fact, then the member’s RMIP coverage will be terminated pursuant to Section 03.03. Disciplinary action under Staff Rule 3.01, Standards of Professional Conduct, may also apply.

11.12 Recovery of Overpayment

If the Insurance Administrator makes a benefit payment that exceeds the amount a person is entitled to under the RMIP, as a result of errors made by the member, the provider or the Insurance Administrator, the Insurance Administrator has the right to:

- Require that the overpayment be immediately returned on request; or
- Reduce any future benefit payment(s) by the amount of the overpayment (future payments to the person who incurred the original claim, plus payments to covered family members, may be reduced).

If a member refuses to repay any owed amount to the Insurance Administrator, the World Bank Group may suspend or permanently revoke RMIP coverage.

This right of recovery of overpayment does not affect any other right of recovery or right of subrogation that the Insurance Administrator may have.

11.13 Legal Action

No legal action can be brought by a member or provider to recover a benefit more than three years after the deadline for filing claims.
Adverse Benefit Determination: A denial, reduction, termination of or failure to provide or make payment (in whole or in part) for a service supply or benefit, including any rescission of coverage.

Ambulance: A vehicle that is staffed with medical personnel and equipped to transport an ill or injured person.

Assignment of Benefits: With the Insurance Administrator’s written consent, a member may have RMIP benefits assigned to his/her health care provider. This means RMIP benefits will be paid directly to the doctor (or facility, such as a hospital or laboratory), rather than to the member. This is normally indicated on a medical claim form.

Benefit Summary: A chart setting forth the coverage levels currently provided under an applicable RMIP Retiree Plan.

Brand-Name Drug: A prescription drug or medicine that is protected by trademark registration. The patent for brand-name drugs is in effect for 17 years in the United States.

Coinsurance: The percentage of a covered amount members need to pay, with or without paying the calendar year deductible first.

Convalescent Facility: An institution that is licensed to provide, and does provide, the following on an inpatient basis for persons convalescing from disease or injury:

- Professional nursing care by a Registered Nurse (RN), or by a Licensed Practical Nurse (LPN) directed by a full-time RN;
- Physical restoration services to help patients meet a goal of self-care in daily living activities; and
- 24-hour nursing care by licensed nurses directed by a full-time RN.

The facility must be supervised full-time by a physician or RN and keep a complete medical record on each patient. The facility must have a utilization review plan and must not be mainly a place for rest, for the aged, for drug addicts, for alcoholics, for people who are mentally retarded, for custodial or educational care, or for care of mental disorders.

Co-payment: The flat fee members pay for certain types of covered services and supplies. The co-payments that apply to each RMIP coverage option are shown in the benefit summaries chart. Additional services such as lab tests or x-rays are typically not included in this office visit co-payment, and members are responsible for coinsurance for such additional covered expenses.
Covered Expenses: Expenses that are usual and customary charges for specified services and supplies furnished or ordered by a provider, and that are medically necessary as defined by the Insurance Administrator and the provisions of this document.

Custodial Care: Services and supplies (including room and board and other institutional care) provided to help a person in the activities of daily life. Such services are not medical treatment for the diagnosis or treatment of a disease or injury. The person does not have to be disabled. Such services and supplies are custodial care no matter who prescribes, recommends or performs them.

Deductible: The amount of covered expenses each member or family of member must pay each calendar year before the RMIP will begin to pay benefits. Some expenses do not count toward a deductible, such as office visit co-payments.

Dependent Child: An unmarried biological or legally adopted son or daughter of a retiree as defined in Staff Rule 1.01 General Provisions, paragraph 1.02 Definitions, and Staff Rule 6.02 Dependency Allowances, paragraph 1.03 Definitions.

Domestic Partner: Domestic Partner in respect to participation in the RMIP means an unmarried individual whom a former staff member, while unmarried, has properly registered with the World Bank Group as the former staff member’s Domestic Partner, and whom the World Bank Group recognizes as the former staff member’s Domestic Partner in accordance with its rules and policies.

Durable Medical Equipment: Equipment and accessories that are:

- Made to withstand prolonged use;
- Made for and mainly used in the treatment of a disease or injury;
- Intended for use in the home;
- Not normally of use to people who do not have a disease or injury;
- Not for use in altering air quality or temperature; and
- Not for exercise or training.

The RMIP does not allow for more than one item of equipment for the same or similar purpose. Durable medical equipment does not include equipment such as whirlpools, portable whirlpool pumps, sauna baths, massage devices, overbed tables, elevators, stair lifts, communication aids, vision aids, and telephone alert systems.

Eligible Dependent: The term "Eligible Dependent" means a:

- Spouse or registered Domestic Partner, as described under Section 02.02.01
  - Children and Grandchildren, as described under Section 02.02.02.

Emergency Care: The treatment given to evaluate and treat an emergency condition. In all cases, emergency care will include:
• A medical screening examination that is within the capability of the emergency department of a hospital, including ancillary services routinely available to the emergency department to evaluate the emergency condition; and

• Such further medical examination and treatment, to the extent they are within the capabilities of the staff and facilities available at the hospital to stabilize the patient.

For this purpose, “stabilize” means to provide such medical treatment of the condition as may be necessary to assume, within reasonable medical probability that no material deterioration of the condition is likely to result from or occur during the transfer of the individual from a facility.

Emergency Condition: A recent and severe medical condition including but not limited to severe pain which would lead a prudent layperson possessing an average knowledge of medicine and health to believe that his or her condition, illness, or injury is of such a nature that failure to get immediate medical care could result in:

• Placing the person’s health in serious jeopardy;

• Serious impairment to bodily function;

• Serious dysfunction of a body part or organ; or

• Serious jeopardy to the health of the unborn child (in the case of a pregnant woman).

ERO: An independent external review organization that conducts reviews of adverse benefit determinations.

Experimental or Investigational Treatment: A treatment that the Insurance Administrator, at its discretion, determines is not commonly and customarily recognized as safe and effective for the particular diagnosis or treatment, or which requires approval by any government authority and such approval has not been granted before the service or supply is furnished. Furthermore, this includes services or supplies that are determined by the Insurance Administrator to be experimental.

A drug, device, procedure or treatment will be considered experimental if:

• There are insufficient outcome data available from controlled clinical trials published in the peer-reviewed literature to substantiate safety and effectiveness for the disease or injury being treated.

• Required U.S. Food and Drug Administration approval or other national licensing authority has not been granted for marketing as a treatment for that disease or injury.

• A recognized national medical or dental society or regulatory agency has determined in writing that the service or supply is experimental or for research purposes.

• The written treatment protocol or the study protocol has stated that the service or supply is experimental or for research purposes.

• It is not of proven benefit for the specific diagnosis or treatment of the disease or injury.
- It is not generally recognized by the medical community as effective or appropriate for the specific diagnosis or treatment of the disease or injury.
- It is performed or provided in special settings for research purposes.

**External Review:** A review of an **adverse benefit determination** by an ERO.

**Family Deductible:** The amount of **covered expenses** a family must pay each calendar year before the **RMIP** will begin to pay benefits. If a family incurs **covered expenses** equal to the **family deductible**, the **RMIP** will process claims as if each family member’s individual **deductible** has been met for the balance of that calendar year. Any amount of **covered expenses** that a retiree or any family member covered by the **RMIP** pays during a year for a covered service will contribute towards the **family deductible**.

Expenses paid by or on behalf of a participant in Sponsored Medical Insurance Plan are not applied toward the **family deductible**.

**Final External Review Decision:** A determination by an **ERO** at the conclusion of an **external review**.

**Final Internal Adverse Benefit Determination:** An adverse benefit determination that has been upheld by the **Insurance Administrator** at the completion of the internal appeals process.

**Generic Drug:** When a **drug** has been on the market and loses its patent protection, other manufacturers may produce a generic version. Generics in the U.S. are safety-tested by the Food and Drug Administration.

**Headquarters:** The **World Bank Group’s** offices in Washington, D.C. and the satellite offices located in Austria, Belgium, France, Germany, Italy, Japan, Switzerland, United Kingdom and any other satellite office the **World Bank Group** may designate.

**Home Health Care Agency:** An agency that:

- Mainly provides skilled nursing and other therapeutic services;
- Is associated with a professional group (of at least one **physician** and one registered nurse) which makes policy;
- Has full-time supervision by a **physician** or a registered nurse;
- Keeps complete medical records on each person;
- Has an administrator; and
- Meets licensing standards.

**Home Health Care Plan:** A plan that provides for care and treatment in a person’s home. It must be prescribed in writing by the attending **physician** and be an alternative to inpatient **hospital** or **convalescent facility** care.
Hospice Care: Care provided to a terminally ill person by or under arrangements with a hospice care agency. The care must be part of a hospice care program.

Hospice Care Agency: An agency or organization that:

- Has hospice care available 24 hours per day and meets any licensing or certification standards set forth by the jurisdiction in which it operates;
- Provides mainly skilled nursing services, medical and social services and other psychological and dietary counseling;
- Provides or arranges for other services, such as the services of a physician, physical and occupational therapy, part-time home health aide and inpatient care in a facility when needed for pain control or acute or chronic symptom management;
- Has personnel employed, including at least one physician and one registered nurse (RN) and one licensed or certified social worker;
- Has established policies governing the provision of hospice care;
- Assesses the patient’s medical and social needs and develops a hospice care program to meet those needs;
- Provides an ongoing quality assurance program;
- Permits all area medical personnel to utilize its services for their patients;
- Maintains complete medical records on each patient; and
- Employs a full-time administrator.

Hospice Care Program: A written plan of hospice care that is established and reviewed by a physician and appropriate personnel of a hospice care agency, is designed to provide palliative and supportive care to terminally ill patients and supportive care to their families and includes an assessment of a patient’s medical and social needs and a description of the care to be provided to meet those needs.

Hospice Facility: A facility that mainly provides hospice care and provides nursing services 24 hours a day under the direction of a registered nurse (RN) and meets any licensing or certification standards set forth by the jurisdiction in which it operates. It must employ a full-time administrator, physician or RN and maintain complete medical records on each patient.

Hospital: A legally operated institution which is engaged primarily in providing medical services for resident patients and which has permanent facilities for diagnosis and for major surgery, continuous nursing service by registered nurses and continuous supervision by a staff of doctors. It is not mainly a place for rest, care for the aged or care for drug addicts or alcoholics, or a nursing home, and must make charges for services provided.

Hospitalization: Hospitalization means an in-patient or outpatient event taking place in a Hospital.
Illness: A pathological condition of the body that presents a group of clinical signs and symptoms and laboratory findings peculiar to the findings that set the condition apart as an abnormal entity differing from other normal or pathological body states.

In-Network Benefits: Benefits for services obtained through a participating medical or prescription drug provider. Generally, covered in-network benefits require lower co-payment and coinsurance amounts, and the fee charged is a pre-negotiated amount agreed upon between the provider and the Insurance Administrator.

In-Network Provider: Also called “participating provider,” any physician, hospital, skilled nursing facility or other individual or entity delivering health care or ancillary services which contracts with the Insurance Administrator to provide covered services to RMIP members for a negotiated charge. In general, in-network providers file all reimbursement requests, and members are responsible only for co-payment and/or coinsurance at the time of service.

Injury: An accidental bodily injury that is the sole and direct result of: (i) an unexpected or reasonably unforeseen occurrence or event; or, (ii) the reasonable unforeseeable consequences of a voluntary act by the person. An act or event must be definite as to time and place.

Inpatient Hospitalization: Inpatient Hospitalization means a hospitalization event requiring one or more overnight stays in a hospital facility, as determined by the Insurance Administrator.

Insurance Administrator: A vendor with whom the World Bank Group has contracted to provide administrative services for benefits provided under the RMIP. The Insurance Administrators have fiduciary responsibility to adjudicate claims under the RMIP.

International Option: Coverage provided to members with a non-U.S. pension mailing address.

Medical Necessity: Also called “medically necessary,” a service or supply furnished by a particular provider necessary and appropriate for the diagnosis, the care or the treatment of the disease or injury involved, as determined by the Insurance Administrator. To be appropriate the service or supply must:

- Be care or treatment, as likely to produce a significant positive outcome as, and no more likely to produce a negative outcome than, any alternative service or supply, both as to the disease or injury involved and the person’s overall health condition; or
- Be a diagnostic procedure, indicated by the health status of the person, and be as likely to result in information that could affect the course of treatment as, and no more likely to produce a negative outcome than, any alternative service or supply, as to both the disease or injury involved and the person’s overall health condition.

In determining if a service or supply is appropriate under the circumstances, the Insurance Administrator will take into consideration:

- Information provided on the affected person’s health status;
- Reports in peer-reviewed medical literature;
• Reports and guidelines published by nationally recognized health care organizations that include supporting scientific data;

• Generally recognized professional standards of safety and effectiveness in the U.S. (or the country in which care is rendered) for diagnosis, care or treatment;

• The opinion of health professionals in the health specialty involved, and any other relevant information known by the Insurance Administrator.

The following services or supplies are never considered medically necessary:

• Those that do not require the technical skills of a medical, mental health or dental professional.

• Those furnished mainly for the personal comfort or convenience of the person, any person who cares for him or her, and any person who is part of his or her family, any health care provider or health care facility.

Member: Any individual enrolled in the RMIP either as the insured or as a dependent of the insured or as another enrolled family member of the insured.

Non-Participating Provider: A provider who has not contracted with the Insurance Administrator to provide services at a negotiated rate.

Open Enrollment: An annual period where participants in a health plan have the opportunity to enroll themselves and/or others eligible for coverage in the plan.

Out-of-Network Benefits: Benefits for services obtained through a non-participating provider. Generally, covered out-of-network benefits require that the deductible first be satisfied before reimbursement is made. In addition, the non-participating provider may require payment at the time of service, and the member must file the claim.

Out-of-Pocket Maximum: Also, called a “medical stop-loss,” the maximum amount a member must pay toward out-of-pocket expenses in a calendar year. Once the member reaches his/her out-of-pocket maximum, the RMIP pays 100% of covered expenses for the remainder of the calendar year. Certain expenses do not apply toward the out-of-pocket maximum:

• Expenses that exceed the usual and customary charge limits;

• Charges for services that are not covered by the RMIP;

• Penalties for failure to obtain the necessary prior authorization for covered hospitalizations if they were to apply in the RMIP;

• Co-payments for physician’s office visits;

• Co-payments and coinsurance amounts paid for in-network prescription drug purchases as they are covered by the Prescription Drug Out-of-Pocket Maximum.
Outpatient: An RMIP member who is registered at a physician's office or recognized health care facility, but not as an inpatient, or services and supplies provided in such a setting.

Participating Mail-Order Pharmacy: A mail-order pharmacy facility at which an RMIP member may buy prescriptions at a discount in accordance with the RMIP’s personal prescription drug insurance provisions. Mail-order pharmacies can deliver only to U.S. addresses, and cannot deliver to World Bank Group business addresses in Washington, D.C. or elsewhere.

Participating Network Pharmacy: A retail pharmacy that participates in the Prescription Benefit Manager’s network throughout the U.S. and at which RMIP members can buy prescriptions at a discount in accordance with the RMIP’s Prescription Drug insurance provisions. These are also known as in-network pharmacies.

Participating Provider: See “In-network Provider.”

Patient Management: Free programs designed to assist RMIP members with large or complex cases to assess opportunities to coordinate care, identify treatment options to improve the quality of care, and quality of life and to control costs. Patient Management and Case Management are recommended for all members.

Physician: A member of a medical profession, who is properly licensed or certified to provide medical care under the laws of the state where he or she practices, and who provides medical services which are within the scope of his or her license or certificate.

Plan 1/Plan 2: The terms "Plan 1" and "Plan 2" mean the two levels of benefit coverage available to retired staff under the RMIP, with different contributions, deductibles, premium structures and means of coordination of benefits with other plans.

Plan Year: January 1 to December 31.

Prior authorization: The process of collecting information prior to all non-emergency hospital inpatient admissions and prior to the performance of selected ambulatory or outpatient procedures and services. The process permits advance eligibility verification, determination of coverage, and communication with the physician and/or member. There are two components to prior authorization: notification and coverage determination. Notification is the process of gathering basic information about proposed services before the service is rendered. Coverage determination requires provision of information regarding the clinical condition and treatment or services proposed for the member. Coverage decisions are based on nationally recognized criteria.

Prescription Drug Out-of-Pocket Maximum: A separate calendar year limit for out-of-pocket expenses on prescription drug purchases at in-network pharmacies. This is a limit separate from the out-of-pocket maximum for medical expenses. When out-of-pocket expenses for covered prescription drugs meet this limit for a participant or family, covered prescription drugs are reimbursed at 100% for the balance of the calendar year for that participant or family.

Preventive Care: Items or services rendered to prevent disease or its recurrence, which shall include:
• Evidence-based items or services that have in effect a rating of “A” or “B” in the current recommendations of the United States Preventive Services Task Force;

• Immunizations that have in effect a recommendation from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention with respect to the Covered Person involved.

• For infants, children, and adolescents, evidence-informed preventive care and screenings provided for in the comprehensive guidelines supported by the Health Resources and Services Administration; and

• For women, evidence-informed preventive care and screening provided for in the comprehensive guidelines supported by the U.S. Department of Health and Human Services Health Resources and Service Administration.

• Preventive care as prescribed by formally recognized national medical authorities in national health care policies and programs of countries outside the United States in which participants are residents.

All in-network preventive care services are first dollar benefits, meaning that no deductible, co-payment, or coinsurance will be applied, irrespective of anything herein to the contrary. Medical management techniques that are prescribed as part of a duly recognized preventive care item are covered under the RMIP.

Prior Coverage: Any plan of group medical coverage sponsored by the World Bank Group that is replaced by coverage under part or all of a new plan sponsored by the World Bank Group.

Qualifying Service: The term "Qualifying Service" means the total period of pensionable service in one or more of the appointment types to which this Rule applies.

Retired Staff Member: The term "Retired Staff Member" means a former staff member who is eligible for a pension under the Staff Retirement Plan and who is eligible to participate in the RMIP.

Retiree Plan 1/Retiree Plan 2: The terms "Retiree Plan 1" and "Retiree Plan 2" mean the two levels of benefit coverage available to Retired Staff Members under the RMIP, with different contributions and different deductibles.

RMIP: Retiree Medical Insurance Plan as effective January 1, 2017.

Spouse: Spouse, for purposes of the RMIP shall mean the individual married to the former staff member, and who is registered as a Spouse with the World Bank Group.

Staff Retirement Plan: The Staff Retirement Plan of the International Bank for Reconstruction and Development.

Skilled Nursing: A service or services that meet all of the following requirements: (i) the services require medical or paramedical training; (ii) the services are rendered by an R.N. or L.P.N. or similarly
accredited professional acting within the scope of his or her license; and (iii) the services are not custodial.

**Urgent Care Facility:** In the U.S., a facility designed to deal with conditions requiring prompt attention but not posing an immediate, serious, or life-threatening risk.

**Usual and Customary Charges:** For **in-network providers**, the fee that the provider has agreed to accept for the services or supplies furnished. For **out-of-network providers**, this is the charge made by providers for the services or supplies furnished within the same 3-digit zip code area or general area of service. For services rendered outside the U.S., the **Insurance Administrator** will use the usual and customary charge for the area of service, if known to the **Insurance Administrator**. Otherwise, the **Insurance Administrator** will use the charges made by most providers for that service in New York City (zip code 100xx). In determining a similar or comparable service, the **Insurance Administrator** may take into account the complexity of the service, the skill and specialty of the provider or the range of services supplied by a facility.
13 General Provisions

13.01 Assignment of Benefits

Except as may otherwise be required by applicable law, or as otherwise specifically provided in the RMIP, no amount payable at any time under the RMIP shall be subject in any manner to alienation by anticipation, sale, transfer, assignment, bankruptcy, pledge, attachment, charge or encumbrance of any kind, or in any manner be subject to the debts or liabilities of any person. Any attempt to so alienate or subject any such amount, whether currently or thereafter payable, shall be void. Notwithstanding the foregoing, any member may request and authorize the Insurance Administrator to pay benefits directly to a health care provider furnishing services or supplies covered under the RMIP, and any such payment, if made, shall constitute a complete discharge of the liability of the RMIP therefore.

13.02 Medical Care Decisions and Treatment

Certain of the benefits under the RMIP provide for the payment of specified health care expenses. All decisions regarding health care are solely the responsibility of each member in consultation with the health care providers selected. The RMIP contains rules for determining the percentage of allowable health care expenses that will be reimbursed, and whether particular treatments or health care expenses are eligible for reimbursement. Any decision with respect to the level of health care reimbursements, or the coverage of a particular health care expense, may be disputed by the member in accordance with the RMIP’s claim procedures. Each member may use any source of care for health treatment and health coverage as selected, and neither the RMIP nor the World Bank Group will have any obligation for the cost or legal liability for the outcome of such care, or because of a decision by a member not to seek or obtain such care, other than the liability of the RMIP for the payments of benefits as outlined herein.

13.03 No Waiver of Terms

No term, condition or provision of the RMIP shall be deemed waived, and there shall be no estoppel against the enforcement of any provision of the RMIP, except by written agreement of the party charged with such waiver or estoppel. No such written waiver shall be deemed a continuing waiver unless specifically stated therein, and each such waiver shall operate only as to the specific term or condition waived and shall not constitute a waiver of such term or condition for the future or as to any act other than that specifically waived.

13.04 Limitation of Rights

Nothing appearing in or done pursuant to the RMIP shall be held or construed to give any person any legal or equitable right against the World Bank Group or the Insurance Administrator, or any person connected therewith, except as expressly provided herein or as provided by applicable law, or to give any person any legal or equitable right to any assets of the RMIP.
13.05 Severability

If any provision of the RMIP is held invalid or unenforceable, its invalidity or unenforceability shall not affect any other provision of the RMIP, and the RMIP shall be construed and enforced as if such provision had not been included herein.

13.06 Use of Captions

The section and subsection numbers and captions used throughout the RMIP have been inserted solely as a matter of convenience and in no way define or limit the scope or intent of any provision of the RMIP.

13.07 No Oral Modifications

The terms of the RMIP cannot be modified except by means of a written amendment duly authorized and adopted by the World Bank Group. Any attempted oral modification is not binding on the World Bank Group.

13.08 Tax Consequences

The World Bank Group does not represent or guarantee that any particular federal or state income, payroll, personal property, Social Security or other tax consequences will result from participation in this RMIP. A member should consult with professional tax advisors to determine the tax consequences of participation.

IN WITNESS WHEREOF, this RMIP is hereby adopted as of this __ day of __________, 2018.

By: ____________________________________________

Director, Human Resources
Employment Policy, Compensation and Systems
Appendix A Dental Coverage

To the extent deemed advisable by the World Bank Group, this Appendix A shall constitute a separate plan providing for the provision of dental benefits. To the extent necessary, other provisions of the RMIP are deemed incorporated by reference in this Appendix A.

A.01 Dental Coverage Maximum

The maximum benefit payable for a member during a calendar year is shown in the current benefit summaries for each option, available online at www.worldbank.org/hrb for retirees and eligible family members. The calendar year maximum applies to all dental expenses except periodontal surgery (implant surgery, oral surgery, gingivectomy, gingivoplasty, alveoplasty, vestibuloplasty, osseous surgery) and orthodontia. A separate lifetime maximum benefit applies for orthodontia services. It applies to all benefits payable for orthodontia while a member is insured under the RMIP, whether the coverage was continuous or interrupted.

A.02 Covered Expenses

Covered expenses are limited to the usual and customary charges made by a dentist for medically necessary dental services provided to an RMIP member. The RMIP determines what expenses are covered. A charge for any dental care, treatment, service or supply is considered to be incurred on the date the applicable care, treatment, service or supply is received. All benefits or services must begin before RMIP coverage ends, and be installed or completed within three months following the end of a member's eligibility. Dental services provided in a hospital, at home, or in an extended care facility are covered if the patient meets medical necessity criteria as determined by the Insurance Administrator.

A.02.01 Preventive and Diagnostic Services

Covered preventive and diagnostic services include the following:

- **Routine oral exams**: Up to two exams every calendar year per member including diagnosis, and x-rays. Prophylaxis (routine dental cleaning) are covered to a maximum of four times per year.

- **Space maintainers**: Fixed or removable space maintainers for missing primary teeth.

- **Fluoride treatment**: Topical application of sodium or stannous fluoride, up to two applications every calendar year.

- **Tooth sealants**: The application of fissure sealants on unfilled permanent molars.

- **Diagnostic exploratory services**.

A.02.02 X-ray and Basic Restorative Dental Services

Covered x-ray and restorative services include:
- **Anesthesia**: General and local anesthesia (including nitrous oxide) and palliative medication (e.g., tranquilizers) administered in connection with covered dental services.
- **Endodontics**: Root canal therapy.
- **Fillings**: Including gold and composite (tooth-colored) materials.
- Injection of antibiotic drugs.
- **Oral exams**: Additional cleanings or exams (beyond two per calendar year) if medically necessary as determined by the Insurance Administrator.
- **Oral surgery**: Incision or excision procedures of the gum and tissues of the mouth when performed in connection with the extraction of the teeth or the fitting of dentures. These include but are not limited to: (i) splinting, and (ii) simple and surgical extractions including those in connection with orthodontic treatment.
- **Periodontics**: Treatment of periodontal and other diseases of the gums and tissues of the mouth, except as listed under Major Restorative Services (Section A.02.03), including but not limited to: root planing and scaling, periodontal maintenance and gingival curettage.
- **Prescription drugs**: Prescription drugs administered by a dentist in a dentist’s office.
- **X-rays**: X-rays other than those in connection with routine oral exams.

### A.02.03 Major Restorative Dental Services

Major restorative dental services include:

- **Bridges and dentures**: The initial installation of dentures or fixed bridgework.
- **Implant devices**: Posts and crowns (non-surgical expenses), inclusive of regenerative techniques.
- **Restorations**: Inlays and crowns.
- **Repair work**: Repair and re-cementing of crowns, inlays and fixed bridgework, and repair and relining of dentures.
- **Replacement work**: Replacement of existing dentures or fixed bridgework subject to limits described in Section A.03.02 and Section A.03.04. The replacement will not be covered if due to loss or theft of the denture or fixed bridgework. The replacement of bridges or dentures is not covered in the first year of the member’s coverage.

Temporary bridges and restorations are not covered for any member as these are considered inclusive to the final restoration and should not be billed separately.

### A.02.04 Special Periodontal Surgical Dental Expenses
Covered special periodontal surgical dental expenses include:

- **Anesthesia**: in association with oral surgery.
- **Other oral surgery**: if not covered under other RMIP provisions.
- **Special periodontal surgical procedures**: gingivectomy, gingivoplasty, alveoplasty, vestibuloplasty, osseous surgery, implant surgery.

A.02.05 Orthodontia Dental Expenses

**Covered expenses** include orthodontic treatment and appliances.

A.03 Dental Expenses Not Covered

A.03.01 First Year of Coverage

In the first year during which a **member** is covered by the RMIP, the RMIP does not cover:

- Replacement of existing fixed or removable bridgework.
- Replacement of full or partial dentures.
- Implants (surgical services, implants and crowns).

A.03.02 Crowns and Bridges

Crown and Bridge replacements are covered, limited to two items for the same tooth (or teeth) within a 10-year period, subject to the conditions of Section A.02.03.

A.03.03 Cosmetic Dentistry

Charges in connection with dental services primarily for the purpose of improving appearance are not covered, such as:

- Alteration or extraction and replacement of sound teeth;
- Services performed for cosmetic reasons, such as veneers, are not covered under this plan.
- Any treatment of the teeth to remove or lessen discoloration except to remove or lessen discoloration caused by an accidental injury to a natural tooth. Treatment to remove or lessen discoloration must commence within 90 days of the date of the accident.
- Replacement of congenitally missing teeth; or all appliances and restorations for the purpose of splinting teeth, except A-splinting and provision splinting in connection with periodontal treatment.

A.03.04 Dentures

Dentures are covered, limited to two within a 10-year period, subject to the conditions of Section A.02.03.
A.03.05 Expenses Incurred While Not Eligible for Coverage

The RMIP does not cover charges incurred before a member’s RMIP coverage begins or after a member’s RMIP coverage ends, unless specifically provided in this document.

A.03.06 Space Maintainers

The RMIP does not cover expenses for space maintainers other than those for missing primary teeth.

A.03.07 Not Covered Expenses

The RMIP does not cover any dental services that are not covered expenses as determined by the Insurance Administrator.

A.03.08 Services Not Performed by a Dentist

The RMIP does not cover dental services performed, furnished or ordered other than by a licensed dentist or by a licensed dental hygienist working under the supervision of a licensed dentist.

A.03.09 Services Otherwise Covered

Dental coverage excludes dental services that are covered expenses under any other part of the RMIP (e.g., oral surgery, which is a medical expense).

A.03.10 Temporary Restoration of Dentures, Crowns, or Bridges

The RMIP does not cover temporary restoration such as partial dentures, crowns or bridges, as these are considered inclusive to the final restoration and should not be billed separately.
Appendix B Vision Coverage

To the extent deemed advisable by the World Bank Group, this Appendix B shall constitute a separate plan providing for the provision of vision benefits. To the extent necessary, other provisions of the RMIP are deemed incorporated by reference in this Appendix B.

B.01 Covered Expenses

Covered expenses are limited to the usual and customary charges made for medically necessary vision services provided to an RMIP member. The RMIP determines what expenses are covered.

Covered services include the following:

- One routine eye exam, including refraction, per calendar year per member.
- Up to US $200 every two Plan Years per member for prescription contact lenses and prescription eyeglass lenses and frames. In addition to the eye exam referenced in this Section B.01, screenings (where appropriate) for cataracts and/or diseases of the eye are covered as a preventive care benefit under the RMIP.
  - The two-Plan-Year period refers to the calendar years.
  - If the member does not use the benefits over a 2-year period, the $200 benefit does not “roll over” or accumulate to the next 2-year period.
  - This limit does not apply to the first pair of glasses or contact lenses following cataract surgery. The first pair of glasses or contact lenses following cataract surgery is covered at the otherwise applicable in-network or out-of-network coverage level.

B.02 Vision Expenses Not Covered

B.02.01 Eye Tests

The RMIP does not cover eye tests, except for the annual routine eye exam provided for in Section B.01.

B.02.02 Surgery to Treat Myopia

The RMIP does not covered radial keratotomy or similar surgery to treat myopia (including laser surgery).

B.02.03 Charges for Fitting Contact Lenses

The RMIP does not cover charges for fitting contact lenses except as provided in Section B.01.

B.02.04 Expenses Incurred While Not Eligible for Coverage
The RMIP does not cover charges incurred before a member’s RMIP coverage begins or after a member’s RMIP coverage ends, unless specifically provided in this document.

B.02.05 Not Covered Expenses

The RMIP does not cover any vision services that are not covered expenses as determined by the Insurance Administrator.

B.02.06 Services Not Performed by an Optometrist or an Ophthalmologist

The RMIP does not cover vision services performed, furnished or ordered other than by a licensed optometrist or ophthalmologist. As such, services provided by an optician are not covered.

B.02.07 Services Otherwise Covered

Vision coverage excludes vision services that are covered expenses under any other part of the RMIP (e.g., the diagnosis, treatment and monitoring of an eye disease, illness or injury, which is covered as a medical expense).
Appendix C: Calculation of Retiree Premiums

The cost to Retired Staff Members of participation in the RMIP is determined periodically by the World Bank Group based on net plan costs and the criteria set forth in the paragraphs below.

Net plan costs consist of the total cost of allowed medical, dental and prescription drug claims, less (i) savings from coordination of benefits from other insurance (including Medicare and other National Health Plans); (ii) rebates and subsidies accruing to the prescription drug plan; and (iii) members' out-of-pocket payments (deductibles, co-payments and coinsurance). Net plan costs also include reimbursement of applicable Medicare premiums (see C.03 below), and administration and other fees. The unsubsidized premiums for RMIP1 and RMIP2 are set to cover these costs, with an actuarial adjustment to reflect RMIP1's higher costs due to its higher benefit level. The unsubsidized premiums also become the premiums for continuation coverage under RMIP1 or 2. Table C.1 (at end of this appendix) shows these figures for 2018. The criteria for participation in RMIP1 and RMIP2 are described in detail in Section 02.01 of this document. The following paragraphs describe how the subsidy from the Bank, and the premium paid by the member, are calculated under the two different plans.

C.01 Retiree Plan 1

C.01.01 RMIP1 Subsidy and Contribution Base

The average premium for members of Retiree Plan 1 as a group is set at 25% of the monthly unsubsidized RMIP1 premium described above, with the World Bank Group providing a subsidy for the remaining 75%. Thus, for every dollar RMIP1 members as a group pay as premiums, the World Bank Group pays three dollars. This average premium is then adjusted for the individual retiree's “Contribution Base”, so that those who had higher final net salaries pay a higher than average monthly premium, reducing the financial burden for those who had lower final net salaries. Each Retired Staff Member in Plan 1 is assigned to one of four “brackets” (“A” through “D”) based on his or her Contribution Base. Premiums rise from bracket A to D (with C approximately equal to the average premium). The “Plan 1 Premium” row of Table C.1 (at end of this Appendix) shows monthly RMIP1 premiums for 2018 by bracket and type of coverage.

A Retired Staff Member's Contribution Base is based on final net salary and on whether he or she retired early, his or her age at the end of service and his or her years of pensionable service under the Staff Retirement Plan, as set forth below:
<table>
<thead>
<tr>
<th>Type of Retirement</th>
<th>Age at End of Service</th>
<th>Years of Pensionable Service or Age + Years of Pensionable Service</th>
<th>Contribution Base</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>62 or later</td>
<td>10 or more</td>
<td>75% of final net annual salary</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Less than 10</td>
<td>Final net annual salary</td>
</tr>
<tr>
<td>Early</td>
<td>55 but less than 65</td>
<td>Age + years of service = 75 or more</td>
<td>75% of final net annual salary</td>
</tr>
<tr>
<td></td>
<td></td>
<td>10 or more</td>
<td>Final net annual salary</td>
</tr>
<tr>
<td></td>
<td>50 to 55</td>
<td>Age + years of service = 75 or more</td>
<td>75% of final net annual salary</td>
</tr>
</tbody>
</table>

**C.01.02 RMIP1 Contribution Base for Orphaned Children and Subsidy Information for Surviving Spouses / Domestic Partners**

Orphaned children who participate or are eligible for participation in RMIP1 will automatically be classified under the least expensive contribution bracket until the end of the month in which they reach age 26, unless eligible as a disabled dependent.

Eligibility and subsidy information for surviving spouses / domestic partners is discussed in section 02.04.01.

**C.01.03 RMIP Contributions for Retirees Eligible to Buy-Up from Retiree Plan 2 to Retiree Plan 1.**

Members in eligibility group B as set forth in Section 2.01.01 may elect to enroll in Retiree Plan 1. The cost of coverage for this group under Retiree Plan 1 will be equal to the otherwise applicable cost of coverage for each member under Retiree Plan 2 plus an additional dollar amount set by the World Bank Group reflecting the higher cost of RMIP1’s benefit structure.

**C.02 Retiree Plan 2**

**C.02.01 RMIP2 Subsidy**

The premium charged to members in Retiree Plan 2 is based on the monthly RMIP2 unsubsidized premium described above, minus a subsidy from the World Bank Group.

The subsidy is equal to 4% of the cost of coverage times the retiree’s total years of pensionable service, less 3% of the cost of coverage times the number of years by which the retiree’s age preceded 62 when the retiree elected to begin coverage under the RMIP. In no event, however, will
a member’s subsidy exceed 75% of the cost of coverage. These provisions are reflected in the “Plan 2 Premium” row of Table C.1 at the end of this Appendix.

Example: The subsidy provided for a staff member who retires at age 52 with 20 years of pensionable service is calculated as follows:

1) Subsidy at 4%/year for 20 years of service: \( (.04 \times 20) = 80\% \)
2) Early retirement reduction at 3%/year for 10 years < age 62: \( (.03 \times 10) = 30\% \)
3) Calculate the subsidy reduction: \( (.80 \times .30) = -24\% \)
4) Total subsidy provided by the Bank (capped at 75%): \( (.80 - .24) = 56\% \)

In the event of a death in service, the World Bank Group provides coverage for the surviving spouse/domestic partner for life through RMIP 2. The amount of the subsidy will vary depending on the years of service of the staff member at the time of death, with a minimum 25% subsidy and a maximum 75% subsidy. There will be no reduction of the subsidy for early retirement. Orphaned children who participate or are eligible to participate in RMIP2 will receive a 75% subsidy of their RMIP 2 premium until the end of the month in which they reach age 26, unless eligible as a disabled dependent.

If a deceased staff member would have been eligible to buy up to Retiree Plan 1, then the surviving spouse/domestic partner will have the same opportunity.

C.03 Premium Reimbursements or Discounts for Participants in National Health Programs

Members of both Plan 1 and Plan 2 who participate in a national health program are eligible for reduced premiums under Section 10.02.02 of this RMIP SPD, and will be eligible for the following reimbursements or premium reductions:

(a) Enrollment in U.S. Medicare Part A: no premium reimbursement or discount since RMIP does not require any member to participate in Part A if they are required to pay a premium.

(b) Enrollment in U.S. Medicare Part B: Reimbursement of the standard Part B premium and the Income Related Monthly Adjustment Amount (IRMAA) if any.

(c) Enrollment in U.S. Medicare Part D: Reimbursement of the IRMAA (if any).

(d) Enrollment in a non-U.S. National Health Plan: 40% premium discount for individual coverage or 20% per participant for dual or family coverage.
TABLE C.1: RMIP PREMIUM SCHEDULES

The following premium schedule applies to retiree contributions to the Retiree MIP. Each amount is monthly. This schedule is effective January 1, 2018.

*Defined preventive care services will be provided at 100% when an In-Network Physician or facility is used. Defined preventive services are determined by gender and age and recommendations may change from time-to-time. Always check with the Insurance Administrator for the most recent recommendations provided separately from this general overview and discuss them with your doctor.

For U.S. prescription drug coverage, please refer to the pharmacy benefits section of the RMIP Plan 1 Summary for HQ Staff. All other purchases of prescription medications are covered under the medical plan and claims should be filed with Cigna.

Note: For International Option participants, the U.S. pharmacy benefit manager will send a record of U.S. network pharmacy purchases to Cigna after the end of the plan year for reconciliation. International Option participants who met their medical out of pocket maximum and who also had U.S. pharmacy out of pocket expenses during the same plan year will receive reimbursement for the out of pocket U.S. pharmacy costs from Cigna after reconciliation.
