Agenda

- The accounting reform
- The information system objectives
- The approach to choose the IT solution
- The IT solution ecosystem
- The modernization plans & future directions
- The Key Factors of Success

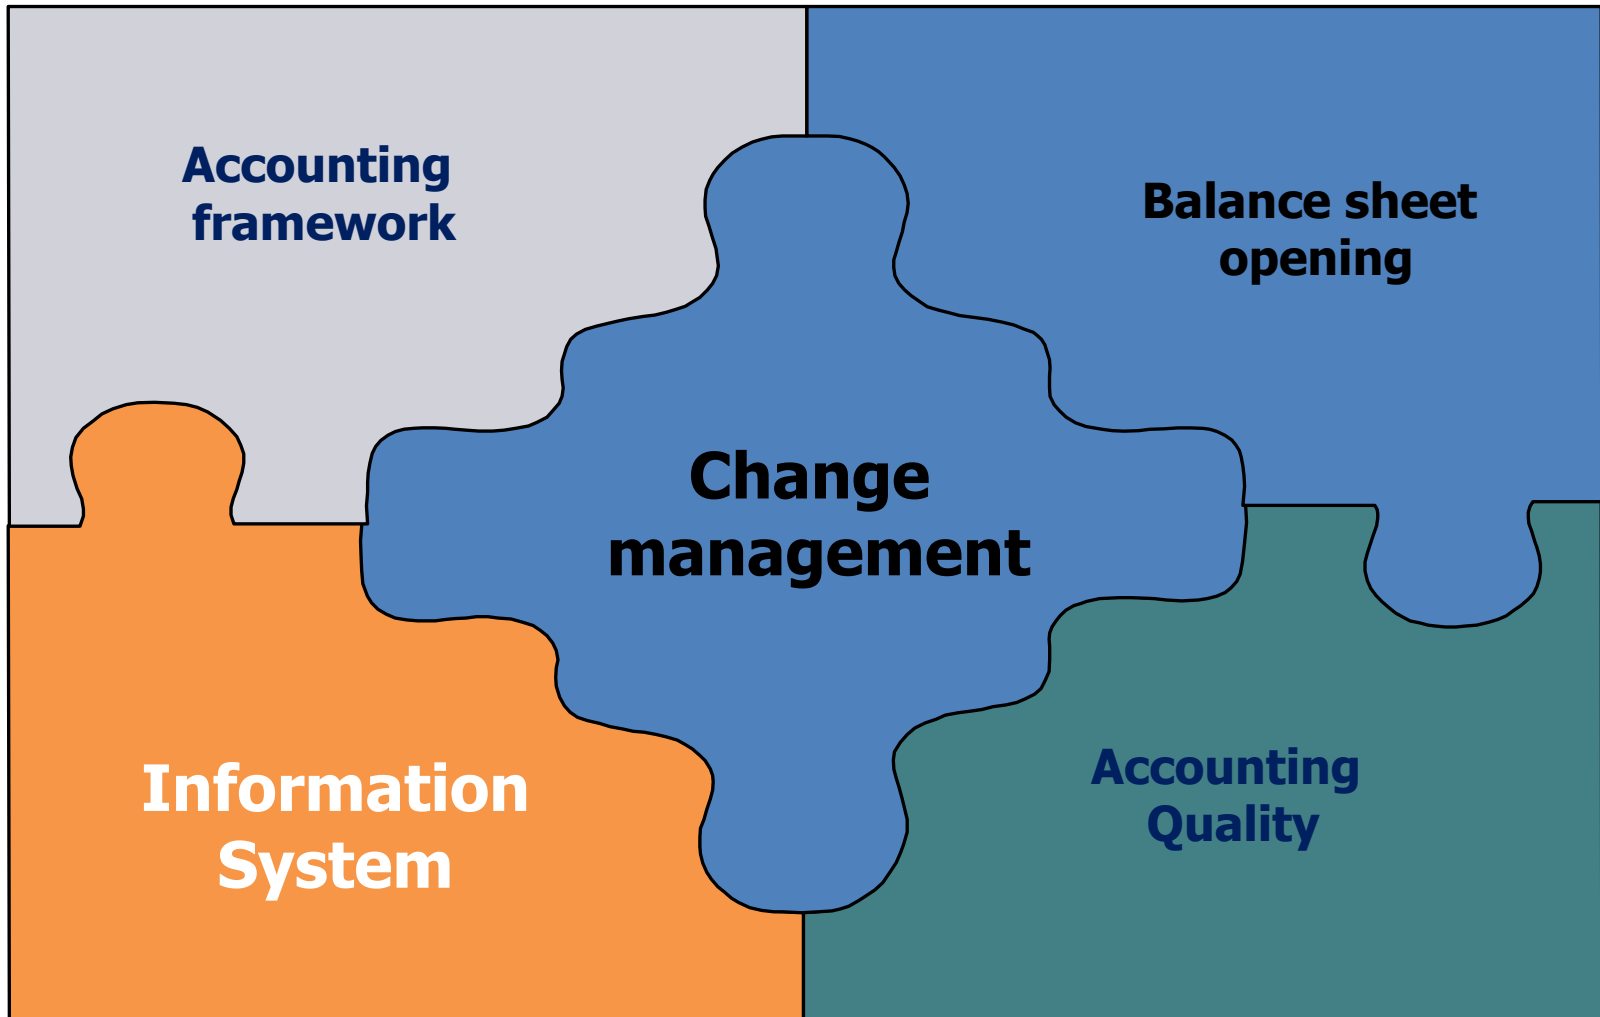

The accounting reform

The accounting reform is a national and multidimensional project

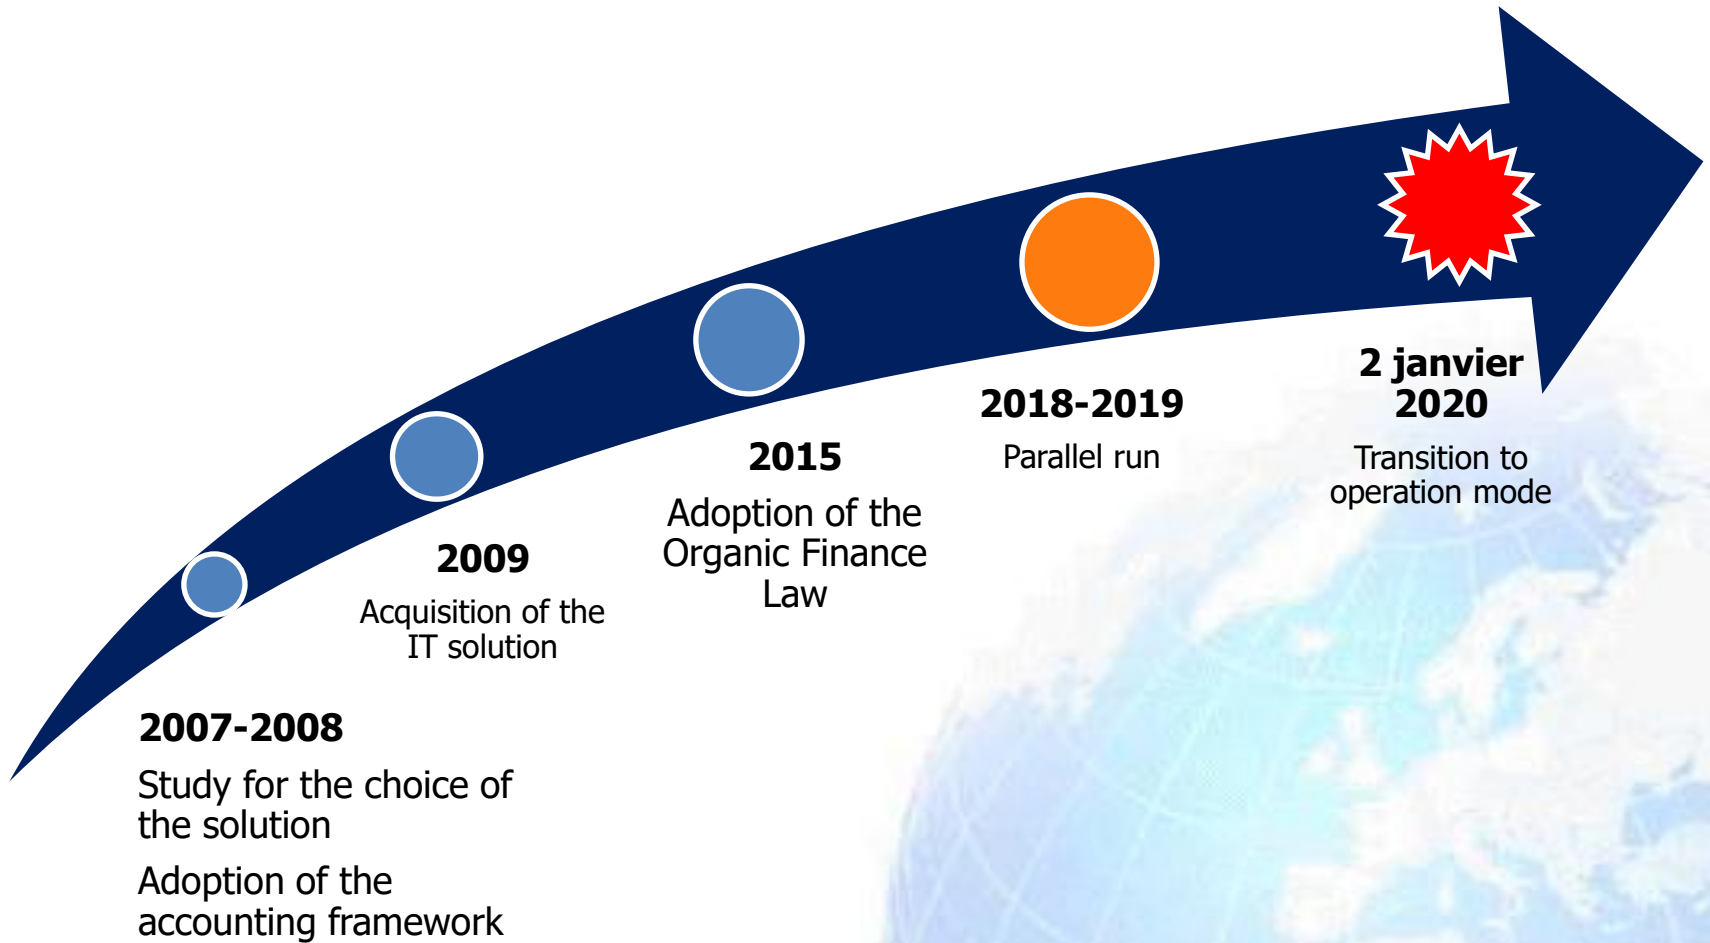

Inspired by international norms and standards (IPSAS)

The accounting reform

The accounting reform is a multidimensional project

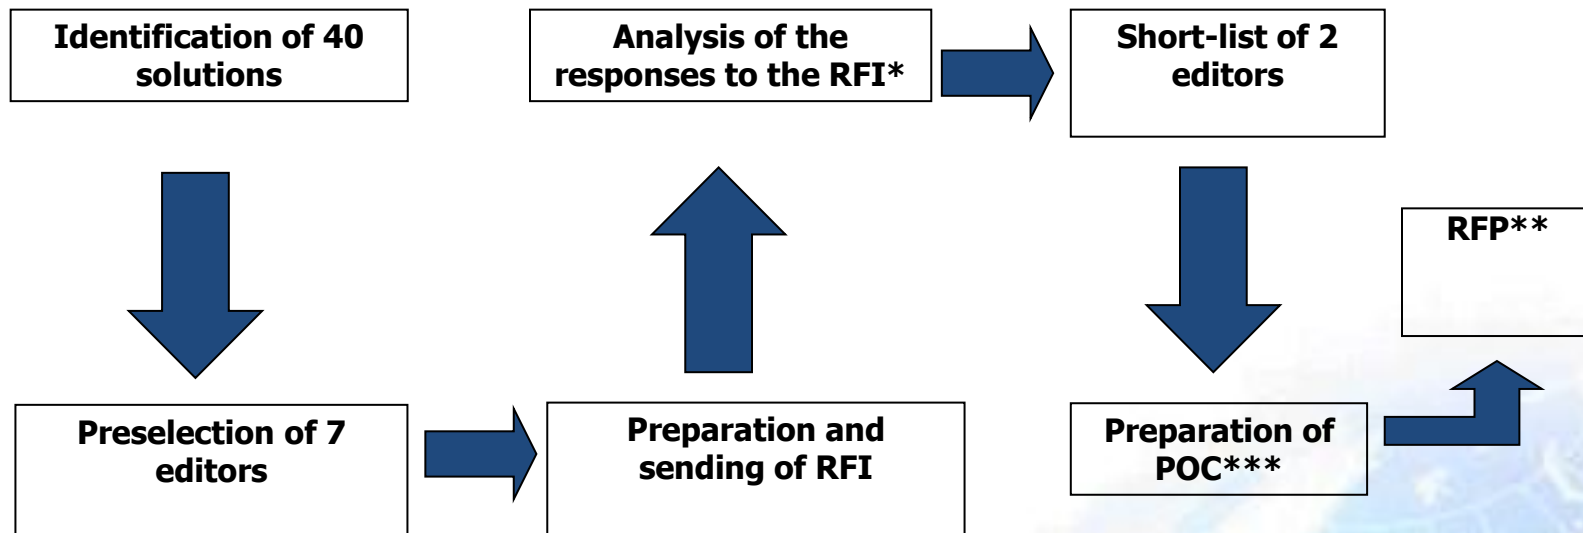

The reform implementation plan

The information system objectives

- Trace in a faithful and exhaustive manner all of the State's operations, despite their complexity and the importance of their volume
- Produce reliable, relevant and rapid accounting and financial information
- Facilitate the control of state finances
- Introduce the patrimonial vision into State accounting
- Streamline public cash management

A client-centric approach to choose the IT solution

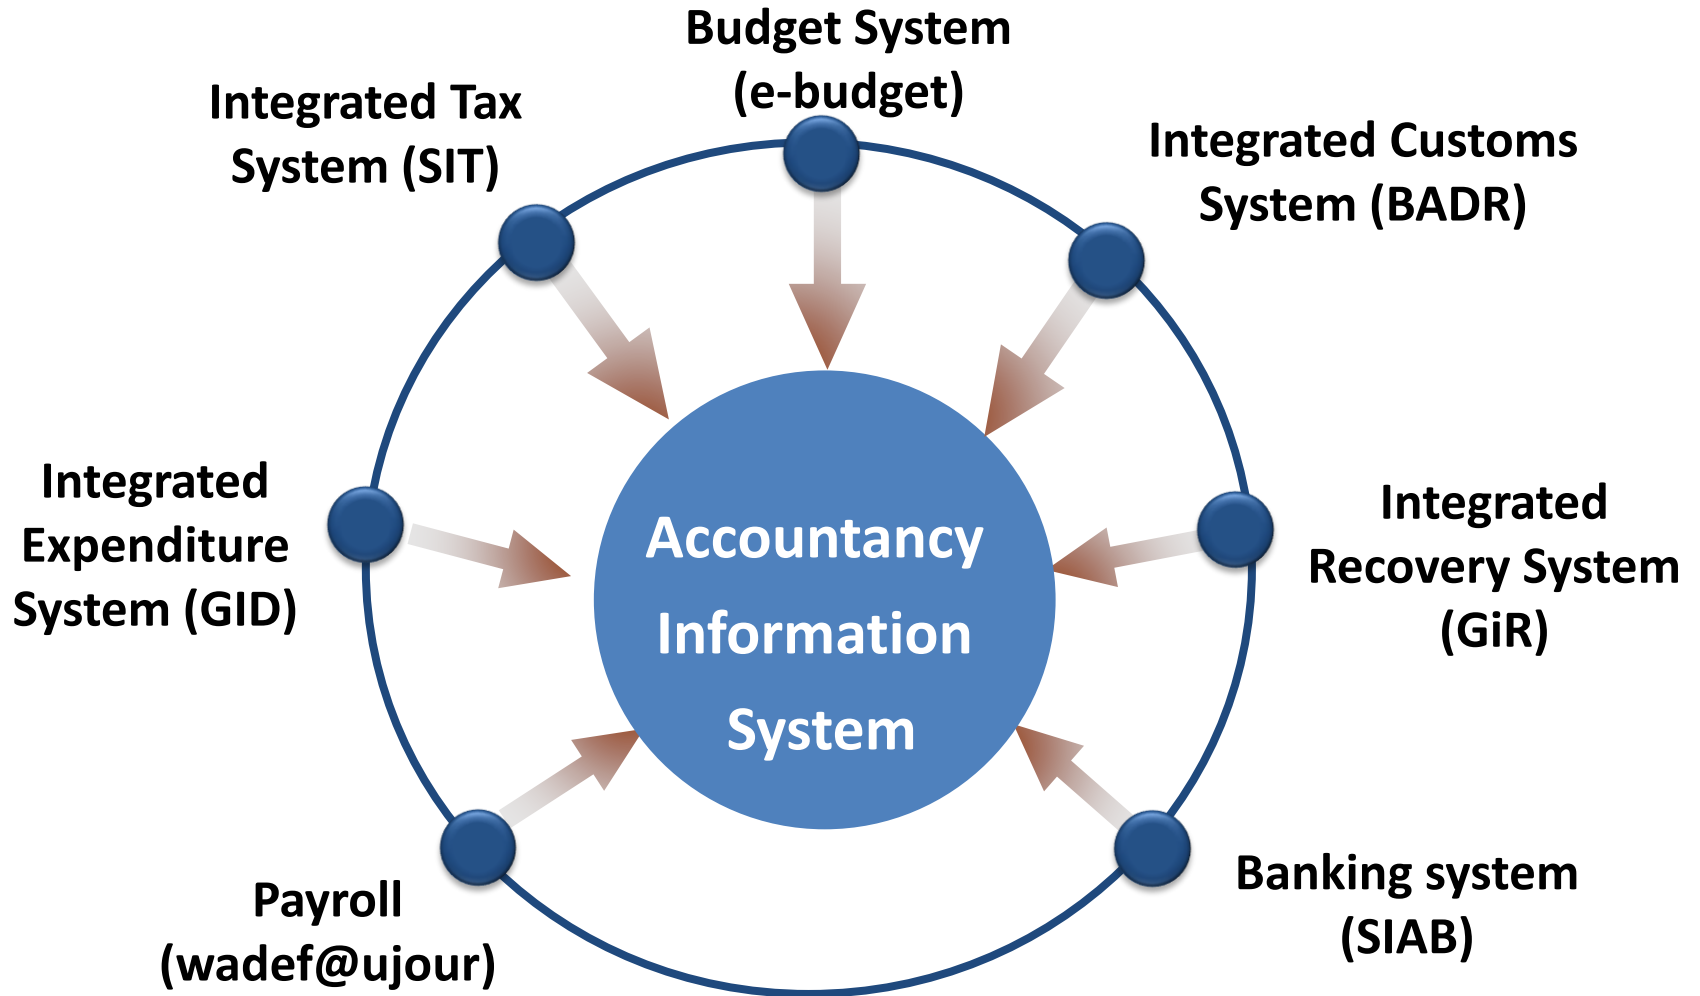

*RFI : Request For Information

**RFP : Request For Proposal

*** POC : Proof Of Concept
