ABOUT THE LAB

The Pakistan Data and Evidence Lab generates and disseminates evidence to support Pakistan's long-term development goals, aligned with the World Bank Pakistan Country Partnership Framework (CPF) for 2025–2035.

THREE CORE PILLARS

01

Monitoring
Outcomes

02

Data as a
Public Good

03

Impact
Evaluation

01

Monitoring Outcomes for Smarter Decision Making

- Enhancing Monitoring and Evaluation Systems
- Real-Time Goal Setting
- High Frequency “Listening to Pakistan” Surveys

02

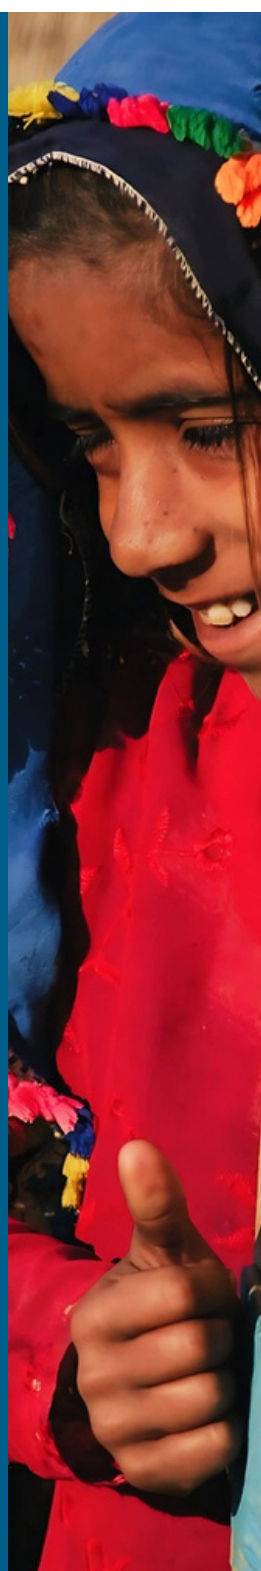

Data as a Public Good Unlocking the Power of Data for Development

- Improving Data Accessibility
- Connecting Data Sources
- Strengthening Institutional Capacity

03

Measuring What Works: Impact Evaluations for Progress

- Rigorous Evidence on Impact to inform Evidence-based policy
- Evaluation Embedded in Project Design
- Gender & inclusion focus Rapid Follow up for Operationally Relevant Insights

Collaboration across the three pillars ensures a unified approach to addressing Pakistan's development challenges and maximizing impact through integrated data-driven solutions.

PARTNERSHIPS & COLLABORATION

- Pakistan Bureau of Statistics
- Provincial Bureaus & Line Departments
- Academic Institutions & Think Tanks
- Development Partners & Donor Agencies
- World Bank Operational Teams

ENGAGEMENT & UPTAKE

Beyond data collection, the Data and Evidence Lab focuses on driving evidence uptake through:

- Briefings for policymakers and project teams
- Technical workshops and design clinics
- Policy conferences and academic forums
- Public release of datasets and tools for broader use
