This infographic contains key figures from the 2022 Joint Report on Multilateral Development Banks’ Climate Finance. For greater transparency and consistency, the 2022 figures report climate finance in all economies where the MDBs operate, with a breakdown by income level.

The report and infographic were prepared by the European Investment Bank, together with the African Development Bank, the Asian Development Bank, the Asian Infrastructure Investment Bank, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Inter-American Development Bank Group, the Islamic Development Bank, the New Development Bank and the World Bank Group.

This November 2023 publication of the infographic (Version 1.1) supersedes the earlier edition published in October 2023. Version 1.1 introduces corrections to climate co-finance information, plus a small climate mitigation finance adjustment.
In 2022, the multilateral development banks (MDBs) listed below committed a total of $60.916 billion to low- and middle-income economies, and $38.802 billion to high-income economies.
