

PROJECT SUMMARY

Pakistan

PROJECT NAME

Strategic Support for Energy Efficiency

GRANT OBJECTIVE AND ACTIVITIES

The project is building the capacity of the National Energy Efficiency and Conservation Authority (NEECA) to effectively deliver on its mandate. It is facilitating knowledge sharing on demand side energy efficiency (DSEE) among stakeholders and providing technical expertise on DSEE policies and frameworks relating to appliance standards and energy labeling certification. It also supports the creation of a Roadmap for Energy Efficiency and Conservation which feeds into NEECA's three-year business plan as well the design of a programmatic investment strategy for DSEE. By mapping current and planned donor and government initiatives focused on EE, the project avoids overlaps in interventions. Pakistan is a member of the [NDC Partnership](#).

COUNTRY FOCAL POINTS

National Energy Efficiency and Conservation Authority, Ministry of Climate Change
