

# PROJECT SUMMARY

## Mozambique

### PROJECT NAME

Adaptation Investment Framework and Improving MRV for NDC

### GRANT OBJECTIVE AND ACTIVITIES

The project is focused on addressing the challenges identified in Mozambique's National Climate Change Adaptation and Mitigation Strategy, REDD+ Strategy and Mozambique's Nationally Determined Contribution. It is helping the Government of Mozambique, a member of the [NDC Partnership](#), strengthen its technical, institutional and coordination capacities to improve target setting and monitoring. There are two components to the project: development of an NDC implementation Roadmap, with specific targets and actions for the Agriculture, Rural Development and Forestry, Fisheries, Energy, Transport, Disaster and Risk Management sectors. Likewise, the project supports the operationalization of Mozambique's GHG Inventory.

### COUNTRY FOCAL POINTS

National Sustainable Development Fund (FNDS), National Directorate of Environment (DINAB), National Designated Authority (NDA) for Climate Finance

### WORLD BANK GROUP PRACTICE

-  Environment and Natural Resources
-  Agriculture
