

# Tuvalu

Tuvalu is the fourth smallest country in the world, with a population of 11,000. The World Bank's support to Tuvalu aims to strengthen transport infrastructure, improve digital connectivity and education, and increase access to sustainable and renewable energy.

- Transport
- Digital Development
- Education
- Trade & Investment
- Environment & Natural Resources
- Energy & Extractives

## Transport

The Pacific Aviation Investment Program has delivered major reconstruction works to airports and runways in Funafuti, connecting Tuvalu to the rest of the world and helping to make air travel safer and more efficient across the Pacific.

## Energy & Extractives

The Tuvalu Energy Sector Development Project is helping to enhance the country's energy security by reducing its dependence on imported fuel for power generation, by improving the efficiency and sustainability of its electricity system, and by helping Tuvalu achieve 40% renewable energy usage.

## Education

The Tuvalu Learning Project is supporting early education and literacy by engaging parents and communities, and by strengthening teaching at preschool, primary and secondary levels.

## Digital Development

Through the Telecommunications and ICT Development Project, Tuvalu is expected to have faster, cheaper and more reliable internet. With support from the World Bank, new investments in a submarine cable are being delivered through a public-private partnership.

## Current Projects

- Pacific Aviation Investment Program
- Maritime Investment in Climate Resilient Operations
- Telecommunications and ICT Development Project
- Tuvalu Learning Project
- Tuvalu First Resilience DPO
- Pacific Islands Regional Oceanscape Program
- Energy Sector Development Project
