

# Indonesia

## Catalyzing Optimum Management of Natural Heritage for Sustainability of Ecosystem, Resources and Viability of Endangered Wildlife Species (CONSERVE)

### Project Sites

Ulu Masen Landscape – Aceh Province, Seblat Landscape – Bengkulu Province, Moyo Island Landscape – West Nusa Tenggara Province.

**Species Focus** Sumatran elephants, Sumatran tigers, yellow-crested cockatoos

**Grant Amount** \$6.3 million

### Executing Partner

Ministry of Environment and Forests, Directorate General of Natural Resources Conservation and Ecosystem

**GEF Implementing Agency** UNDP

### Government Contact

Indra Exploitasia ([exploitasia@yahoo.com](mailto:exploitasia@yahoo.com))

### Agency Contacts

Iwan Kurniawan ([iwan.kurniawan@undp.org](mailto:iwan.kurniawan@undp.org));  
Muhammad Yayat Afianto ([muhammad.afianto@undp.org](mailto:muhammad.afianto@undp.org))

### Expected Start Date

October-December 2021

### Context

Indonesia is one of the most biodiversity rich regions in the world and supports many mammal and bird species including endemic and endangered species. Increased degradation of natural habitats from deforestation and conversion to oil palm plantations, forest concessions, coal mining and agricultural expansion and climate change is becoming an ever-increasing threat to critical habitats and ecosystems and biodiversity. This has great impact on large threatened species, such as the Sumatran elephant, Sumatran tiger and yellow-crested cockatoos. The project's intervention is to ensure that existing protected areas and area-based conservation measures (OECMs) are managed to support viable populations of globally threatened species

**Objective** Strengthen management of multiple use landscapes to enhance biodiversity conservation, generate sustainable land-use and livelihood practices, and address illegal wildlife trade.

### Project Components

- Strengthened management and protection of multiple use landscapes for the conservation of key threatened species.
- Enhanced site-based enforcement and monitoring of sustainable use of wildlife resources.
- Improved private sector and community engagement and diversified financing for biodiversity conservation across the selected landscapes.
- Upscaling/replication of project approaches at national and regional level.
