

PROJECT SUMMARY

Zimbabwe

PROJECT NAME

Mainstreaming Climate Change Implementation in Public Investment Management (PIM) and Capital Budgeting

GRANT OBJECTIVE AND ACTIVITIES

The project will support the government of Zimbabwe, a member of the [NDC Partnership](#), to strengthen and extend the public investment management (PIM) system to inform implementation of its NDC. To accomplish this, the project will assist the development of a NDC implementation Plan and Roadmap through a two day workshop with a broad range of stakeholders, followed by sectoral consultations. Additionally, the project will assist the government in mainstreaming climate change into planning and budget by amending PIM guidelines to include provisions for climate resilient infrastructure. Pre-feasibility studies will then be developed for at least two projects in each sector identified as a priority from the sectoral consultations. This project is being supported through the NDCP Climate Action Enhancement Package (CAEP)
