

Alliance for Hydromet Development

- **Purpose**

- **Scale up** and **unite** efforts to close the hydromet capacity gap by 2030
- **Members:** World Bank, GCF, AfDB, ADB, IsDB, WFP, UNDP, UNEP, WMO – open architecture

- **Commitment to**

- strengthening **capacity** for sustained operation of **observational systems** and **data exchange**
- seeking innovative ways to **finance developing country observations**, incl. creation of SOFF
- strengthening **capacity** for science-based mitigation action, **adaptation planning** and **impact-based forecasting**
- working towards common **standards** for **climate-proofing investments** in key sectors
- promoting **coherent** and **science-based MHEWS**, taking advantage of CREWS
- fostering **programmatic approaches** that go beyond individual projects
- leveraging financial resources and expertise from the **private sector**
- underpinning finance with the **best technical expertise**, including from **WMO CSI**
- **tracking** progress through joint regular **Hydromet Gap flagship** reports, incl. **benchmarking**
