

Improving Plastics Management

Innovation by the people toward less plastic and better management

Waste is a complex development challenge

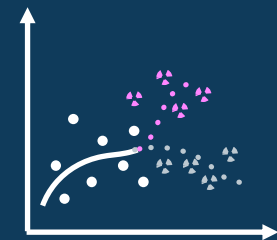

Driven by multiple factors

Interlinkage across the process and sectors of waste management

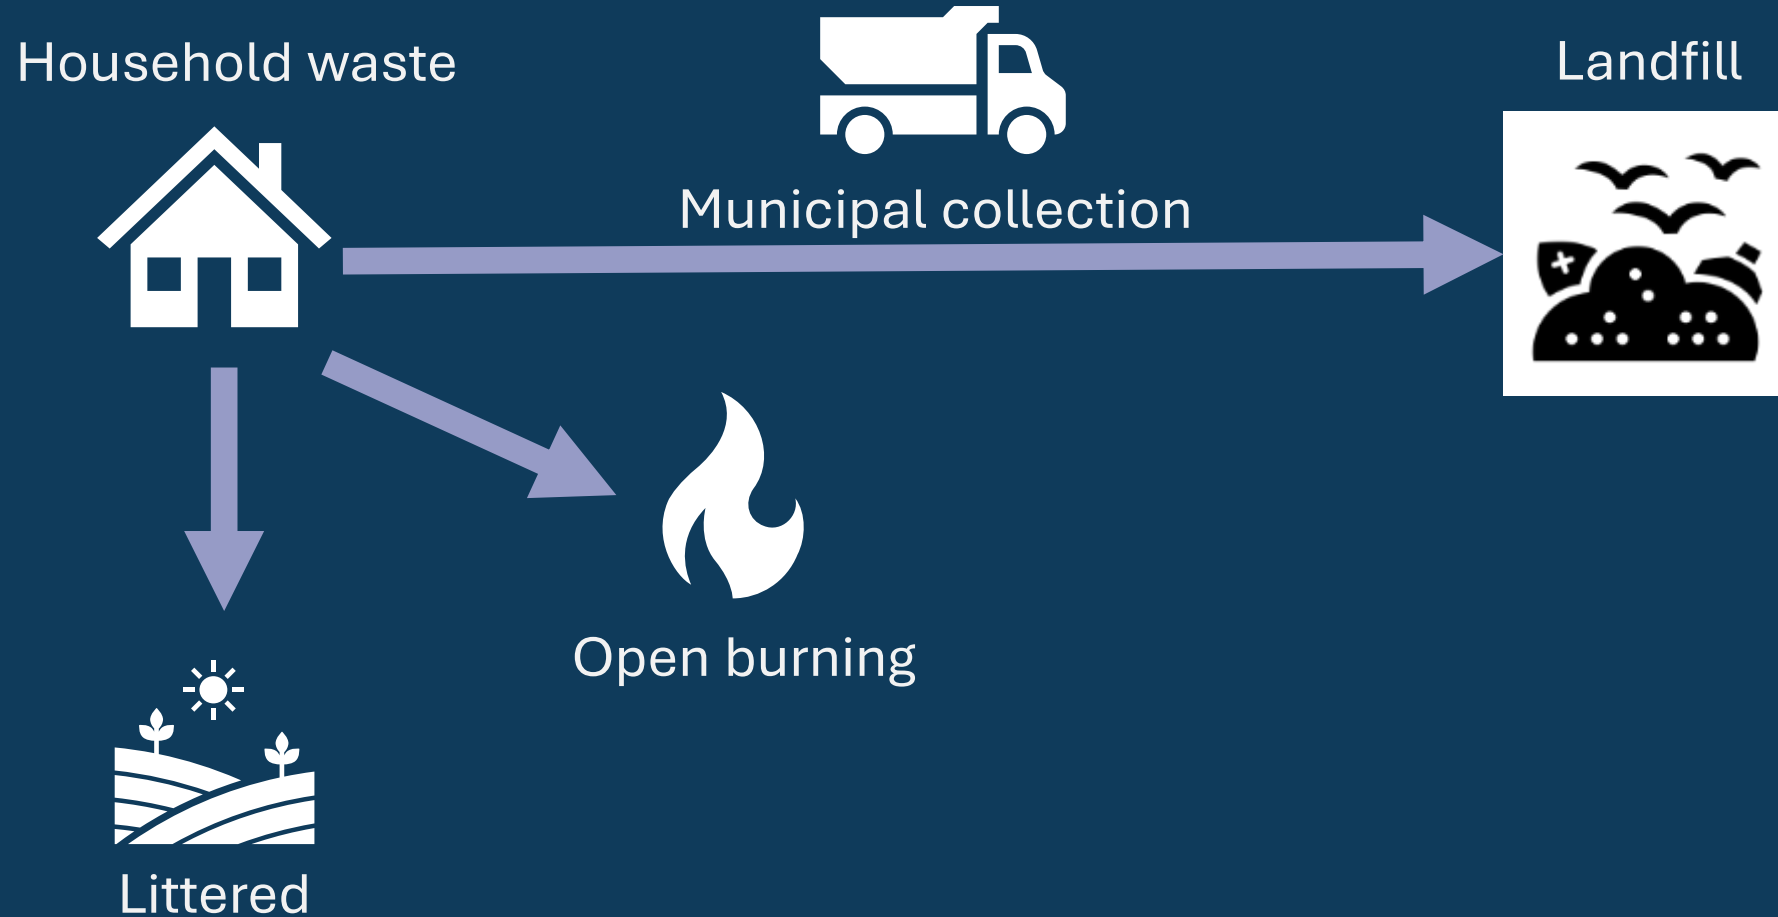

Entangling relationship & power dynamics in the ecosystem

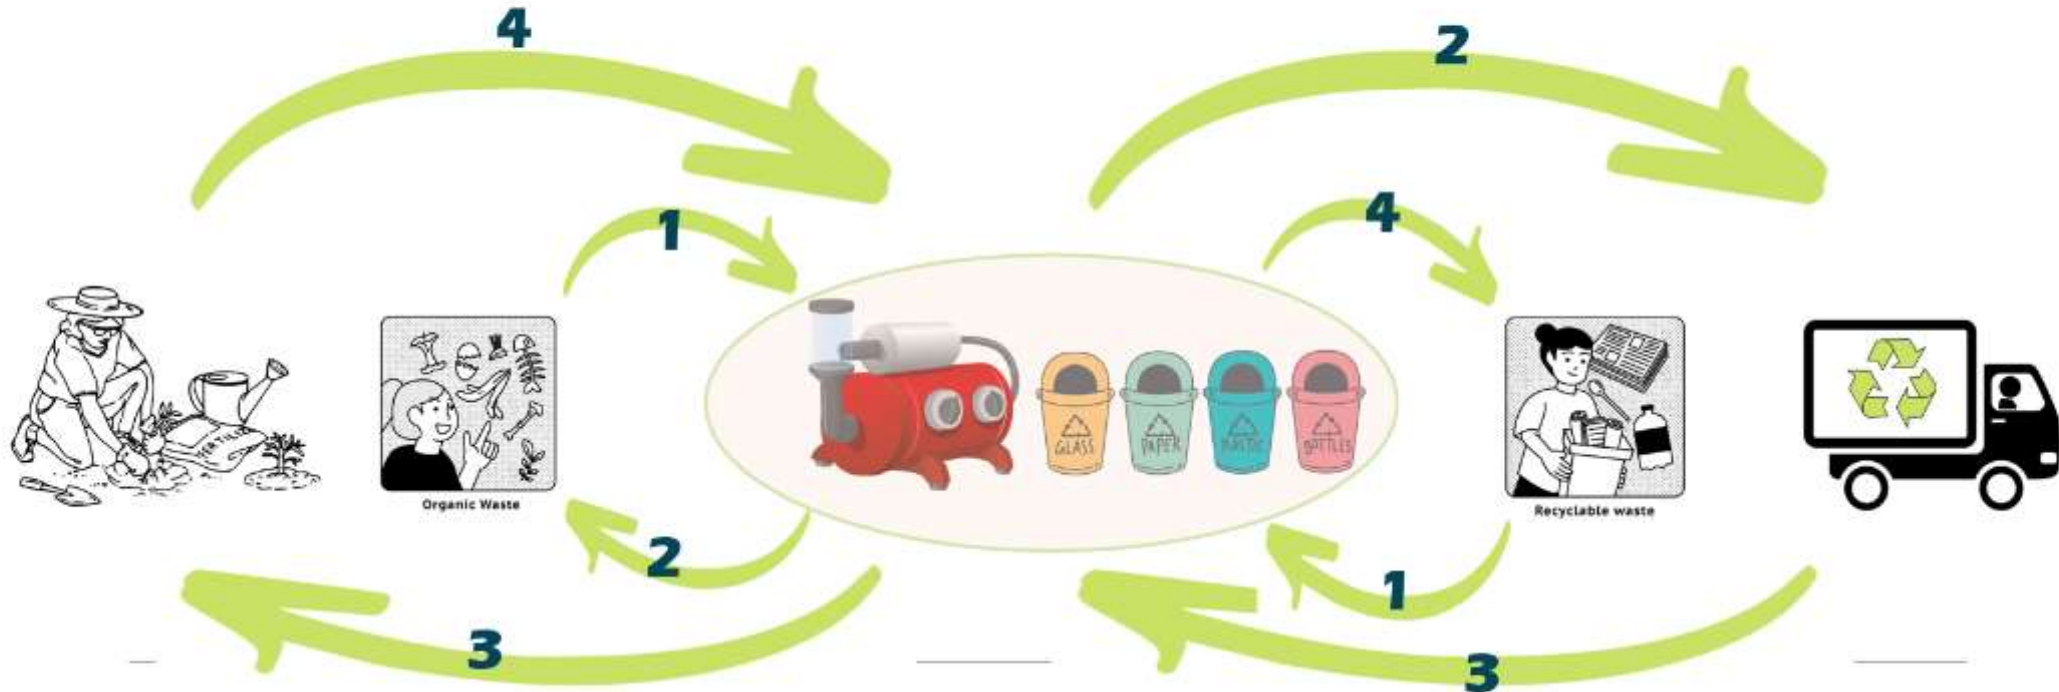

Uncertainty in the development trend

Linear waste (mis)management

New Community waste Management Concept

Principle of Virtuous Circular management of waste

1. Food waste
2. Discounted gas - payment
3. Fertilizer/Compost
4. Payment to Zero Waste Committee

1. Recycle waste
2. Selling Recycle waste to Wongpanith
3. Payment to Zero Waste Committee
4. Coupon to citizen

User centered facilities and tools

From UNDP Vietnam

From UNDP Lao PDR

Using people centered design approach for facilities and to create tools that will be better adopted by the villagers

Empowered champions

Sensing
Design
Testing

From UNDP Philippines

Using indigenous knowledge and existing community KP structure

ation and to have a more sustainable

Empowering local innovators
