Vietnam Country Partnership Framework FY23-27

Consultations with stakeholders

March 2023

WORLD BANK GROUP

Context

Remarkable economic growth and poverty reduction over the past decades.

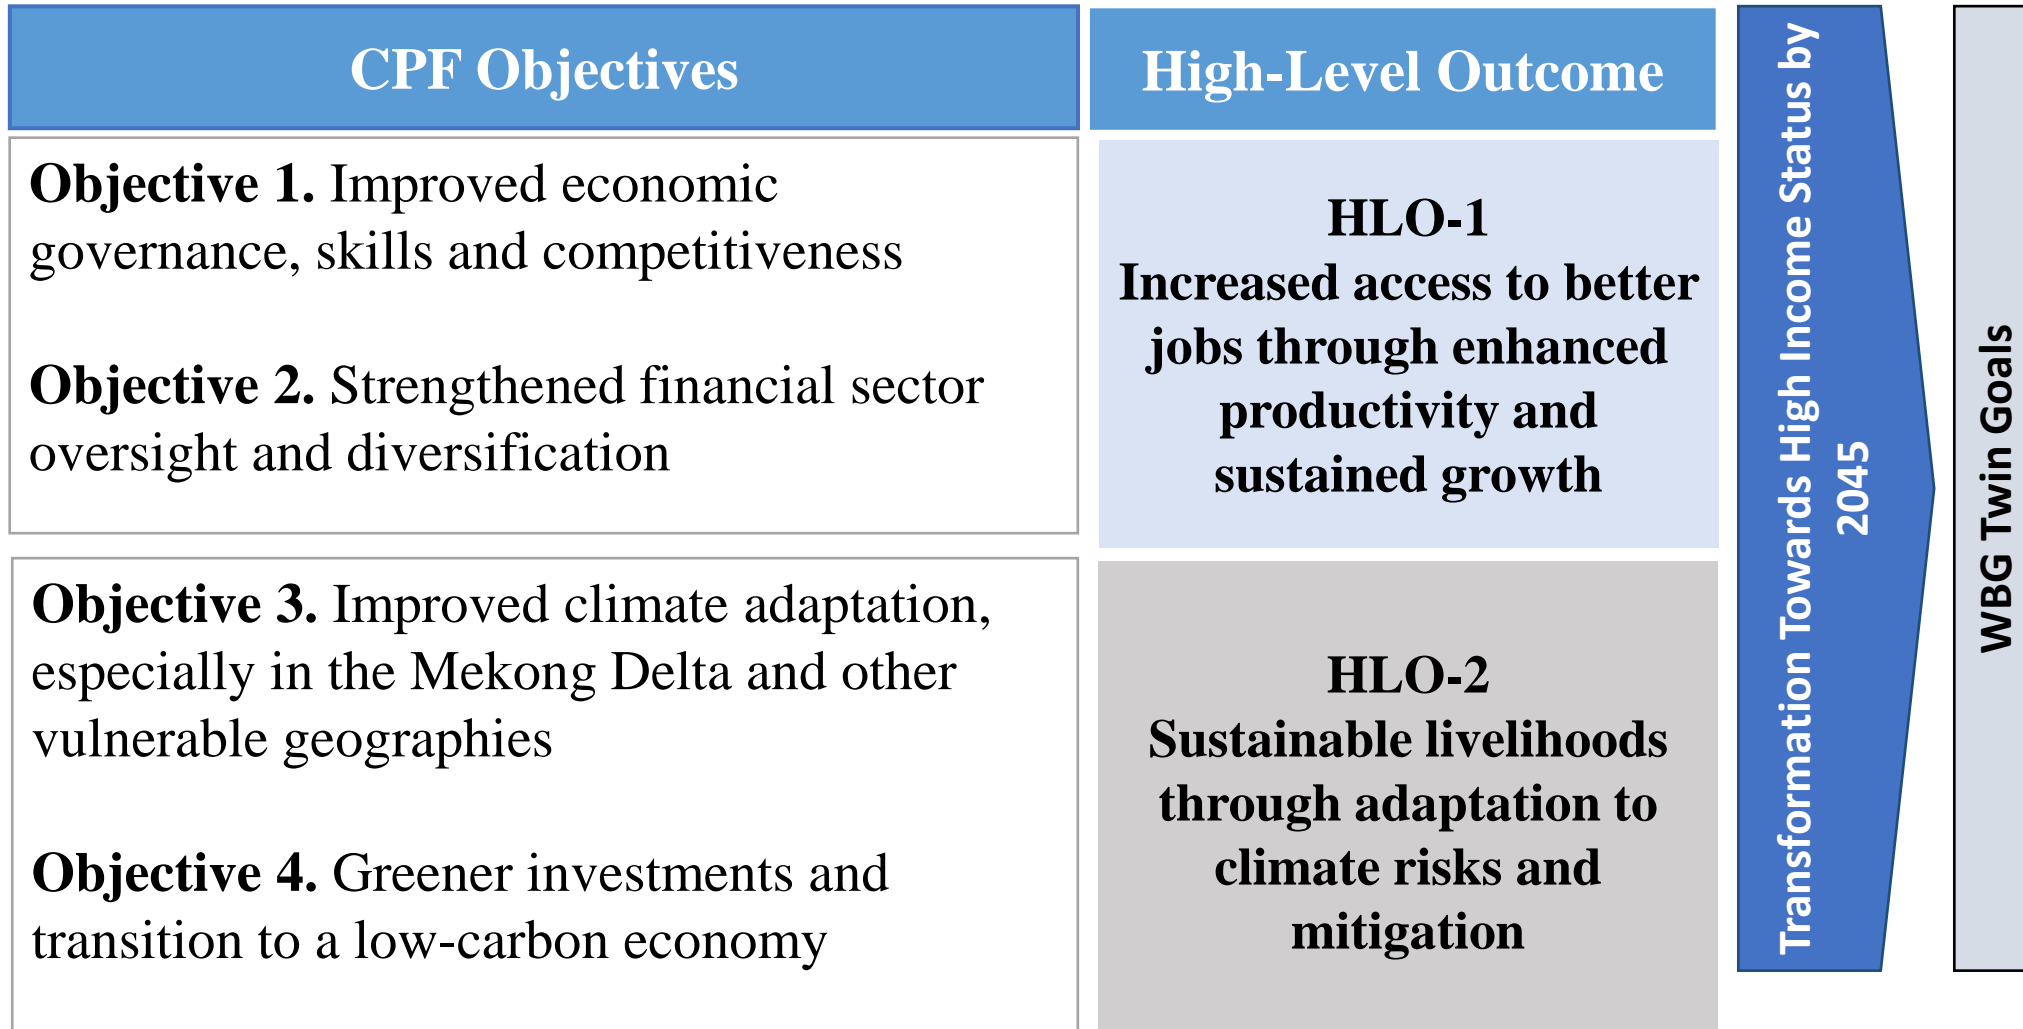

Nevertheless, constraints to transition to productivity-led growth and high-income status exist, including climate change and foundations for long-term growth.

The WBG offers solutions to the development challenges through financial and advisory support and mobilizing the private sector.

A strong partnership in the past three decades with US \$25.2 billion of sovereign lending since 1994 and over \$10 billion support to the private sector.

Proposed structure of CPF

WBG Country Partnership Framework for Vietnam FY23-27

QUESTIONS FOR DISCUSSION

- 1. Does the proposed CPF framework resonate with the country's development challenges and priorities?**
- 2. How do you see the role of the WBG in helping the government address the challenges in a constrained lending environment?**
- 3. In what areas of policy reforms should the WBG prioritize its support?**
- 4. How can WBG best support private sector development?**
