Human capital – knowledge, skills, and good health – empowers people to achieve their potential and drives economic growth. This brief tracks progress by Nigeria in building and using human capital. This page presents the Human Capital Index (HCI), its components parts, and relevant benchmarks. The HCI quantifies how underinvestment in education and health for today’s children reduces future incomes. Data are the most recently available as of 2020. The back page presents a set of Human Capital Complementary Indicators (HCCI) that shows progress at each stage of the lifecycle.

THE HUMAN CAPITAL INDEX

A child born in Nigeria will be 36% as productive when she grows up as she could be if she enjoyed complete education and full health. This is lower than the average for the Sub-Saharan Africa region (40%) and Lower Middle Income countries (48%).

THE HUMAN CAPITAL INDEX COMPONENTS

• **Probability of Survival to Age 5.** Of every 100 children born in Nigeria, 88 survive to age 5.

• **Expected Years of School.** In Nigeria, a child who starts school at age 4 can expect to complete 10.2 years of school by her 18th birthday.

• **Learning-Adjusted Years of School.** Factoring in what children actually learn, expected years of school is 5 years.

• **Average Harmonized Test Scores.** Students in Nigeria score 309 on a scale where 625 represents advanced attainment and 300 represents minimum attainment.

• **Adult Survival Rate.** Across Nigeria, 66% of 15-year-olds survive until age 60.

• **Fraction of Children Under 5 Not Stunted.** Approximately 63 out of 100 children are not stunted. This means that 37 out of 100 children are at risk of cognitive and physical limitations that can last a lifetime.

**UTILIZATION-ADJUSTED HUMAN CAPITAL INDEX**

The Utilization-adjusted Human Capital Index (U-HCI) scales down the HCI by taking into account how many adults are not employed. The data on the utilization-adjusted human capital index are not available for Nigeria. The regional average for this indicator is 0.24 and the income group average is 0.27.

**HCI AND COMPONENTS**

- Latest Available Data for Nigeria
- Average for Sub-Saharan Africa
- Avg. for Lower Middle Income countries

**Human Capital Index**

- Probability of Survival to Age 5 (%)
- Expected Years of School
- Learning-Adjusted Years of School
- Average Harmonized Test Scores
- Survival Rate from Age 15-60 (%)
- Fraction of Children Under 5 Not Stunted (%)

**U-HCI**

Note: Missing symbols indicate internationally comparable data are not available to generate the corresponding statistic.
The Human Capital Complementary Indicators (HCCIs) offer a snapshot of human capital investments at four stages of the lifecycle. The figures show the latest available data, benchmarked against regional averages. The figures also report progress over the previous 5 years.

**EARLY CHILDHOOD**

- **Neonatal mortality rate.** The neonatal mortality rate is 35 per 1,000 live births (2021), compared to 37 in 2016. The indicator is higher than the regional average.

- **Children who are developmentally on track.** In 2021, 48% of children (ages 24-59 months) were developmentally on track in health, learning, and psychosocial well-being. The indicator is below the regional average.

- **Minimum meal frequency.** The share of children ages 0-23 months who regularly consume an age-appropriate meal is 41% (2018), compared to 42% in 2016. The indicator is lower than the regional average.

**SCHOOL AGE**

- **Child mortality rate.** The mortality rate for children ages 5-14 is 20 per 1,000 children aged 5 (2021), compared to 22 in 2016. The indicator is higher than the regional average.

- **Children engaged in child labor.** The share of children (ages 5-17) who are engaged in economic activities is 27% (2021). The indicator is above the regional average.

- **Qualified teachers in primary education.** The share of primary school teachers who are qualified is 80% (2019), compared to 78% in 2015. The indicator is lower than the regional average.

**YOUTH**

- **Adolescent fertility rate.** The number of births for every 1,000 women ages 15-19 is 102 (2021), compared to 107 in 2016. The indicator is higher than the regional average.

- **Youth literacy rate.** The share of youth (ages 15-24) who are literate is 81% (2021), compared to 75% in 2018. The indicator is above the regional average.

- **Youth not in employment, education or training.** In 2019, 37% of youth (ages 15-24) were not in employment, education or training, compared to 27% in 2016. The indicator is higher than the regional average.

**ADULTS & ELDERLY**

- **Life expectancy at birth.** Life expectancy at birth is 53 years (2021), compared to 52 in 2016. The indicator is lower than the regional average.

- **Female labor force participation rate.** Female labor force participation as a percentage of the female working-age population (ages 25+) is 65% (2022). This remains unchanged since 2017. The indicator is above the regional average.

- **Adult unemployment rate.** Unemployed adults as a share of the adult labor force (ages +25) is 4% (2022). This remains unchanged since 2017. The indicator is lower than the regional average.

Note: Missing symbols indicate internationally comparable data are not available to generate the corresponding statistic.
