World debt tables, February 1968 (2) - E

WORLD TABLE 5Investment and SavingGENERAL NOTES

1. The calculations in this table are based on data in domestic currency at current market prices.
2. The average period percentages have been calculated as the arithmetic means of the percentage ratios for the individual years included in each period.
3. The percentages in Columns 1 through 8 relate to total gross domestic investment (including change in inventories); those in Columns 9 through 16 relate to gross domestic fixed investment, (i.e. excluding change in inventories).
4. The main sources of data are: UN Yearbooks of National Accounts Statistics and Monthly Bulletins of Statistics; and IBRD Country Reports.

NOTES TO COLUMNS

GROSS DOMESTIC INVESTMENT BY TYPE OF ASSET [Cols. 1 through 4]:
The percentages add to 100%.

Machinery and Equipment (Col. 1): This item includes transport equipment, machinery and other equipment.

Buildings (Col. 2): These include both dwellings and non-residential buildings.

GROSS DOMESTIC INVESTMENT BY SOURCE OF FINANCE [Cols. 5 through 8]:
The percentages add to 100%.

Gross National Saving [Cols. 5 through 7]: The data are gross of depreciation allowances. Gross national saving is obtained as the difference between total gross domestic investment and balance of payments current deficit, as defined below.

private sector saving (Col. 5): Comprises the saving of private corporations, unincorporated enterprises, and households and private non-profit institutions.

general government saving (Col. 6): Comprises the saving of central, state and local government, including the depreciation allowances of government enterprises.

public corporation saving (Col. 7): Public corporations are corporations established and regulated by public law whose shares are wholly or mainly owned by public authorities and/or whose policies are effectively influenced by these authorities. Non-corporate government enterprises (e.g. Post Office, etc.) are not included.

Balance of Payments Current Deficit [Col. 8]: This is defined as imports of goods and services and factor payments to abroad less exports of goods and services and factor payments from abroad. Transfers of all categories are excluded from the computation, and are regarded as a means of financing the deficit.

GROSS DOMESTIC FIXED INVESTMENT BY SECTOR [Cols. 9 and 10]: The public sector (Col. 10) consists of the general government sector and public corporations, as defined above.

GROSS DOMESTIC FIXED INVESTMENT BY INDUSTRIAL BRANCH [Cols. 11 through 16]: The percentages add to 100%.

Agriculture (Col. 11): Includes forestry and fishing.

Transport and Communication (Col. 14): Includes storage.

PUBLIC SAVING AS % OF PUBLIC INVESTMENT [Col. 17]: Public saving is equal to general government saving plus the saving of public corporations (see Cols. 6 and 7 above). The percentage ratio has been calculated on the basis of gross public fixed investment (see Col. 10 above).

WORLD TABLE 6Government Current Revenue and ExpenditureGENERAL NOTES

1. The General Government sector comprises all agencies of central, state and local government other than entities classified as government enterprises or public corporations.
2. Where data on general government were not available, the corresponding data on central government have been given with an appropriate indication.
3. All computations are based on values at current prices.
4. The main sources of information are the UN Yearbooks of National Accounts Statistics, UN Statistical Yearbooks, and IBRD Country Reports.

NOTES TO COLUMNS

GENERAL GOVERNMENT CURRENT REVENUE BY CATEGORY [Cols. 1 through 6]:
Current transfers received from abroad are excluded. Cols. 1, 5 and 6 add to 100%.

Direct Taxes (total) [Col. 1]: Comprise all taxes and surtaxes levied as a charge on the income of households and private non-profit institutions (including contributions to social security); corporate income and excess profits taxes; and taxes on undistributed profits or on capital stock which are levied at regular intervals. Taxes levied at irregular intervals on capital or wealth, such as inheritance taxes, are excluded.

Columns 2 through 4 add to Column 1.

Direct Taxes on Households [Cols. 2 and 3]: Include also taxes on private non-profit institutions and unincorporated enterprises. Social security contributions (Col. 2) include the contributions of both employers and employees.

Indirect Taxes [Col. 5]: Comprise taxes other than those levied on income and wealth and in the assessment of which no account is taken of the personal circumstances of the tax-payer. Also included are all taxes chargeable to business expenses of enterprises. The bulk of indirect taxes consists of sales taxes and customs duties.

Non-Tax Revenue [Col. 6]: Comprises income from property and entrepreneurship (i.e. net rent, interest, dividends or royalties accruing to the general government from the ownership of assets); and payments made by households and non-profit institutions such as fees, fines and other penalties.

GENERAL GOVERNMENT CURRENT EXPENDITURE BY CATEGORY: Current transfers to abroad are excluded. Columns 7 through 11 add to 100%.

Consumption Expenditure [Cols. 7 and 8]: This comprises the consolidated net expenditure incurred by general government agencies in the provision of current services to the population. It consists of the compensation of government employees and current purchases of goods and services from enterprises and from the rest of the world less the value of goods and services, other than surplus stores, sold by these agencies to enterprises and households. Defense expenditures of all categories are recorded as consumption expenditure. Expenditure on capital formation for civilian purposes is excluded.

Subsidies [Col. 9]: Consist of the current grants made by public authorities to producers.

Transfers to Households and Non-Profit Institutions [Col. 10]: These comprise the unilateral payments made by general government (other than interest on the public debt) which constitute additions to the recipients' incomes. Such payments include sickness, unemployment and welfare benefits, scholarships and grants (other than for investment purposes), etc.

Interest on Public Debt [Col. 11]: Includes interest on both domestic and foreign debt.

GENERAL GOVERNMENT SAVINGS AS % OF GENERAL GOVERNMENT CURRENT REVENUE
/ Col. 12 /: General government saving is equal to total general government current revenue less total current expenditure, as defined above.

CENTRAL GOVERNMENT SHARES IN GENERAL GOVERNMENT CURRENT REVENUE AND EXPENDITURE / Cols. 13 and 14 /: For the purpose of computing these ratios, central government current revenue and expenditure excludes current transfers to and from non-central government agencies and to and from the rest of the world.

For a number of Latin American countries for which the requisite information was not available in the main sources indicated above, a preliminary study prepared by AID "Government Finances in Latin America 1961-1966" was used.

WORLD TABLE 7Foreign Trade, External Public Debt, and International ReservesNOTES TO COLUMNS

Foreign Exchange Rate [Col. 1]: The exchange rates are as of the end of each year. Unless otherwise indicated, they are either the par value rates agreed with the International Monetary Fund or the official rates. It is pointed out that these rates frequently remain pegged despite a considerable rise in the domestic price level and for this reason do not necessarily correspond to equilibrium rates. Specifically, they may be inappropriate for converting domestic currency values into US dollar equivalents - for which purpose further adjustments are necessary.

In the absence of either a par or an official rate (e.g. countries operating a multiple exchange rate system), the rate given is that which appeared to be closest to an equilibrium rate; appropriate indications are given in footnotes. These rates too should be regarded as approximations only. Where an approximate equilibrium rate could not be determined, no information has been entered.

Import taxes and surcharges and export subsidies, although often used as devices to supplement the official exchange rate, are not incorporated in the exchange rates given in the table.

The name of the domestic currency unit is noted under each country.

The sources of data are: IMF International Financial Statistics and UN Statistical Yearbooks.

IMPORTS AND EXPORTS OF GOODS AND SERVICES

These are defined to exclude factor and transfer payments to and from abroad. However, since factor payments are not detailed separately in the main sources of information employed (IMF Balance of Payments Yearbooks), the item "Investment Income" has been used as an approximation.

All values are in current US dollars. The data for 1966 are in most cases preliminary.

Where information on aggregate imports or exports of goods and services was not available, the value of merchandise trade only has been entered in Columns 2 and 8 respectively, and appropriately footnoted. In such cases, the value of merchandise imports is generally recorded c.i.f.

Apart from the IMF Balance of Payments Yearbooks, other sources used include IBRD Country Reports, IMF International Financial Statistics and IMF-IBRD Direction of Trade.

Merchandise Imports as % of Total Imports [Col. 4]: In accordance with balance of payments procedure, non-monetary gold is excluded from merchandise imports. Unless otherwise indicated, the calculations have been made on the basis of merchandise valued f.o.b. The main sources of information are the IMF Balance of Payments Yearbooks.

Merchandise Imports, by Category [Cols. 5 through 7]: The main sources of information used are the UN Yearbooks of International Trade Statistics. The distributions have generally been calculated from c.i.f. values.

foodstuffs (Col. 5): are taken as equal to item 0 "Food and Live Animals" of the UN Standard International Trade Classification (SITC) but excluding "live animals" (001) and "fodder" (081).

machinery and equipment (Col. 6): are taken as equal to Item 7 "Machinery and Transport Equipment" of the UN Standard International Trade Classification (SITC).

fuels and lubricants (Col. 7): are taken as equal to Item 3 "Mineral Fuels, Lubricants, Related Materials" of the UN Standard International Trade Classification (SITC).

Deviations from the above classifications are indicated in footnotes.

Foreign Travel as % of Total Exports [Col. 11]: Proceeds from foreign travel are taken as equal to Credit Item A-5 "Travel" in the IMF Balance of Payments Basic Global Statement. This is therefore an approximation only of actual receipts from foreign tourism.

Terms of Trade Index [Col. 12]: This index measures the relative change in export prices as compared with that in import prices. It is calculated by dividing the annual unit value index for exports by that for imports. The base year for the computations is 1959=100. The main sources of data are the UN Yearbooks of International Trade Statistics.

EXTERNAL PUBLIC DEBT [Cols. 13 through 15]: The external public debt includes both government and government guaranteed debt. The data, which relate to disbursed debt only, have been compiled by the Statistical Services Division of the IBRD. Values are in millions of current US dollars.

Total Debt (Col. 13): Represents debt outstanding at the end of each year.

Total Debt Service (Col. 14): Comprises the annual interest and amortization payments on the external public debt, as defined above.

INTERNATIONAL RESERVES [Col. 16]: In accordance with IMF practice, international reserves have been taken to comprise the gross holdings of gold and convertible foreign exchange of central banks and government entities and the reserve positions of IMF members with the Fund. Commercial bank holdings of foreign exchange are excluded. The data have been taken from IMF publications and relate to the end of each period.

WORLD TABLE SUPPLEMENT NO. 1

PRIVATE AND PUBLIC INVESTMENT IN DEVELOPING COUNTRIES

General Notes

1. Unless otherwise indicated, the figures for public investment represent in principle the total direct capital formation of general government, autonomous government agencies and public enterprises and corporations.
2. The data on changes in stocks include stock changes in both the private and the public sectors, unless otherwise indicated.
3. All computations have been carried out on the basis of values at current market prices. The percentages may not always add, due to rounding.
4. The data given for 1965 are in most cases provisional estimates only.
5. The sources of information are indicated in the footnotes to the table.

PRIVATE AND PUBLIC INVESTMENT IN DEVELOPING COUNTRIES

Notes to Table

- * Less than 0.05%.
- # Unless otherwise indicated, the computations are based on data obtained from IBRD Country Reports and/or information supplied by Area Departments. Where alternative or complementary sources have been employed, the sources are indicated by the following notation:
- /1 IBRD Country Reports and/or information supplied by Area Departments.
- /2 UN Yearbook of National Accounts Statistics, 1965.
- /3 UN Monthly Bulletin of Statistics, November 1966.
- /4 ECLA Economic Survey of Latin America, 1964.
- /5 ECAFE Economic Survey of Asia and the Far East, 1965.
- /6 ECA Statistical Bulletin for Africa, November 1965.
- /a Private and public investment include change in stocks.
- /b Private sector investment includes investment of public corporations.
- /c Public investment includes loans to the private sector for capital formation purposes.
- /d In the official Colombian national accounts, imports and exports are converted into domestic currency values at different exchange rates.
- This results in a distortion of the accounts which may also have affected the present computations.
- /e Private investment includes ships transferred to the Greek flag.
- /f Data relate to fixed investment only.
- /g Data relate to fixed investment only. The figures for private investment include investment of public corporations.
- /h Data on stocks relate to States of Malaya only.
- /i Notional order of magnitude.
- /j Data relate to fixed investment only. Investment as a % of product has been calculated on the basis of GDP at factor cost.
- /k Investment as a % of product has been calculated on the basis of GNP at market prices.
- /m All computations are based on values at constant (1965) market prices. The data on investment represent fixed investment only. Investment as a % of product has been calculated on the basis of GNP.
- /n Former territory of Tanganyika. Data relate to fixed investment only.
- /p Excludes stocks held by the public sector.

WORLD TABLE SUPPLEMENT NO. 2

GROSS DOMESTIC PRODUCT AND POPULATION IN DEVELOPING COUNTRIES
REGIONAL SUMMARY - AVERAGE ANNUAL GROWTH RATES (%)

Notes

- * Excluding Sino-Soviet countries.
The average period growth rates are the annual compound rates of growth between the initial and terminal years defining the periods.
- /1 Area defined to cover all countries of Africa, including the U.A.R., but excluding South Africa and South West Africa. The countries for which data were available for this computation for the periods 1950-60 and 1960-65 represent respectively 76% and 83% of the aggregate GDP of the area as defined above.
- /2 Area represents the total of South Asia and the Far East as defined below. The figures are the weighted average of the countries for which data were available and which were included in the respective Asia sub-regions.
- /3 Area defined to cover Burma, Ceylon, India, and Pakistan. All the above countries were included in the computations for this area.
- /4 Area defined to cover all countries in the Far East excluding Japan. The countries for which data were available for this computation for the periods 1950-60 and 1960-65 represent respectively 70% and 83% of the aggregate GDP of the area as defined above.
- /5 Area defined to cover Cyprus, Greece, Portugal, Spain, Turkey, and Yugoslavia. All the above countries were included in the computations for this area.
- /6 Area defined to cover all countries of the Western Hemisphere excluding the U.S., Canada, and Puerto Rico. The countries for which data were available for this computation for the periods 1950-60 and 1960-65 represent respectively 94% and 98% of the aggregate GDP of the area as defined above.
- /7 Area defined to cover all countries of the Middle East excluding Turkey. The countries for which data were available for this computation represent 73% of the aggregate GDP of the area as defined above.

WORLD TABLE SUPPLEMENT NO. 2

Notes

/8 Weighted average of countries for which data were available and which were included in the respective areas.

Sources: The data for the following countries were derived from U.N. sources: Algeria, Congo, Ghana, Kenya, S. Rhodesia, Tanzania, Tunisia, Argentina, Brazil, Chile, Costa Rica, Panama, Cambodia, Ceylon, Indonesia, Malaysia, Pakistan, the Middle East and former French African territories.

All other data are from IBRD sources.

WORLD TABLES

Attached for insertion in your copy of the World Tables is a table containing a functional breakdown of central government expenditures in developing countries. This is Supplement No. 3 to the World Tables.

Distribution:

 Holders of World Tables

WORLD TABLE SUPPLEMENT NO. 1

CENTRAL GOVERNMENT EXPENDITURES,
BY FUNCTION, IN DEVELOPING COUNTRIES
PERCENTAGE DISTRIBUTION

General Notes

1. Significant differences in classification and coverage of data in this table call for more than the usual caution in making international comparisons. The main sources of these differences are specified below.

Some countries have a double budgeting system, consisting of an ordinary (recurrent) and a development budget. However, the recurrent budgets do include some capital expenditures, while the development budgets contain certain current expenditures for development purposes, but these expenditures are not shown separately. Several countries do not give a functional breakdown of central government expenditures and the figures shown in this table were arrived at by reclassifying expenditures given in the conventional budgetary form.

The share of total public sector expenditures represented by central government expenditures varies from country to country depending on the size and number of the autonomous agencies which are consolidated in the budget, and on the relative importance of state government expenditures. Furthermore, central government transfers to other levels of government and the private sector appear in the budgets of some countries on a net basis, in others on a gross basis, and in some they are completely omitted.

2. The columns present the data classified by function; the rows, by type of expenditure (current and capital outlays).

For some countries, current expenditures and capital outlay data could not be obtained; ordinary and development budget expenditures were used instead. In these cases, the stub identifies the classification used.

3. Central government loans to the private sector or to other levels or units of government are generally included in capital expenditures.

WORLD TABLE SUPPLEMENT NO. 3

General Notes

4. Horizontally, the percentages in each row, excluding the last column, add up to 100 percent (except for rounding); vertically, the last column adds up to 100 percent for each period.
5. All computations have been carried out on the basis of values at current market prices.
6. Dots (..) represent either the absence of expenditures or the lack of data, as the original sources often fail to indicate the reasons for not supplying any figures.
7. Unless otherwise indicated in table footnotes, the sources of data for Latin America are AID reports and for all other countries, IBRD country reports.
