CO-CREATION: STEP-BY-STEP
CO-CREATION: ON A LARGER SCALE
FROM PLANNING TO ACTION
EX. OF PRIORITIES IN NGILAI, KENYA

HEALTH CARE
We want to increase access to health care, respecting and integrating our culture of Samburu medicine. We want to increase the range of services to treat injuries, children, pregnant women, the elderly, and people with disabilities at the village level to have a healthy community.

EDUCATION
We want our children to become good elders and leaders in our community. We want to improve our community’s schools and grow support from parents, community leaders and education administrators to make it possible for our children to enroll and stay in school. For our children who stay at home, we want to make sure they learn about our livelihoods, systems of governance, and values of respect and unity in our communities.

RANGELANDS AND LIVELIHOODS
We want to diversify our livelihood activities, maintain the areas where we have healthy forests, recover degraded forest and soils, maintain water sources, and improve our grazing patterns to adapt to the challenges of increased drought to continue thriving as pastoralist communities.
