

PROJECT SUMMARY

Rwanda

PROJECT NAME

Strategic Support to Advance NDC Implementation

GRANT OBJECTIVE AND ACTIVITIES

The project supports Rwanda in producing quantifiable targets for climate adaptation and mitigation and in updating its NDC. Aligned with the country's NDC Partnership Plan, it builds in-country capacity, drawing the participation of the public and private sectors. It also supports the development and implementation of a Monitoring and Evaluation Framework for adaptation actions and builds capacity to institute indicators on climate resilience. The project seeks to strengthen the capacity of the government to mobilize public and private resources to implement the NDC and builds on the World Bank's support to a host of programs including the Strategic Program for Climate Resilience, the Forest Investment Plan, Scaling Up Renewable Energy Program, and the Climate Smart Agriculture Investment Plan. The project also helps to ensure that the NDC is gender-responsive.

COUNTRY FOCAL POINTS

Ministry of Environment, Ministry of Land and Forestry

WORLD BANK GROUP PRACTICE

-  Environment & Natural Resources
-  Agriculture
-  Energy
