

# PROJECT SUMMARY

Jamaica

## PROJECT NAME

Development of 2050 Low Emissions and Climate Resilience Strategy in Jamaica

## GRANT OBJECTIVE AND ACTIVITIES

The grant supports the long term, low GHG emission and resilient development in vulnerable sectors in Jamaica, a member of the [NDC Partnership](#). The grant will seek to review assess policies in key sectors, identify and prioritize strategic options for support low GHG emission and resilient development, and prepare a climate and resilience strategy based on the options identified. Additionally, the project team will help the Jamaican government carry out capacity building and outreach activities to include stakeholders in the consultation process of the strategy. The financed activities are expected to contribute to the overall NDC Partnership engagement process in the country. This project is being supported through the NDCP Climate Action Enhancement Package (CAEP).
