Who We Are

The World Bank Treasury serves as treasury for both the World Bank (International Bank for Reconstruction and Development, IBRD) and the International Development Association (IDA).¹ Both are members of the World Bank Group.²

Green, Resilient, and Inclusive Recovery

IBRD deployed US$46 billion and IDA US$53 billion, to fight the health, economic, and social impacts of the pandemic from April 2020 to June 2021.

The World Bank continues to work with countries to develop and implement their COVID crisis response and recovery while mainstreaming climate action in development strategies.

In September 2021, the World Bank launched an initiative to issue US$eq.10 billion, ultimately raising US$12 billion, in Sustainable Development Bonds while highlighting the urgency to integrate climate change considerations in all activities and to highlight the World Bank’s approach to mainstreaming climate action. The updated World Bank Group Climate Change Action Plan, explains how the World Bank helps countries integrate climate change into development strategies and apply climate financing to achieve the most positive impact. The World Bank screens 100% of projects for climate and disaster risks and in fiscal year (FY) 2021, 95% of IBRD projects included climate components accounting for one-third of all financing.

IBRD Lending Highlights

In FY21 (July 1, 2020-June 30, 2021), IBRD mobilized record lending volumes: US$31 billion in new commitments and US$24 billion disbursements.

New commitments are supporting the financing of sustainable development activities through 125 new projects in middle income countries.

$31 billion 125 projects 95% of projects with climate components 33% of financing directed to climate action

Impact Report

Sustainable Development Bonds & Green Bonds

The FY20 World Bank Impact Report covers all World Bank (IBRD) bond issuance and the entire portfolio of World Bank financed projects and programs. It looks at achieved and expected results from the project portfolio.³ To support IBRD’s holistic approach to sustainable development, reporting on the World Bank’s Green Bond project portfolio is for the first time included in the 2020 Impact Report alongside the reporting on the Sustainable Development Bond project portfolio.

¹ Information about IDA’s funding program can be found at: https://treasury.worldbank.org/en/about/unit/treasury/ida
³ Net proceeds of World Bank bonds are not committed or earmarked for lending to, or financing of, any particular projects or programs, and returns on World Bank bonds are not linked to the performance of any particular project or program.
World Bank Funding Summary

In FY21, IBRD drew on its triple-A credit rating and strong standing in the markets to raise **US$eq.68 billion** to support the financing of the World Bank’s development activities, including clients’ response to the COVID-19 pandemic and increasing resilience to the effects of climate change. IBRD plans to raise **US$eq.50-55 billion** for the FY22 funding program ending June 30, 2022.

### Key Transactions

#### Extending Maturities

In FY21, IBRD issued a **EUR 2 billion 40-year Sustainable Development Bond**—the first in the tenor. In the US dollar market, IBRD issued a **US$5 billion 10-year Sustainable Development Bond**. The extended maturities help align IBRD’s funding with its long-term sustainable development programs in its member countries.

#### Developing LIBOR Alternatives

In February 2021, IBRD issued a **US$600 million 10-year floating rate bond**—the longest maturity floating rate benchmark to date for the Secured Overnight Financing Rate (SOFR). This transaction supports the development of the SOFR market, boosting alternatives to the US-dollar London Inter-Bank Offered Rate (LIBOR), and helps ensure the efficient functioning of the global financial system.

#### Setting a New Record in the Kauri Market

The **NZ$1.5 billion 5-year benchmark due Nov. 2026** was the largest non-government bond issued in the New Zealand dollar-market.

#### Building Resilience to Natural Disasters

Jamaica became the first Caribbean country and small island state to independently sponsor a catastrophe bond. The **US$185 million catastrophe bond** provides Jamaica with financial protection against losses from named storm events for three hurricane seasons ending in December 2023.

#### Using Financial Innovation to Accelerate COVID-19 Support

The World Bank supported United Nations Children’s Fund (UNICEF)’s activities to address the pandemic’s impact on children through IBRD’s issuance of a **US$100 million five-year bond**. The issuance frontloads an amount equivalent to half of the total proceeds of the bond, US$50 million, to UNICEF to support its pandemic response programs for children around the world over the 5-year period.

### More transactions
Mainstreaming Climate Action

In FY21, the World Bank Group’s climate finance totaled over US$26 billion, it’s largest year of climate finance ever (25% above FY20, which also exceeded targets).

The updated Climate Change Action Plan for 2021-2025 aims to integrate climate and development goals and commits 35% of World Bank Group financing to climate, on average, over the next five years, with at least 50% of World Bank climate finance supporting adaptation.

By July 1, 2023, the World Bank will align its financing with the goals of the Paris Agreement, while helping client countries meet their Paris commitments.

Raising Awareness for the SDGs

World Bank Sustainable Development Bonds raise awareness for certain development challenges and SDGs, using World Bank projects as examples. Below are examples of themes and SDGs highlighted, including a selection of transactions executed in 2021 by IBRD. All SDBs issued while raising awareness for specific themes or SDGs follow the World Bank’s Sustainable Development Bond Framework.

- **Nutrition**
  - 10-year AU$130 million Sustainable Development Bond issued while highlighting the importance of good nutrition to build human capital.

- **Gender Equality**
  - CA$1.5 billion 5-year benchmark, NOK 5 billion 5-year floating rate benchmark, CA$25 million 5-year Sustainable Development Bond, and NOK and SEK denominated Sustainable Development Bonds issued while raising awareness for the World Bank’s strategy, projects and programs that focus on gender equality, highlighting the disproportionate impacts that COVID-19 has on women.

- **Clean Water and Marine Resources**
  - COP 37 billion 5-year Sustainable Development Bond and a EUR 200 million 30-year callable bond issued while raising awareness for the vital role of the world’s freshwater and marine resources and the importance of addressing water and ocean pollution.

- **Sustainable Cities & Communities**
  - US$185 million catastrophe bond provides the Government of Jamaica with financial protection against losses from named storm events for three hurricane seasons ending in December 2023.

- **Responsible Production & Consumption**
  - CNH 500 million 2-year Sustainable Development Bond issued while engaging with investors to raise awareness for the importance of combatting food loss and waste.

- **Climate Action**
  - EUR 2 billion 25-year benchmark, dual tranche AU$800 million kangaroo bonds, US$5 billion 10-year benchmark and a US$2 Billion SOFR Index-Linked Sustainable Development Bond issued as part of the World Bank’s initiative to issue Sustainable Development Bonds while highlighting the urgency of mainstreaming climate action.

Green Bonds Update

In FY21, the World Bank issued US$1.6 billion in green bonds, bringing its total issuance since the inception of the green bond market to over US$16 billion in 185 green bonds and 23 currencies. As of June 30, 2021, there were approx. US$eq.8 billion in World Bank Green bonds outstanding.

**Key Transactions**

Responding to investor demand, IBRD issued an SEK 2 billion 8-year green bond and AUS$274 million and NZ$241 million green bonds to support the financing of low carbon and climate resilient growth in IBRD member countries.

Listen to The Development Podcast to learn more about the World Bank’s Climate Change Action Plan.
IDA Update

IDA’s funding program doubled in FY21 to almost US$eq.10 billion.

Frameworks for Issuing Sustainable Development Bonds

IBRD and IDA published Sustainable Development Bond Framework in 2021. The frameworks for IBRD and IDA provide investors with information on how IBRD and IDA bonds support sustainable development, including examples of the types of projects and programs that each institution’s bond proceeds support through the financing of loans to member countries.
