

# PROJECT SUMMARY

## Pacific Islands

### PROJECT NAME

**Multi-country NDC Planning and Blended Finance Roadmap for Maritime Transport**

### GRANT OBJECTIVE AND ACTIVITIES

This project supports the development of a sector-specific multi-country NDC for domestic and regional maritime transport in the eight Member Countries of the Pacific Blue Shipping Partnership (PBSP), which include the Republic of the Marshall Islands (RMI), Fiji, Kiribati, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu. These countries have committed to improving maritime infrastructure and connectivity and to decarbonizing their domestic maritime sectors by 2050. The project aims to achieve its objective by providing a Baseline Assessment of the maritime sector, economic modelling of decarbonization pathways to formulate a Zero-Carbon Transition Plan, and a detailed Blended Finance Roadmap for maritime transport. Additionally, the project will provide advisory and capacity support to ongoing efforts to establish a governance framework to coordinate the implementation of the multi-country maritime NDC in the context of the PBSP. This project is being supported through the NDCP Climate Action Enhancement Package (CAEP). RMI, Fiji, Tonga and Vanuatu are members of the NDC Partnership.

### COUNTRY FOCAL POINTS

Pacific Blue Shipping Partnership, RMI Ministry of Environment, RMI Office of Environmental Planning and Policy Coordination, Fiji Ministry of Infrastructure, Transport, Disaster Management and Meteorological Services, Fiji Ministry of Economy

### WORLD BANK GROUP PRACTICE

 Transport
