

PROJECT SUMMARY

Regional -Argentina, Brazil, Chile, Mexico

PROJECT NAME

Clean Bus Systems in Latin American Cities

GRANT OBJECTIVE AND ACTIVITIES

The project is consolidating and scaling up efforts to achieve clean and efficient bus systems in cities across the Latin America region. It is establishing a regional technical and financing facility to support transport operators in the introduction of new vehicle technologies, improve managerial capabilities, attract public and private sector finance to support the acquisition and renewal of vehicle fleets. Through market and industry analyses, the project is putting in place mechanisms to build the service and maintenance industry; and support governments in establishing high-level policies for efficient urban transport systems.
