Microdata Codebook

The Global Findex 2021 individual-level data is available in the World Bank Microdata Library, [here](#).

The complete questionnaire is available [here](#).

“Don’t know” and “Refused to answer” are coded as ‘no’ in the Global Findex 2021 country-level database, [here](#).
Variable names and definitions are listed below:

<table>

<tr>
<td>urbanicity_f2f</td>
<td>Respondent lives in rural area = 1 if the respondent lives in a rural area, = 2 if and the respondent lives in an urban area</td>
<td></td>
</tr>
</tbody>
</table>

Note: Rural and urban classifications rely on a joint OECD-EU effort to classify these two groups based on population grids (not administrative units) that directly capture the spatial concentration of people. This is different from Gallup’s earlier measures of rurality which relied on a survey respondent’s perception of the urbanicity of their residence. The Global Findex Database 2021 uses the new estimate and provides account ownership averages for adults living in rural and urban areas. These averages are available only for those economies in which face-to-face surveys were conducted and are not compared with the 2011, 2014, and 2017 data, nor with regional or global averages. See more here.

<tbody>
<tr>
<td>account_fin</td>
<td>Has an account at a financial institution</td>
<td>= 1 if the respondent had an account at a bank or at another type of financial institution, such as a credit union, a microfinance institution, a cooperative, or the post office (if applicable), or has a debit card. = 0 if the respondent did not have an account. Note: The data also include an additional 3 percent of respondents in 2021 who reported receiving wages, government transfers, a public sector pension, or payments for agricultural products into an account (excluding mobile money) in the past year; paying utility bills or school fees from a financial institution account in the past year; or receiving wages, government transfers, or agricultural payments to a card in the past year. The definition does not include non-bank financial institutions such as pension funds, retirement accounts, insurance companies, or equity holdings such as stocks. Questions screened for account ownership in the questionnaire do not include these additional 3 percent of respondents.</td>
</tr>
<tr>
<td>account_mob</td>
<td>Has a mobile money account</td>
<td>= 1 if the respondent used mobile money services to pay bills or to send or receive money in the past year = 0 if the respondent did not use them. Note: Mobile money service providers are those included in the GSM Association’s Mobile Money for the Unbanked (GSMA MMU) database. The data also includes an additional 2 percent of respondents in 2021 who received wages, government transfers, a public sector pension, or payments for agricultural products through a mobile phone in the past year. Unlike the definition of account at a financial institution, the definition of mobile money account does not include the payment of utility bills or school fees through a mobile phone. The reason is that the phrasing of the possible answers leaves it open as to whether those payments were made using a mobile money account or an over-the-counter service. Questions screened for account ownership in the questionnaire do not include these additional 2 percent of respondents.</td>
</tr>
<tr>
<td>account</td>
<td>Has an account</td>
<td>= 1 if the respondent has an account at a financial institution, a mobile money account, or both = 0 if the respondent does not have an account.</td>
</tr>
<tr>
<td>borrowed</td>
<td>Borrowed</td>
<td>= 1 if the respondent, personally or together with someone else, borrowed money in the past year, including from a bank or similar financial institution, via a mobile money account, from family or friends, or from an informal savings group, or for any other reason = 0 if the respondent did not borrow</td>
</tr>
<tr>
<td>saved</td>
<td>Saved</td>
<td>= 1 if the respondent personally saved or set aside money in the past year, including using an account at a financial institution, via a mobile money account, a savings club or person outside the family, or for any reason = 0 if the respondent did not save</td>
</tr>
<tr>
<td>receive_wages</td>
<td>Received a wage payment</td>
<td>= 1 if the respondent received a wage payment into an account = 2 if the respondent received a wage payment in cash only = 3 if the respondent received a wage payment via some other method = 4 if the respondent did not receive a wage payment = 5 if the respondent does not know/refuses to answer. Note: This includes adults who received a wage payment in the past year.</td>
