

PROJECT SUMMARY

Georgia

PROJECT NAME

Financing framework for Georgia's Coastal Zone NAP and a watershed management plan/landscape restoration plan for the upper watersheds of reservoirs in East Georgia

GRANT OBJECTIVE AND ACTIVITIES

The project will generate analytical and operational tools and knowledge for the design and implementation of selected climate change mitigation and adaptation actions in Georgia, a member of the [NDC Partnership](#). The project will support two key activities. First, it will develop a financing framework for the Coastal Zone National Adaptation Plan (NAP) for Georgia. Second, the project will prepare a watershed management and landscape restoration plan for the upper watershed of reservoirs in East Georgia. This plan will feed into a pre-feasibility study of water reservoirs for irrigation purposes.

COUNTRY FOCAL POINTS
