Big Data Test Infrastructure

provides infrastructure, tools and stakeholder onboarding services, allowing European public organisations to experiment with Big Data technologies and move towards data-driven decision making

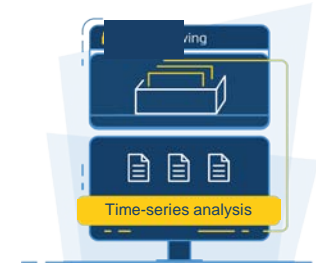

Descriptive analysis

Use of statistics to quantitatively describe features of a collection of information

Social Media Analysis

Gather and analyse data from social media to improve business decisions

Time-series Analysis

Analyse time series data in order to extract meaningful statistics and other data characteristics

Predictive analysis

Use statistical techniques that analyse current and historical facts to make predictions about future or unknown events

Network Analysis

Investigate any structures through the use of network and graph theories

Text Analysis

Use natural language processing to analyse unstructured text data, to derive pattern and trends

Thank you!
