

PROJECT SUMMARY

Guinea

PROJECT NAME

NDC Planning, Implementation and Resource Mobilization in Guinea

GRANT OBJECTIVE AND ACTIVITIES

The project will support the Government of Guinea, a member of the [NDC Partnership](#), to set up a strong basis for strengthening its NDC and subsequent implementation. The project will support the development of an NDC Partnership Plan to build a coordination framework between key government entities, technical and financial partners, private sector counterparts, and other stakeholders to strengthen Guinea's NDC implementation. An investment plan will support the identification of additional funding needs and complementary interventions by considering the priorities of the NDC, technical and financial partners' ongoing and planned interventions, and opportunities for involvement of the private sector. Emphasis will also be placed on strengthening intersectoral coordination to build common understanding of national climate commitments and thus the capacity for intervention.
