

PROJECT SUMMARY

Guatemala

PROJECT NAME

Supporting the Implementation of the NDC Roadmap

GRANT OBJECTIVE AND ACTIVITIES

This project supports the Government of Guatemala in the implementation of its NDC roadmap, which was developed through a multi-sectoral participatory process supported by the [NDC Partnership](#). It is aligned with Guatemala's NDC Partnership Plan that was drafted with the World Bank's assistance. The project seeks to fill technical and financial gaps for the achievement of NDC roadmap objectives by providing support for setting-up and operationalizing a technical coordination body for NDC implementation. The project also works towards strengthening financial management and climate budgeting for the achievement of NDC targets and identifying adaptation measures in priority sectors to support NDC review and update.
