

GOVERNMENT ANALYTICS FELLOWSHIP

A multi-week training course for public servants to leverage data to strengthen public administration

GOVERNMENT ANALYTICS

Governments are data rich, yet their wealth of information remains largely untapped. This means governments are missing out on data insights that can enhance their work. **How can governments leverage this wealth of information to enhance public administration efficiency?**

THE GOVERNMENT ANALYTICS HANDBOOK

The **Government Analytics Handbook** aims to bridge this gap. It advocates for a systematic approach to data analytics in the public sector, covering a range of data sources, including administrative data and public servant surveys, and presenting tools and resources for conducting analytics.

FELLOWSHIP

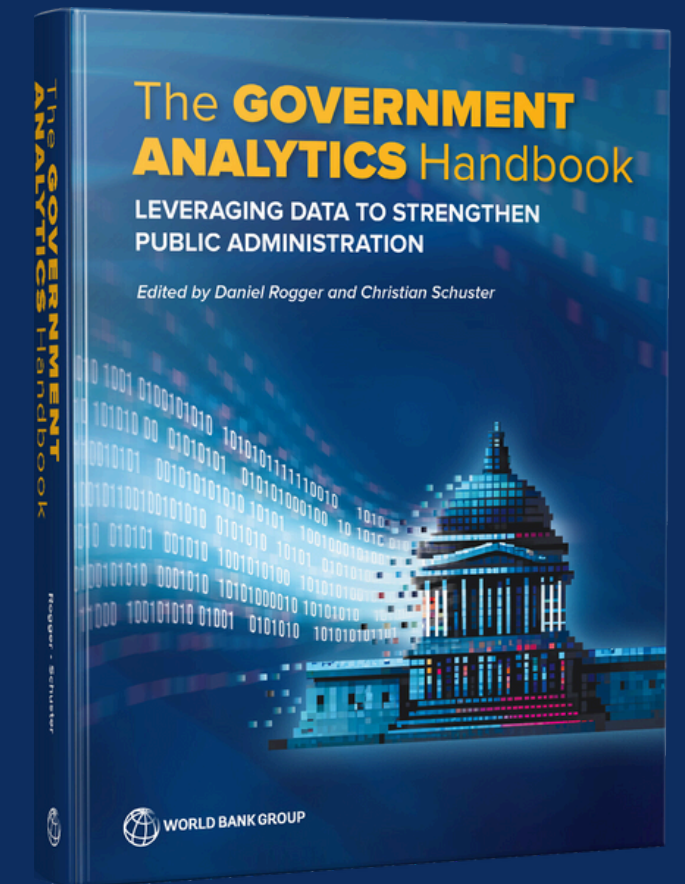

The World Bank **Government Analytics Fellowship Program** seeks to strengthen public administration through a data-informed approach.

Leveraging insights from the pioneering **Government Analytics Handbook** and supported by World Bank experts and academics, the fellowship offers frontier evidence and practitioner insights to enhance government efficiency.

40 fellows will be selected to participate as part of the new cohort of the World Bank Government Analytics Fellowship.

The Fellowship is a collaboration between the World Bank Development Economics Vice-Presidency (DEC), the Institutions Global Department, and the Development Impact Group (DECIDI).

"This pioneering handbook shows how microdata can be used to give ... granular and real insights into how states work."

— Francis Fukuyama, Stanford University, author of **State-Building: Governance and World Order in the 21st Century**

KEY FEATURES

The **Government Analytics Fellowship** will position participants at the forefront of a global movement to reimagine government through the lens of data analytics.

The fellowship will extend over a period of 6 months and comprise a mix of in-person training and in-service support from senior experts **at the World Bank and University College London to develop a pioneering Government Analytics project** in their government.

The Fellowship offers the following key events:

JANUARY 28-29

**PUBLIC INSTITUTIONS
FOR DEVELOPMENT
CONFERENCE**

Participation in the second edition of the Public Institutions for Development Conference: Supporting Firms and Workers.

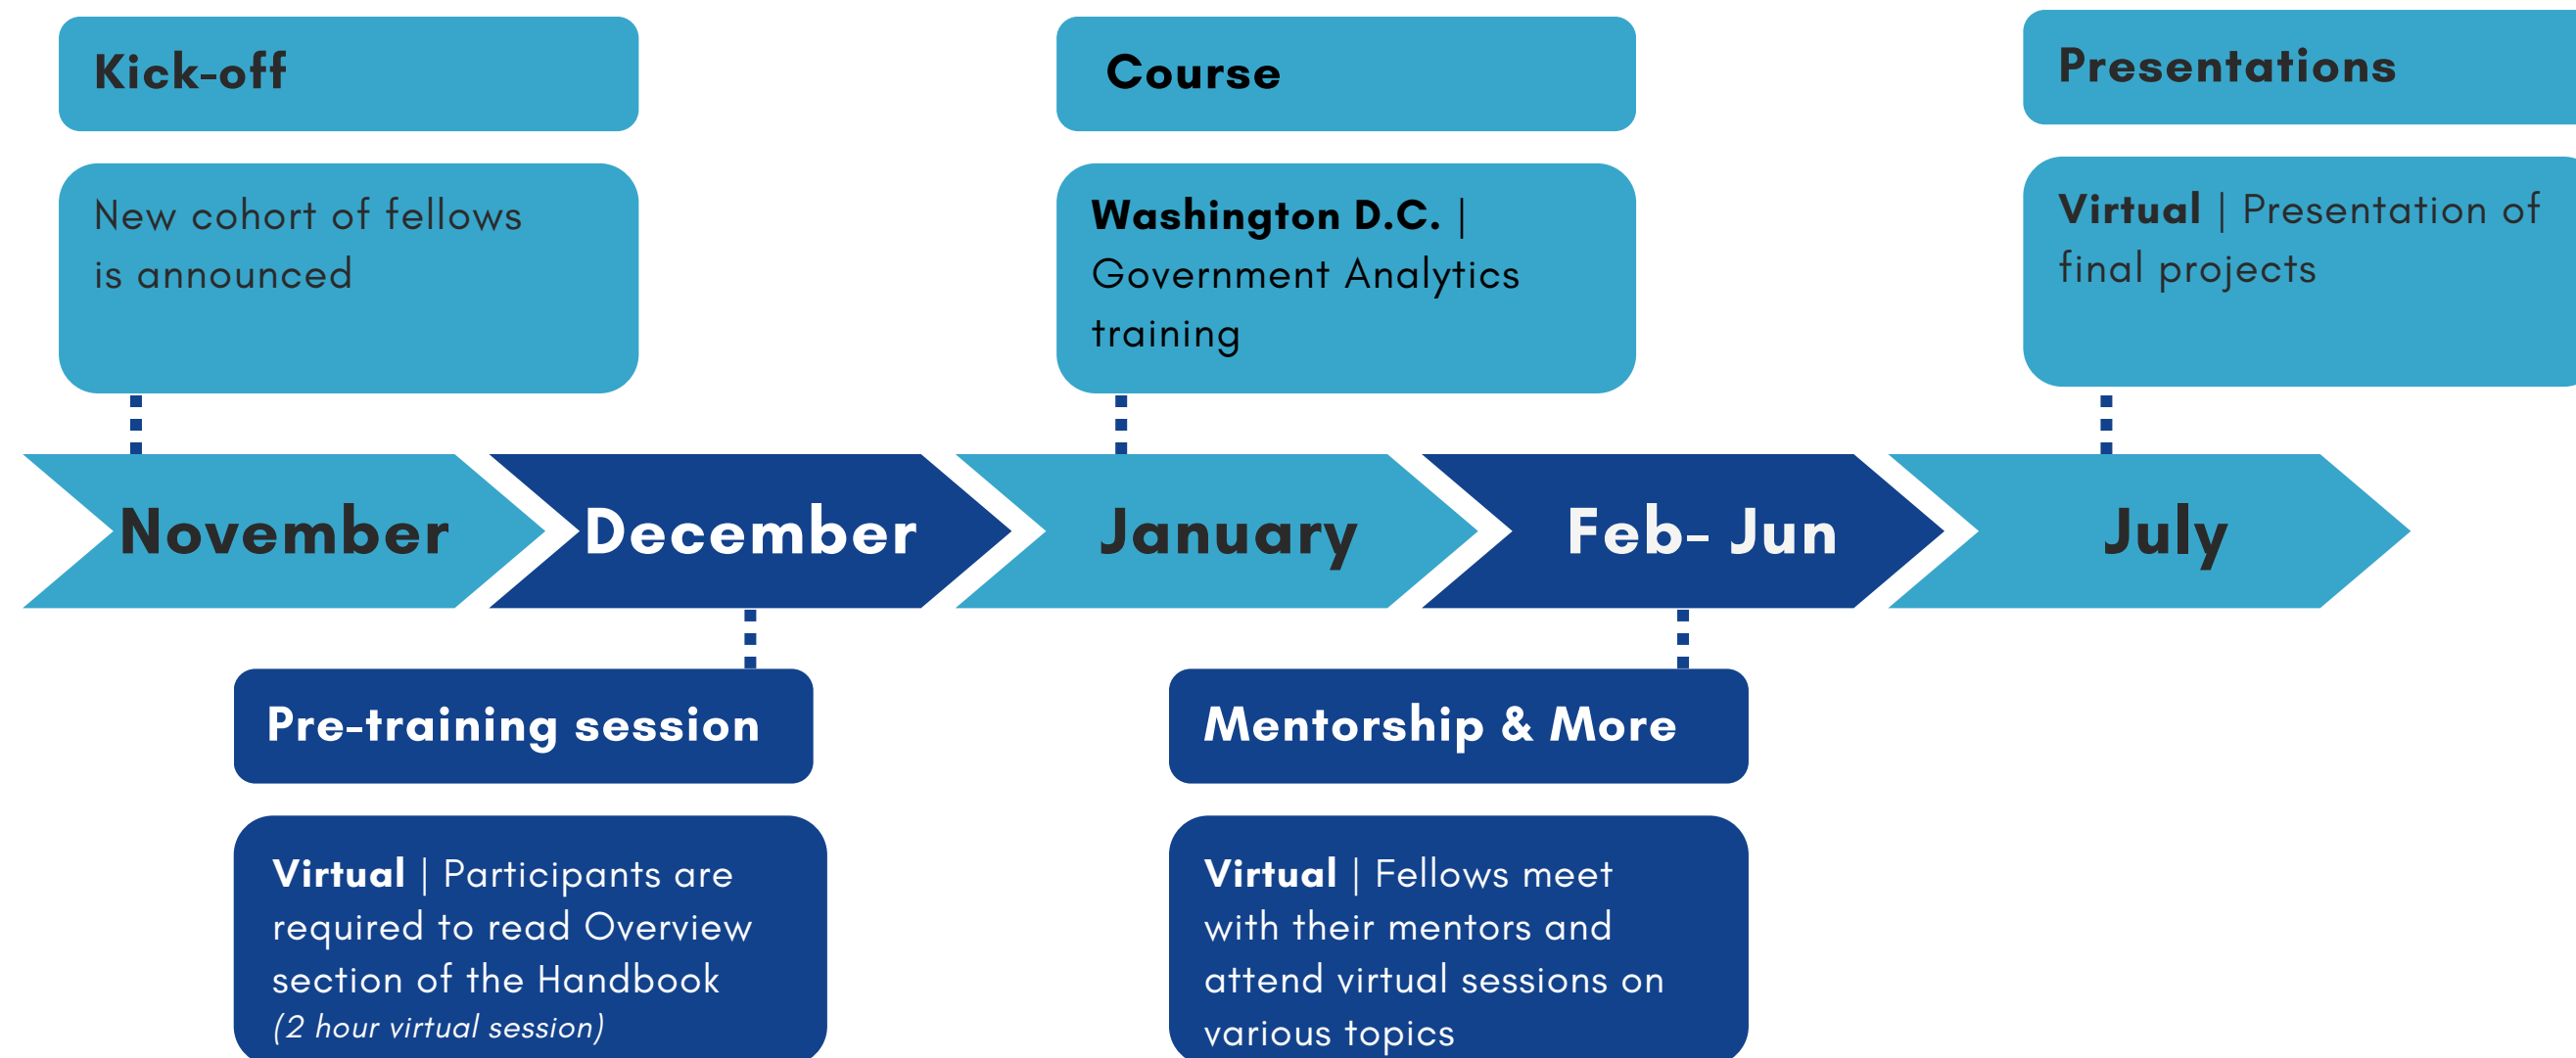

JANUARY 30 - FEBRUARY 6

**GOVERNMENT
ANALYTICS COURSE**

Participation in the Government Analytics course in Washington, D.C., with hotel, travel and subsistence covered by the World Bank.

LEARNING PATH

The fellowship extends over a period of 6 months. **However, the core full-time commitment is focused on the 2 weeks** of in-person training in Washington, D.C. which includes the Government Analytics course.

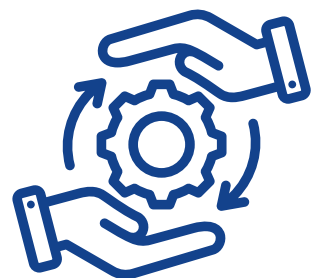

BENEFITS

This fellowship represents an opportunity for participants to gain first-hand knowledge from experts behind the **Government Analytics Handbook** as well as:

Gain Data-Driven Insights and expertise to harness vast amounts of governmental data, translating it into actionable insights for smarter decision-making and policy development.

Catalyze Change in your Government with cutting-edge research and expert support to implement systemic changes in your government's operations.

Join a Collaborative Network of like-minded government officials, data experts, academics, and professionals.

REQUIREMENTS

To participate in the World Bank Government Analytics Fellowships Program, candidates must meet eligibility requirements. These are designed to ensure that all participants are well-positioned to fully benefit from and actively contribute to the program.

All participants should:

- Be nominated by their organizations (Up to 2 fellows per organization).
- Be working in central government organizations (including agencies).
- Be mid-level managers or senior analyst positions (or equivalent) with authority to develop a government analytics project.
- Be able to demonstrate prior tertiary-level coursework on statistics or related quantitative methods.
- Be available and able to travel to Washington DC between January 27 and February 6.
- Have working proficiency in English.

HOW TO APPLY

Call for applications close on September 28. Applicants are expected to submit all documents by the announced closing date, and no exceptions will be made. More detailed information regarding the application can be found in our website: <http://bit.ly/3wQLF1Q>.

All applicants must apply on the website and submit the following documents in English:

- An **endorsement letter** from their organization detailing its support for the fellow's efforts to enhance government analytics capabilities through a specific project.
- A comprehensive **CV (3 pages maximum)**, highlighting relevant experience and indicating prior tertiary-level coursework on statistics or related quantitative methods.
- A **150-word summary** of a government analytics project. Consult worldbank.org/governmentanalytics to understand the range of potential projects.

The letter, CV, and summary should be submitted by the **deadline**. For any additional questions, e-mail governmentanalytics@worldbank.org.
