Survey Analysis

Tracer Study 2020: Results Framework

The study investigates the Scholarship Program's effectiveness in meeting its core objective

Results are measured along three levels:

1. Individual / Scholar
2. Institutional
3. Country-wide

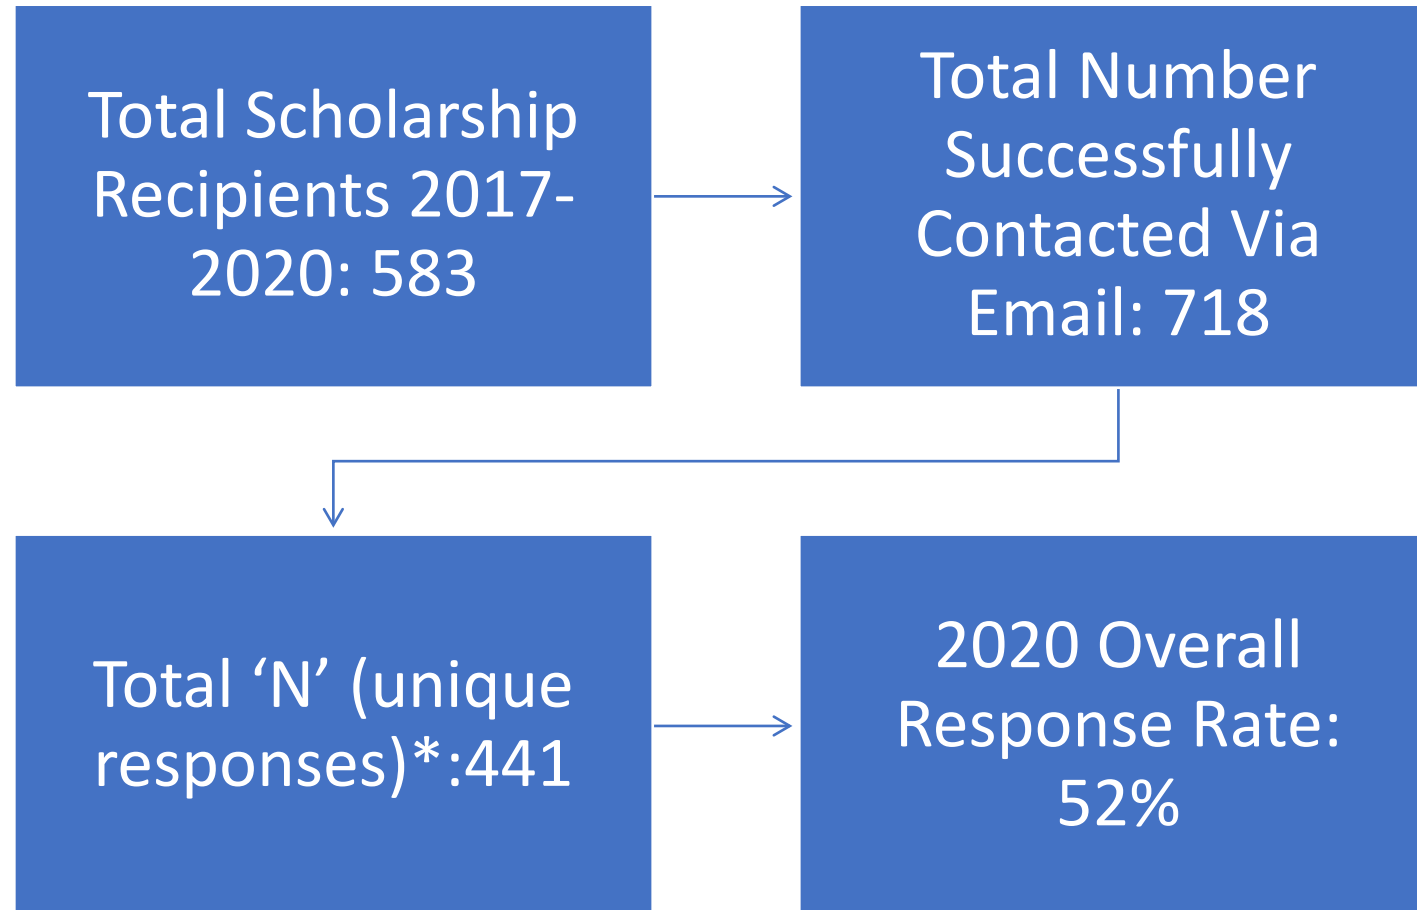

For each of the three levels, several indicators of results were created and questions were designed to measure each indicator

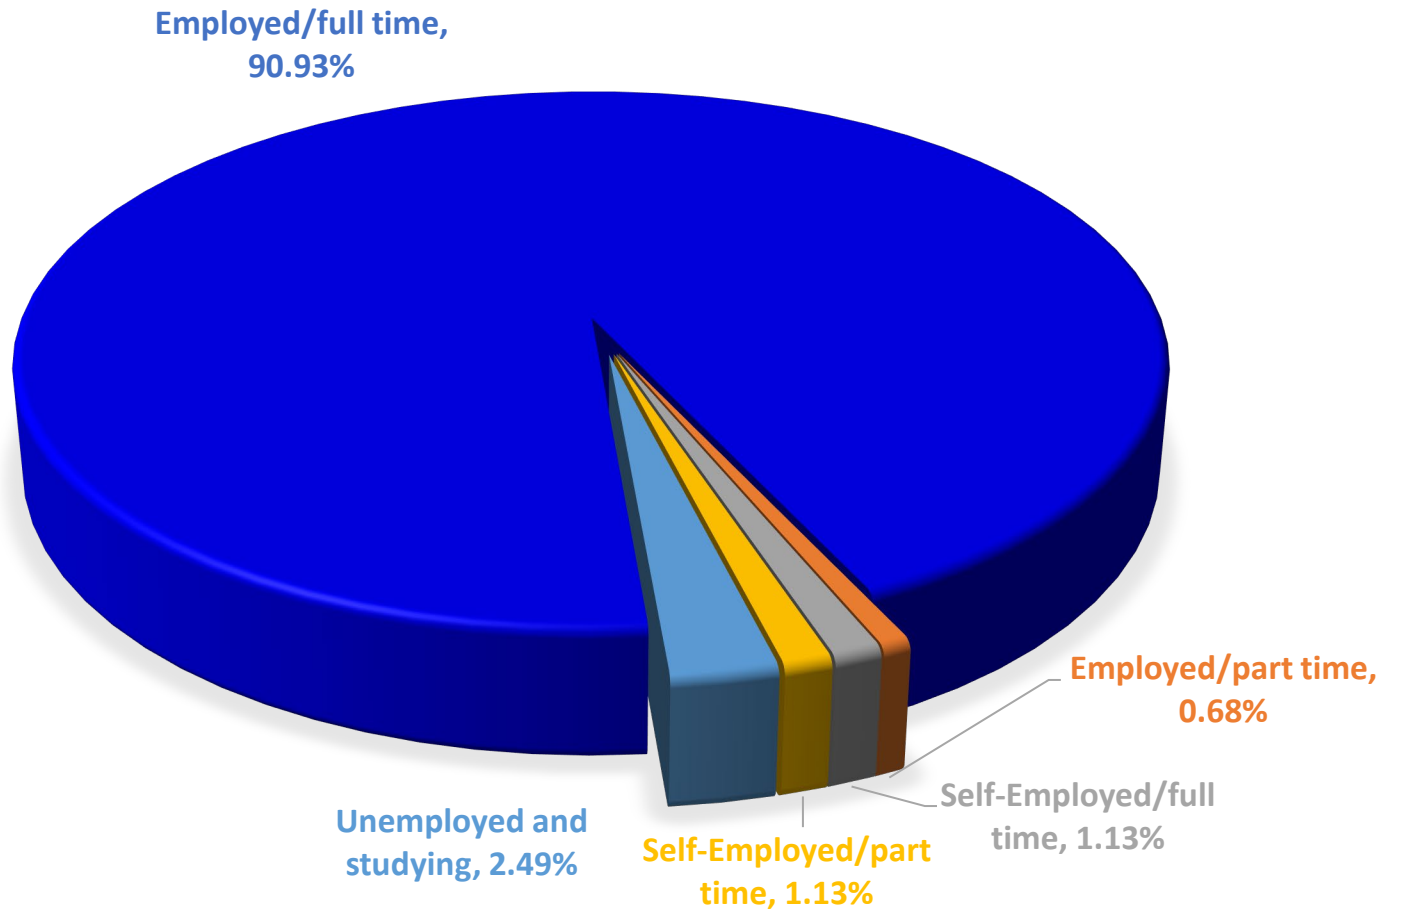

The Results Framework and survey instrument were peer reviewed in 2016 by a senior IEG staff member as good practice

After attaining your degree, did you start a new business or Civil Society Organization working on development that employs other?

NEW BUSINESS OR CIVIL SOCIETY ORGANIZATION

I have developed a centre for injury prevention and research. This centre is playing a pivotal role in saving lots of life in Bangladesh and other countries. I am leading the organization with my skill I gained through my education under JJWBSP.

I was able to start up my own company with some of my classmate at University. Thanks to my acquired knowledge in Japan, my company worked with Japanese institution in infrastructure projects.

Thank you!

The JJWBGSP provided me with a dream come true opportunity of education to Masters level which otherwise would have been a far fetched dream coming from an underprivileged family. The study has contributed towards my deeper understanding of development concepts, policies, strategies and technical issues. After my studies I went back home and contribute towards development by holding various managerial positions within various International Development Agencies where I have the capacity to make my voice heard through decision making and influencing of policies for more advance societies/communities within The Gambia.
