IDA Sustainable Development Bonds | FY25 Impact Report | Project Table

These project tables should be read in conjunction with the FY25 IDA Sustainable Development Bonds Impact Report at [https://treasury.worldbank.org/en/about/unit/treasury/impact/impact-report]

These project tables have been prepared by the International Development Association (IDA) for information purposes only, and IDA makes no representation, warranty or assurance of any kind, express or implied, as to the accuracy or completeness of any of the information contained herein. All information relating to the projects presented in these tables should be read in conjunction with the relevant project documentation and any discrepancy between the tables and such project documentation, the latter shall prevail.

The net proceeds from the sale of any IDA bonds are not committed or earmarked for the lending to, or financing of, any particular projects, programs or activities. Returns on IDA bonds are not linked to the performance of any particular projects, programs or activities.

IDA FY25 Impact Report | Project-Level Reporting Annex | Sustainable Development Bonds (SDB)

#	Project	Project ID	Fiscal Year	Project life (yrs)	Country	Region	Social Category	Social Sub-Category	Green Category	SDGs	Climate Co-benefits (%)	Cumulative Net Commitments (US$ M)	Cumulative Gross Disbursements (US$ M)	FY25 Net Commitments (US$ M)	FY25 Gross Disbursements (US$ M)	IDA Share (%)	Nature/ Biodiversity Theme	Net GHG Emissions (Annual Average tCO2e)	Expected/Achieved Results
1	Education Emergency Response in Afghanistan (EERA)	P178758	2023	0	Afghanistan	South Asia	Access to essential services	Education	Climate Change Adaptation	4, 5	5.72%	70.00	45.00	70.00	45.00	70.00%	N		- 10,645,129 students supported with better education (including 4,884,447 female students). - 3,606,236 children reached with multi-modal distance learning (including 2,015,595 girls). - 6,863,364 teachers and students receiving teaching and learning materials (including 2,676,716 female recipients). - 162,417 students enrolled in project-supported CBE classes (including 108,540 girls), with 75% completing the 3-year CBE cycle and full gender parity in completion rates. - 5,050 teachers hired to teach in project-supported CBE classes (including 1,868 women). - 18,250 public primary teachers and managers supported with training (including 6,300 women), with 50% demonstrating improved teaching practices. - 488,160 children benefiting from temporary learning spaces and 6,049 high-performance tents distributed and set. - 160,000 children reached with school feeding and nutrition (including 65,600 girls). - 67,862 beneficiaries supported with education programs under innovative block grants and youth literacy and skills programs (including 80% female beneficiaries). - 26,000 parents/caregivers reached through the ECD intervention and 25,500 displaced people and host community members provided with services and livelihoods.
2	AFGHANISTAN HEALTH EMERGENCY RESPONSE (HER) PROJECT	P178775	2022	0	Afghanistan	South Asia	Access to essential services	Health	Renewable Energy; Energy Efficiency; Climate Change Adaptation	3, 13	27.04%	160.00	65.68	160.00	65.68	48.05%	N		- 11,469,203 people receiving outpatient services (including 5,677,255 women and 2,442,940 youth), and 181,604 receiving inpatient services (including 89,893 women and 38,681 youth). - 3,602,920 children immunized with the third dose of the Pentavalent vaccine (including 1,801,460 girls), and 2,923,104 children receiving the first dose. - 20,830,286 visits for growth monitoring and age-appropriate infant and young child feeding counselling among children aged 0–23 months (including 10,415,143 for girls). - 932,813 people benefiting from actions to improve sexual and reproductive health (all female; including 407,639 youth). - 12,116,710 basic health and nutrition services provided to girls and women. - 2,342,802 births occurring at project-financed facilities, with 932,813 deliveries attended by skilled health personnel. - 1,433,802 family planning couple-years of protection provided at project-financed facilities. - 490,000 beneficiaries of social safety net programs (including 49% women and 19% youth), and 70,000 beneficiaries of economic inclusion programs (including 49% women). - 4,675 female health workers employed at project-financed health facilities. - 10 hospitals with emergency preparedness and climate mitigation plans, and 100 health facilities with at least two staff trained in essential newborn care.
3	Emergency Food Security Project	P178280	2022	0	Afghanistan	South Asia	Food security and sustainable food systems	Food security and sustainable food systems	Living Natural Resources & Land Use	2, 13, 15	51.61%	95.00	25.50	95.00	25.50	48.72%	N		- 9,590,000 people fed as a result of increased agricultural/food production (including 4,747,050 women). - 1,813,000 farmers reached with agricultural assets or services (including 362,600 women). - 8,529,000 days of short-term jobs created by project (including 409,392 days worked by female beneficiaries). - 373,373 ha provided with new or improved irrigation or drainage services, with 1,551 km of irrigation canals rehabilitated and 180 karezes restored or repaired. - 477,000 ha cultivated for food production with distributed seeds, supported by 60,500 tons of certified wheat seeds distributed to farmers. - 3,900 ha planted with climate-resilient vegetative coverage, with 160 erosion control structures constructed. - 15,000 smallholder farmers with enhanced access to markets (including 3,000 women). - 225,000 female-headed households benefiting from support for production of higher-nutrition-value vegetables and legumes. - 150 small agribusinesses investing in enhanced production and value addition through project support (30% women-owned), alongside 100 private seed enterprises with improved capacity to produce and market climate-resilient seeds. - 10 new climate-resilient technologies introduced, contributing to a 25% production increase in crops supported by the project.
4	Trans-Hindukush Road Connectivity	P145347	2016	0	Afghanistan	South Asia	Affordable basic infrastructure	Transport	-	9, 13	0.00%	148.09	62.93	-	2.31	58.07%	N		- 40% earthworks completion on B2B road (target 100%)
5	Afghanistan Digital CASA Project	P156894	2018	0	Afghanistan	South Asia	Socioeconomic advancement & empowerment	Access to technology	Other / Climate Mitigation &/or	9, 13, 17	9.00%	51.00	3.41	-	0.04	100.00%	N		`- 12,900,000 People provided with access to the Internet - 4.33 Kbps International Internet Bandwidth per Capita - 6,265 Km Length of fiber optic network - 100 institutions and Government agencies connected to the Government Network
6	Public-Private Partnerships and Public Investment Advisory Project	P158768	2018	0	Afghanistan	South Asia	Access to essential services	Financial Services	-	8, 17	0.00%	9.48	1.66	-	0.09	18.96%	N		Operation suspended.
7	EQRA	P159378	2019	0	Afghanistan	South Asia	Access to essential services	Education	Other / Climate Mitigation	4, 5, 13	3.15%	75.01	42.19	-	0.27	25.17%	N		- 4,009,096 students attending school regularly - 1,468,720 female students - 722 schools constructed/expanded - 7,531,441 Students benefiting from direct interventions to enhance learning - 12.2 million primary textbooks (grades 1-6) distributed
8	Herat Electrification Project	P162022	2017	0	Afghanistan	South Asia	Affordable basic infrastructure	Power	Other / Climate Mitigation	7, 13	1.93%	60.00	22.22	-	0.51	100.00%	N		- 10 non-residential consumers provided with new or improved electricity service (solar backup for hospitals installed) - 31.3 km transmission line constructed
9	Afghanistan: Eshteghal Zaiee - Karmondena (EZ-Kar) Project	P166127	2019	0	Afghanistan	South Asia	Socioeconomic advancement & empowerment	Women empowerment/ Social inclusion	Other / Climate Mitigation &/or Adaptation	8, 10, 13	8.84%	150.00	22.26	-	0.24	75.00%	N		`- 6,932 vulnerable households in high IDP/returnee cities provided with short term employment support - 2 market enabling infrastructure built or upgraded - Businesses in urban areas provided with access to all-season roads within a 500-meter range under the project - 2.62 km of roads constructed
10	Tackling Afghanistan's Government HRM and Institutional Reforms	P166978	2019	0	Afghanistan	South Asia	Socioeconomic advancement & empowerment	Other	-	16	0.00%	18.38	9.84	-	0.04	24.51%	N		`- 100% Civil servants in priority LMAs transitioned from project to core government budget financing. - 16 Priority LMAs that meet minimum benchmark targets related to reduction in number of NTAs. - 11% Civil servant positions held by women. - 89% Civil servants that meet minimum individual performance targets, as determined in Job Descriptions.
11	Payments Automation and Integration of Salaries in	P168266	2019	0	Afghanistan	South Asia	Socioeconomic advancement & empowerment	Access to technology	Other / Climate Mitigation &/or	8, 9, 13	0.80%	5.56	1.22	-	0.11	12.36%	N		`- 239,601 digital transactions facilitated through APS for the year
12	Afghanistan Gas Project (AGASP)	P172109	2020	0	Afghanistan	South Asia	Affordable basic infrastructure	Power	-	7	0.00%	52.50	5.00	-	0.63	100.00%	N		- 900,000 m³ increased capacity to deliver commercial quality natural gas to off-takers in Sheberghan and Mazar. - Commissioning of the new amine plant, expanding gas processing infrastructure. - Commissioning of the new Sheberghan–Mazar gas pipeline, connecting upstream supply to downstream markets. - Adoption of an updated field development plan for the Yatimtaq gas field. - Primary regulatory and contractual framework for upstream and mid-stream gas sector development submitted to Cabinet. - Launch of an international tender for the Totimaidan gas blocks, advancing upstream sector investment. - Afghanistan's EITI validation report shows improved results on a greater number of parameters than the previous validation report. - 10% share of women professionals in technical and managerial fields at MoMP and OAGRA. - Development and dissemination of a code of conduct to prevent gender-based violence in the extractive sector for investors. - Environmental and social management system developed and operationalised to monitor E&S risks and impacts across the sector.
13	Afghanistan Community Resilience and Livelihoods Project	P178760	2022	0	Afghanistan	South Asia	Socioeconomic Advancement & Empowerment	Women empowerment/ Social inclusion	-	6	0.00%	84.00	83.76	-	33.36	31.70%	N		- 6,700,000 people benefiting from improved access to sustainable community transport infrastructure and services. - 34,100,000 working days created (including 2,000,000 for women across both components). - 1,400,000 beneficiary households receiving livelihoods support, including 270,000 households through labor-intensive works and 1,100,000 through cash-for-work. - 210,000 vulnerable households receiving cash transfers and social/livelihood grants (including 120,000 female-headed households and 92,000 households with persons with disabilities). - 16,400,000 people with improved access to basic services (including 8,200,000 with improved access to productive assets). - 35,000 women benefiting from women's economic activities assistance; 40% share of rural female-headed households engaged in a livelihood activity. - 11,000 community resilience groups operating under the project and receiving social and technical support, all with women participating. - 900 urban climate-resilient activities completed, including road rehabilitation, water infrastructure, drainage, sanitation, and canal cleaning across 14 cities. - 8,700 rural communities reached with completed subprojects. - 1 private telecoms provider engaged in disseminating early warning information.
14	Armenia Social Protection Administration II Project	P146318	2014	30	Armenia	Europe & Central Asia	Socioeconomic advancement & empowerment	Women empowerment/ Social inclusion	-	1	0.00%	19.54	17.68	-	(0.63)	76.64%	N		- 32 ISPC facilities refurbished/constructed and equipped, with 29 fully operational. - 607,655 direct project beneficiaries (pensioners), including 342,376 women. - 63,932 direct project beneficiaries (including 38,703 women). - 43,402 direct project beneficiaries (FBP). - 153,371 applications for social services received in fully operational ISPCs. - 28,547 applications for socio-medical examination received in fully operational ISPCs. - 2,862 applications for employment services received in fully operational ISPCs. - 400 certified staff using electronic pension information system. - 20 external databases accessible online to ISPC social workers for client information verification. - 91% of beneficiaries satisfied with opportunity to receive several services under one roof.
15	Chattogram Water Supply Improvement Project	P176429	2025	40	Bangladesh	South Asia	Affordable basic infrastructure	Water &/or Sanitation	Sustainable Water and Wastewater Management	6, 13	63.28%	280.00	-	280.00	-	84.08%	N	6,063	- 2,040,000 people provided with safely managed water supply services across project areas. - 1,000,000 people provided with safely managed water supply through rehabilitated functional connections in non-LIC areas (800,000) and new connections (200,000). - 1,040,000 beneficiaries provided with safely managed drinking water services through new or rehabilitated functional water supply connections (including 520,000 women). - 100,000 people in low-income communities delivered minimum 70 litres per capita per day of Bangladesh standard quality water. - 100,000 people provided with improved sanitation services in low-income communities. - 46 smart district metered areas made operational with reduced non-revenue water and GIS-enabled water supply asset management. - 50% of women and girls in low-income communities report time saved fetching water. - 50% of women trained as pump operators and bill collectors employed in select project areas. - 70% of beneficiary households expressing satisfaction with service provision. - CWASA achieves O&M cost recovery of at least 120%, maintained through a minimum 5% annual tariff increase.
16	Health, Nutrition and Population Sector Development Program	P180283	2025	35	Bangladesh	South Asia	Access to essential services	Health	Renewable Energy; Energy Efficiency; Climate Change Adaptation	3, 5, 13	26.41%	379.00	-	379.00	-	42.11%	N		- 5,100,000 people receiving quality health, nutrition, and population services (including 3,000,000 women and 2,100,000 youth). - 2,897,540 long-acting contraceptives provided to married women aged 15–49 years in Sylhet and Chattogram divisions. - 400,000 adults diagnosed and registered with hypertension and type 2 diabetes in primary health care facilities in Sylhet and Chattogram divisions. - 171,186 institutional deliveries in primary health care facilities. - 178,000 newly registered pregnant women receiving MMS during antenatal care visits at community clinics in Sylhet and Chattogram divisions. - 15 districts in Sylhet and Chattogram divisions maintaining 88% valid vaccine coverage for all antigens in children by age 23 months. - 100 primary health care facilities with uninterrupted drug supply of essential NCD drugs. - 80 primary health care facilities ready to provide referral services through staff orientation and training based on national guidelines, with 30 performing timely referral. - 100 diploma midwives posted in selected primary health care facilities in Sylhet and Chattogram divisions. - 10 primary health care facilities with sufficient health care workers trained on climate and health, and 30 facilities with contingency plans based on climate vulnerabilities, capacities, and needs.

#	Project	Project ID	Fiscal Year	Project life (yrs)	Country	Region	Social Category	Social Sub-Category	Green Category	SDGs	Climate Co-benefits (%)	Cumulative Net Commitments (US$ M)	Cumulative Gross Disbursements (US$ M)	FY25 Net Commitments (US$ M)	FY25 Gross Disbursements (US$ M)	IDA Share (%)	Nature/ Biodiversity Theme	Net GHG Emissions (Annual Average tCO2e)	Expected/Achieved Results
17	Second Bangladesh Green and Climate Resilient Development Credit	P180439	2025	35	Bangladesh	South Asia	Socioeconomic Advancement & Empowerment	Other	Climate Change Adaptation; Living Natural Resources & Land Use; Circular Economy and/or Eco-Efficiency	2, 13, 15	61.00%	500.00	489.83	500.00	489.83	100.00%	N		- 150 MW total capacity of renewable energy projects reaching financial close under the amended RE policy. - 1,000 GWh energy savings from new provisions of EECR, BEEER, and EELAR. - 2 million tons of CO_2 emissions reduced. - 69% of households using solid fuels as primary cooking fuel (including 85% of rural households and 37% of urban households). - 107 urban local government institutions spending more than 10% of block-grant resources on GCR projects (including 7 city corporations and 100 Category A Pourashavas). - USD 200 million in procurement processes of selected public-sector organizations using SPP-rated criteria in relevant contracts per fiscal year. - 9,000 industry units, project facilities, and individuals inspected by DoE's Enforcement Wing and mobile courts for environmental compliance per calendar year. - 15 new municipalities with at least 80% cost recovery on operations and maintenance. - 7% women-owned businesses submitting bids in public procurement per fiscal year. - 15 BDP projects with Development Project Proformas approved by ECNEC, based on a 5-year re-prioritized investment program and ADM principles.
18	Enhancement and Strengthening of Power Transmission Network in Eastern Region	P159974	2018	39	Bangladesh	South Asia	Affordable basic infrastructure	Power	Renewable Energy &/or Energy Efficiency	7, 13	21.91%	430.55	312.68	30.00	56.27	59.96%	N		- 290 km transmission lines constructed and 116 km rehabilitated under the project. - 13 substations constructed and 1 substation rehabilitated under the project. - 32,833,000 people provided with new or improved electricity service. - 50 MW renewable energy capacity enabled with indirect support. - 11,815,000 KVA increase in transformation capacity in the project area. - 40 average interruption frequency per year in the project area. - 30% of total staff trained were female. - Improved customer satisfaction with new or improved electricity service.
19	Strengthening Social Protection for Improved Resilience, Inclusion and Targeting	P508519	2025	35	Bangladesh	South Asia	Socioeconomic advancement & empowerment	Women empowerment/ Social inclusion	Climate Change Adaptation	1, 10, 13	49.33%	200.00	-	200.00	-	4.94%	N		- 13,500,000 beneficiaries of cash-based interventions (including 8,100,000 women, 100,000 youth, and 3,200,000 persons with disabilities). - 15,000,000 people registered in the Dynamic Social Registry (including 6,000,000 women). - 2,500,000 beneficiaries of productive inclusion programs (including 1,250,000 women and 1,500,000 youth). - 800,000 beneficiaries enrolled in cash transfer programs who also receive cash-plus interventions. - 500,000 DSS cash transfer beneficiaries receiving livelihoods support (including 250,000 women). - 250,000 beneficiaries provided livelihoods support in disaster-prone districts. - 50,000 DSS livelihoods beneficiaries provided productive grants (including 25,000 women). - 50% of livelihoods support beneficiaries remain engaged in wage or self-employment twelve months after receipt of support (including 50% of female beneficiaries). - 75% of new beneficiaries of cash transfer programs and livelihoods support programs drawn from the bottom two quintiles (including 75% of new female beneficiaries in each program). - Design and Implementation Guidelines of the Dynamic Social Registry finalized and approved by Cabinet; standardized poverty assessment module for the Dynamic Social Registry finalized and approved.
20	Energy Sector Security Enhancement Project	P181811	2025	0	Bangladesh	South Asia	Affordable basic infrastructure	Power	-	7	0.00%	-	-	350.00	-	16.67%	N	-	- 877,000 tCO_2e greenhouse gas emissions reduced in the power sector annually. - 1,500,000,000 m^3 incremental gas supplied to the power sector annually. - 5,920 million USD private capital enabled. - 2,100 million USD private capital mobilized. - 41 LNG cargoes supported by the facility annually. - 5 million USD expected savings from improvement in financing cost annually.
21	Bangladesh Clean Air Project	P502572	2025	35	Bangladesh	South Asia	Affordable basic infrastructure	Transport	Climate Change Adaptation; Circular Economy and/or Eco-Efficiency	11, 13	62.71%	290.00	-	290.00	-	81.60%	N	(73,152)	- 73,152 tCO_2e net GHG emissions reduced per year. - 4,570 tons annual primary PM2.5 emissions reduced (2,734 tons from transport interventions; 1,836 tons from improved monitoring and enforcement of industrial and power facilities). - 400 e-buses procured and operational, supported by 3 e-bus depots constructed with charging and ancillary facilities. - 3,400,000 inferred beneficiaries of improved access to sustainable transport infrastructure and services (including 850,000 women and 850,000 youth). - 140,000 direct users benefiting from improved access to sustainable transport infrastructure and services (including 40,000 women and 40,000 youth). - 1,300,000 people accessing real-time air quality information from DoE platforms. - 34 continuous air quality monitoring stations installed and generating ambient air quality data, alongside 60 industrial and power generation facilities with real-time emissions monitoring integrated into DoE's network. - 322,400 vehicles inspected for PM emissions limits annually across 9 vehicle inspection centers in operation. - 1,000 bus operations staff trained, including 400 trained on prevention of gender-based violence and SEA/SH in public transport and 50 female bus drivers trained. - 75 DTCA and Asset Co officers trained on bus services planning, operation, and performance management.
22	Strengthening Institutions for Transparency and Accountability (SITA)	P506691	2025	35	Bangladesh	South Asia	Socioeconomic Advancement & Empowerment	Other	Other / Climate Mitigation &/or Adaptation	9, 16, 13	3.72%	250.00	-	250.00	-	91.58%	N		- 1,500 officials trained and certified in core public investment planning and implementation courses. - 400 procurement-certified public procurement professionals credentialed. - 9% share of women entrepreneurs registered in e-GP and eligible to submit bids. - 90% increase in e-GP usage by procuring entities of public procurement contracts by value. - 75% increase in tax compliance rates on VAT; 55% increase in tax compliance rates on income tax. - 60% rate of online return (e-Return) submission increased for income tax; 90% rate of online return submission increased for VAT. - 150,000 people with improved public access to official statistics and microdata. - 60% of core statistics improved in line with international standards for enhanced data reliability; 80% released in a timely manner according to a pre-defined Advance Release Calendar. - 5 MoUs operationalized between BBS and administrative agencies, with data exchanged on the national data exchange or an alternate platform. - Upgraded and fully digitized Project Preparation & Appraisal Processing System adopted, integrated with other IT systems in the Planning Division and Implementation Monitoring.
23	Bangladesh: Strengthening Governance and Institutional Resilience	P511201	2025	35	Bangladesh	South Asia	Socioeconomic Advancement & Empowerment	Other	Other / Climate Mitigation &/or Adaptation	16, 13	6.67%	500.00	501.91	500.00	501.91	100.00%	N		`- 60% of Banks for which asset quality review (AQR) is completed by Bangladesh Bank - 100% of undercapitalized banks with capital shortfall identified by asset quality review (AQR) that have executed time-bound capital recovery plans or are subject to resolution - 100% Coverage of government revenues in audit reports - 3,500,000 Individuals whose digitized poverty profiles are recorded for use by the Dynamic Social Registry (DSR) - 1,460,000 Widows whose digitized poverty profiles are recorded for use by the Dynamic Social Registry (DSR)
24	Bangladesh Sustainable Recovery, Emergency Preparedness and Response Project	P508058	2025	35	Bangladesh	South Asia	Socioeconomic Advancement & Empowerment	Women empowerment/ Social inclusion	Climate Change Adaptation; Sustainable Water and Wastewater Management	1, 11, 13	66.29%	270.00	-	270.00	-	98.18%	N	-	- 1,662,109 people benefiting from climate-resilient infrastructure (including 831,055 women and 317,629 youth). - 413,547 people benefiting from climate-resilient planning, preparation, surveillance, and/or response (including 206,774 women and 79,029 youth), of whom 176,547 benefit from flood risk reduction through rehabilitated flood protection infrastructure and 237,000 from reduced exposure to climate-related hazards due to disaster shelters. - 485 km of emergency evacuation rural roads rehabilitated; 306 km of irrigation and drainage network renovated and reconstructed. - 23,000 ha covered under climate-resilient technologies; 6,470 ha covered by improved irrigation facilities and networks. - 44,220 beneficiaries in wage or self-employment as a result of project interventions (including 39,798 women and 4,620 youth). - 3,188,520 work-days generated by short-term work opportunities (including 1,115,982 by women). - 374,880 beneficiaries of economic inclusion programs (including 187,440 women and 71,227 youth); 66,000 people received loans for income-generation activities. - 7,700 people completed skills development training (including 3,500 women); 14,500 person-days of training provided to communities on search-and-rescue operations, disaster risk management, and emergency preparedness. - 79 climate-resilient multipurpose disaster shelters/primary schools constructed or rehabilitated; 100 lightning protection systems installed. - 90% share of women in community institutions' decision-making and management positions across 550 community institutions established with active Village Development Funds.
25	Bangladesh Modern Food Storage Facilities Project	P120583	2014	50	Bangladesh	South Asia	Food security and sustainable food systems	Food security and sustainable food systems	Living Natural Resources & Land Use	2, 13	49.72%	412.00	338.96	-	49.56	100.00%	N		- 400,000 tons increased grain storage capacity in public and household storage facilities. - 50% reduction in grain storage and handling losses in public storage facilities. - 10,000,000 direct project beneficiaries (including 50% women). - 500,000 households provided with safe grain storage containers. - 200,000 client days of training provided (including 25% women). - 80% of CSDs and LSDs connected to a centralized public food storage and distribution management system. - 7 public food grain silos constructed and operational. - 12% women employed in construction of steel silos (relative to total labor force employed). - 80% of people living in adjacent areas of steel silos aware and satisfied with the presence and benefits of steel silos (including 80% women). - 100% of contractor workforce received training on gender-based violence/SEA.
26	BD Identification System for Enhancing Access to Services (IDEA) Project	P121528	2011	50	Bangladesh	South Asia	Socioeconomic advancement & empowerment	Access to technology	-	9, 16	0.00%	113.92	101.96	-	(0.56)	52.02%	N		- Operational procedures for the management of NID Wing introduced - Fully completed - Established - 230 Number of upazila server stations connected through VPN and capable of NID registration and updating of information - 2,240 Staff trained in operation and management of NIDW - 71 Staff recruited for NID Wing - Personalization Center for smart NID cards established - Agencies satisfied using the NID verification services - Number of social protection programs utilizing NID to verify the correct beneficiaries - Orientation sessions organized for Upazila level staff of the Election Commission for community mobilization on NID system - Citizens satisfied using the smart NID cards - 4 Number of public/private institutions regularly using electronic identity verification for their service delivery - 80,000,000 Number of citizens having access to secure, reliable means of identification - 40,000,000 Number of women among number of citizens having access to secure reliable means of identification - Number of citizens' identity electronically verified - Number of public/private institutions using off-line identity verification for their service delivery using smart NID cards

End Notes

	Amounts may not add up due to rounding.
Project life (yrs)	Project Life generally indicates the financial life of the project, intended as the sum of the project's loan term and its grace period.
Social Category	Social Bond Category implies that the project components fall under the respective ICMA Social Bond Principle project category/ies that have been tagged.
Green Category	Green Category implies that the project components fall under the respective ICMA Green Bond Principle project category/ies that have been tagged.
	To map IDA projects to ICMA Project Categories, the World Bank applies a structured, AI-assisted approach combining Large Language Models (LLMs) with a validated rule-based classification framework. Project-level documentation — including development objective statements, results indicators, and climate co-benefit assessments — is systematically reviewed to determine the appropriate Social and Green Bond category for each project. Where results indicators are not yet available for early-stage projects, project documents are examined directly to inform the category assignment.
SDGs	To map IDA projects to the Sustainable Development Goals (SDGs), the World Bank applies an AI-assisted methodology developed in partnership with the Stockholm Environment Institute (SEI). Building on the foundational WB-SEI framework — using custom training datasets, to align project-level summaries and results indicators with the SDGs — the methodology has been further enhanced this year through the integration of Large Language Models and a validated rule-based classification framework. Project-level documentation, including development objective statements and results indicators, is systematically analyzed to determine which SDGs are directly targeted by each project. Where results indicators are not yet available for early-stage projects, project documents are examined directly to inform the SDG assignment. Read more about the WB-SEI collaborative SDG mapping methodology here: https://thedocs.worldbank.org/en/doc/ae8ec255531fe80332541514c8d8464d-0340022022/original/WB-SEI-Using-Automated-Text-Mining-to-Align-Investments-with-SDGs.pdf
Climate Co-benefits %	Climate co-benefits refer to the share of financing dedicated to climate change adaptation or mitigation in operations financed by IDA. The amounts shown in the table correspond to the climate co-benefits assessment at project approval. The World Bank Group has been tracking and publicly reporting climate co-benefits since 2012.
Cumulative Net Commitments (US$ M)	Cumulative Net Commitments represents the dollar value of the amount approved by the Board of Executive Directors to be extended as loan, grant or guarantee commitments by IDA, net of Cancellations and Terminations (as defined below), cumulatively over the life of the loan, or grant.
Cumulative Gross Disbursements (US$ M)	IDA Cumulative Gross Disbursements represents the dollar value of the amount transferred to the borrower cumulatively over the life of the loan, guarantee or grant. Disbursements include grant advances which are funds disbursed to recipients prior to the conditions stipulated in the grant agreement being met, and exclude IDA – IFC – MIGA PSW activities.
FY25 Net Commitments (US$ M)	FY25 Net Commitments is the IDA Net Commitments during the year ended June 30, 2025, which represents the dollar value of the amount approved by the Board of Executive Directors to be extended as loan, grant or guarantee commitments by IDA, net of full Cancellations and Terminations (as defined below) related to commitments approved during the year ended June 30, 2025.
FY25 Gross Disbursements (US$ M)	FY25 Gross Disbursements is the IDA Gross Disbursements during the year ended June 30, 2025 which represents the dollar value of the amount transferred to the borrower during the year ended June 30, 2025. Disbursements include grant advances which are funds disbursed to recipients prior to the conditions stipulated in the grant agreement being met, and exclude IDA – IFC – MIGA PSW activities.
Cancellations	The portion of the undisbursed balance that is no longer available for future disbursement after signing of the loan agreement by the borrower
Terminations	When the agreement for the approved loan was not signed by the borrower and the commitment amount for the related loan is then terminated.
	Discrepancies between committed and allocated amounts may be due to the different exchange rates used to convert loans denominated in other currencies to US$ equivalents.
IDA Share (%)	The percentage shows the share of the total financing that is provided by IDA loans, grants, or guarantees.
Nature/ Biodiversity Theme	The Biodiversity/Nature Theme tag indicates that the project has components financed under this theme.
Net GHG Emissions (Annual Average tCO2e)	Annual GHG Emissions avoided/reduced are calculated by the project's lifetime when possible (otherwise calculated based on the project's implementation period).
	Effective July 1, 2025, Afghanistan and Pakistan have moved from the South Asia Region to the Middle East, North Africa, Afghanistan and Pakistan (MENAAP) Region.
	Disbursements reported for Afghanistan - These payments are made by the IDA to contractors to settle outstanding claims for services completed prior to August 15, 2021, certified by the Afghanistan Reconstruction Trust Fund (ARTF) Third-Party Monitoring Agent (TPMA).
Expected Results	These are results estimated at project approval that are expected to be realized at the end of the project implementation period. The indicators shown are normally a subset of the development indicators contained in project documentation available in the World Bank project website (http://www.worldbank.org/projects). Results reported are based on the entire project financing. Actual results may be different from these estimates and do not represent the actual results in a specific year. Quantitative estimates are intended to be indicative of the scale of impacts and qualitative results aim to inform about the nature of changes that will be achieved as a result of projects supported by IDA once they are completed and at full capacity. The KPIs are summarized from project level data using LLMs.
Achieved Results	Projects closed are updated for actual results achieved at completion only when the Implementation Completion and Results report (ICR) becomes available. For the FY25 reporting period we consider the ICRs available as of January 2026. When the ICR is not available, closed projects show achieved results based on the latest Implementation Status and Results report (ISRs). The KPIs are summarized from project level data using LLMs.
