2022
6TH ANNUAL
HEALTH FINANCING
FORUM

Immunization Agenda 2030: An ambitious global strategy

to maximize the lifesaving impact of vaccines in
this new era

By the end of the decade, IA2030 aims to:

- 1 **Reduce by 50%** the number of children receiving zero vaccine doses
- 2 **Achieve 500 introductions** of new or under-utilized vaccines in low- and middle-income countries
- 3 **Achieve 90% coverage** for essential childhood vaccines

SP6 Working Group Sustainable Financing

High level TOR:

- Share information on ongoing work related to sustainable financing. Identify and prioritize gaps. Collaborative work on priority products.
- Report on/interpret M&E indicators in cycle with WHO & SAGE meetings. Work to improve data quality and comprehensiveness.
- Participate in consultative engagements to bring in views of countries, regions, CSOs, to share insights, inform policy recommendations.
- Elevate recommendations for implementation & policies as needed to IACG/IAPC

Current priorities:

- Many countries facing highly constrained public budgets given macro-fiscal conditions over next several years.
- Given this, need to protect budgets for essential services, including immunization, and use those resources efficiently
