1. Aid is defined as Country Programmable Aid Official Financial Flows (CPAOFF), which is based on the OECD's definition of Country Programmable Aid (CPA) and on OFF. It reflects the amount of aid that involves a cross-border flow and is subject to multi-year planning at the country/regional level.
2. The chart is based on data from the Global Partnership for Effective Development Cooperation (GPEDC), whose income group classifications and methodology may differ from those of the World Bank as they apply the UN classification for Least Developed Countries (LDCs).
3. The orange dot represents Kiribati and the blue dots represent other LMIC countries. X axis corresponds to % change in the number of donor agencies between 2016-19 and 2020-23; Y-axis represents % change in the aid volumes between 2016-19 and 2020-23. The two variables have a relatively weak correlation (<10%). Kiribati is below the trend line. The trend line reflects the average direction of growth in aid volumes, which was much higher than the increase in donor agencies in LMICs.
4. Basket pooled funding: Contributions to funds in which donors relinquish exclusive control and share responsibility with other stakeholders. Specific purpose contributions: Bilateral contributions to funds with a defined sectoral, thematic, or geographical focus.
