- $\ensuremath{\mathrm{a}}/$ For calculation of the cluster averages, all criteria are equally weighted within a cluster.
- b/ Overall rating is calculated as the mean of the score of four clusters.
- c/ For more information, see Annex 3 in "IDA20: Building Back Better from the Crisis: Toward a Green, Resilient and Inclusive Future".

 d/ Calculated as follows: (24% Clusters A,B,C average) + (68% Cluster D average) + (8% Portfolio Rating). If portfolio rating is not available, then: (32% Clusters A,B,C average) + (68% Cluster D average). For inactive countries, this rating is shown as "na".
- * Ratings on each axis on a 1.0 to 6.0 scale (except Portfolio Ratings which range from 2.5 to 4.5).
