Key dimensions in thinking about

# Effectiveness at SCALE

- **Numbers:** how can we reach more households more cost-effectively?
  - alternative delivery models (**Philippines** example)
- **Diversity:** how does the program affect different groups?
  - different types of program recipients
  - “spillovers” to non-participants } **Uganda** example
- **Broader changes:** how do large-scale programs affect wellbeing more broadly?
  - (local) economy-wide impacts (**Ethiopia** and **Kenya** examples)
