

ICP PPP Production Platform: Current Status & Deployment Overview

ICP Inter-agency Coordination Group Meeting

October 20 - 24, 2025

Washington DC

Purpose of the Session

The ICP Global Implementing Agency will update IACG participants on the PPP Production Platform's current status and ongoing enhancement efforts.

The PPP Production Platform, originally developed by Eurostat, is now piloted and deployed in multiple regions. It supports the ICP by enhancing productivity, data quality, and collaboration across participating countries and regions..

Outline

- 1. Platform Overview**
- 2. Status Update**
- 3. Summary and Discussion**

1. PPP Production Platform Overview

Platform Overview

Comprehensive PPP Lifecycle Support

- The platform manages the entire PPP lifecycle, including item list management, price data entry, validation, and results aggregation.

Auxiliary (Non-Price) Data Management

- Supports management of CPIs, GDP expenditure weights, annual exchange rates, and population data essential for PPP calculations.

User and Administrative Controls

- Includes modules for user management, enabling administrators to control global and regional platform operations.

Cost-Effective Regional Development

- Regional ICP setups are piloted and developed collaboratively without external costs, ensuring affordability.

[illegible]

Components

- **Item List Management Tool (ILMT)**
- **Data Entry Tool (DET)**
- **Validation Tool (VT)**
- **Aggregation Tool (AT)**
- **Auxiliary Data Tool (ADT)**
- **(Admin Module)**

2. Status Update

Platform Enhancements

Key Functional Enhancements

- Enhancements include:
 - ✓ Bulk price data import (DET);
 - ✓ Dataset override features (VT);
 - ✓ CSV upload support for special surveys (VT), and
 - ✓ Temporal adjustment options allowing users to select between adjusted and original prices for Quaranta Table calculations (VT) and PPP calculations.

Future Planned Enhancements include

- Pivot views for PPP/XR indices,
- Summary table filters by quarter
- Deployment of the Aggregation Tool module, with reference PPP estimation and gap-filling
- Support for productivity adjustments in Aggregation Tool

Deployment Status by Region

- ILMT is used across *all* ICP regions (global core list), and in **Latin America & Caribbean**
- DET and VT are deployed, and NIAs are actively using DET.

Pacific Islands

- Initial deployment stages of ILMT and VT, Prepared environment and ongoing data collection using Survey Solutions.

Western Asia

- Comprehensive deployment with active validation workshops and VT support for all surveys. NIAs onboarded and actively using DET/VT.

Tailored Regional Support

- ICP Global Office provides tailored configurations and ongoing support to each region.

3. Summary and Discussion

Next steps

Ongoing Development

- Current features and timelines depend on development progress and regional requirements, requiring verification with relevant teams.

User Feedback Gathering

- Pilot regional users' feedback on usability and features helps improve feature effectiveness and guides future enhancements.

Future Implementation Plans

- Plans include piloting new features and implementing ICP-specific aggregation module, to complete the platform adaptation.

Commitment to Enhancement

- The Global Office is dedicated to improving platform functionality and user experience through ongoing development efforts.

Thank you!
