"Unlocking Learning Potentials Through Effective Data Use: Perspective Bangladesh"

24-27 JUNE 2025, Washington DC, USA

Contents

- 1. Overviews of the Primary Education of Bangladesh**
- 2. Key Initiatives for Quality Primary Educations**
- 3. Integrated System-IPEMIS**
- 4. Turning data into directions**
- 5. Unlocking Learning Potentials Through Effective Data**
- 6. Transformative Outcomes from IPEMIS**
- 7. Challenges**
- 8. Call to Action**
- 9. Way Forward**

Bangladesh at a glance

- **Population:** ~ 170 million (2025 est.)
- **Literacy Rate :** ~75.6% (2023)
- **GDP (Nominal):** ~\$480 billion (2025 estimate)
- **GDP per capita** is estimated at around US \$2,679 by the end of 2024 and projected at US \$2,766 in 2025
- **Education System :** Article 17 of the Bangladesh Constitution directs the state to establish a uniform, mass-oriented and universal education system.

Primary Education at a glance

Sl.	Indicators	Status
1	Primary Schools	114,630
2	Govt. Primary School (GPS)	65,567
3	Teachers	650,293
4	Teachers (GPS)	384,513
5	Students (All)	19.71 million
6	Students (GPS)	10.1 million
7	Net Enrolment Rate	97.76%
8	Cycle completion rate	86.85%
9	Teacher Students Ratio	1:29
10	Gender Parity (M-F)	1.01
11	Sanitation Facilities in GPS	88.41%

Key Initiatives for Quality Primary Educations

Demand Augmentation & Access

- Stipend Programs for students from disadvantaged backgrounds
- School Feeding Program (expanded to 150 Upazilas)
- Annual Free Textbook Distribution covering all primary students

Improving Teaching and Learning Quality

- Continuous Professional Development (CPD) for teachers
- Integration of ICT-based pedagogy through e-learning platforms
- Multimedia classrooms and teacher resource centers
- Competency-based national curriculum with emphasis on Foundational Literacy and Numeracy (FLN)
- Assessment reforms: National Student Assessment (NSA) and classroom-based assessments

School Environment & Infrastructure

- Construction of modern, climate-resilient school buildings
- Gender-segregated WASH blocks (toilets, hygiene facilities) in all schools
- Provision of safe drinking water and handwashing stations
- Initiatives for green schools and disaster-resilient learning space

Through Effective Data Use

Integrated System-IPEMIS

Unlocking Learning Potentials Through Effective Data Use

- Stipend Programs for students from disadvantaged backgrounds
- School Feeding Program (expanded to 150 Upazilas) to improve attendance, nutrition, and retention
- Continuous Professional Development (CPD) for teachers
- Construction of modern, climate-resilient school buildings
- Gender-segregated WASH blocks (toilets, hygiene facilities) in all schools
- Provision of safe drinking water and handwashing stations

Results Unveiled: Transformative Outcomes from IPEMIS

- Teacher recruitment, transfer, and posting have become easier.
- Citizen satisfaction is increasing due to easier access to citizen services.
- Timely and accurate estimation, collection, and distribution of textbooks have become possible.
- Field-level monitoring and evaluation have become easier through e-monitoring.
- Management of all information related to schools, teachers, students, and assets has become easier.
- Preparation of APSC, ASPR, and NSA reports is now possible in less time and at lower cost.
- Complaint and legal case management is becoming more organized.
- It is being used as a central source of all data related to primary education.

Challenges..

Data Gaps & Disaggregation:

- Insufficient disaggregated data by age, socioeconomic group, and disability status (World Bank, Issues and Challenges of Educational Statistics).

Quality & Reliability:

- Issues with data accuracy, consistency, and timeliness. Instances of duplicate student data previously inflated enrollment figures, now being addressed by new software (APSC 2023).

Challenges...

Capacity for Analysis and Use:

- Limited capacity at various levels (school, upazila, district) to effectively analyze data and translate it into actionable insights. This includes a "shortage of skilled and trained manpower with statistical knowledge" (World Bank, Issues and Challenges of Educational Statistics).

Weak Feedback Loops:

- Insufficient mechanisms for providing timely and useful data feedback to teachers and school management for instructional improvement.

Call to Action

- **Future Vision:** A robust, integrated data ecosystem for primary education in Bangladesh that empowers all stakeholders to render quality learning outcomes for every child.
- **Shared Responsibility:** The journey to "Better Data for Better Learning" requires continued collaboration between the Government of Bangladesh, the World Bank Group (especially through LEAP).
- **Strategic Imperative:**
 1. Strengthening and fully operationalizing the Integrated Primary Education Management Information System (IPEMIS).
 2. Systematic capacity building for data collection, analysis, and utilization at all levels of the education system.

Way forward

- LEAP provides a unique platform to learn, collaborate, and create scalable and sustainable solutions
- Ground reality should be taken on board
- Continue the journey.....

Thank You!
