ICP Data and Metadata Submission Forms

suggested by the ICP Global Office within the previous cycle

very convenient and practical format

Simplifications/reductions would be preferable for following sections: “19. Constant Expenditures”, “20. NA Deflators”, “21. CPI”, “22. CPI Weights” (to save the format only for the main components in these sections)

We would highly appreciate these formats will be kept within the current cycle

67-th meeting of the Council of Heads of CIS NSOs, September 12, 2023 :

- the CIS-Stat in coordination with the CIS NSOs publishes the extrapolated annual estimates of PPPs for GDP and Actual Individual Consumption;
- the CIS-Stat jointly with the CIS NSOs consider in 2025-2026 the option of the additional experimental work for possible preparing for rolling surveys as a step to produce annual PPPs.

The CIS-Stat, having consultations with the CIS NSOs, publishes the extrapolated PPPs 2022-2023 and for some countries – 2024 for GDP and AIC, as well as related indicators, on the website: <https://new.cisstat.org/ru/web/guest/702>

Currently, not all CIS NSOs support the implementation of rolling surveys.
