Interpersonal
Communication

Surveillance : Dhanvantari Rath

- **Medical Care at Door Steps**
- Early Identification of COVID-19 cases through Rapid Antigen Testing and Use of Pulse Oximeter
- Treatment of common ailments
- Screening for HT & DM
- Immunity Booster
- IEC distribution

Treatment of Home Isolated Patients: Sanjeevni Rath

- Proactive Home isolation Policy
- **Sanjivni Rath-Ghar Seva initiative** by Gujarat for treatment of Home Isolation patients
- Sanjivni Van equipped with Doctor, Paramedical staffs, Drugs, Pulse oxymeter, Other medical check up logistics, IEC pamphlet
- In Interior and hilly area initiation of two wheeler Sanjeevni vehicle in some district

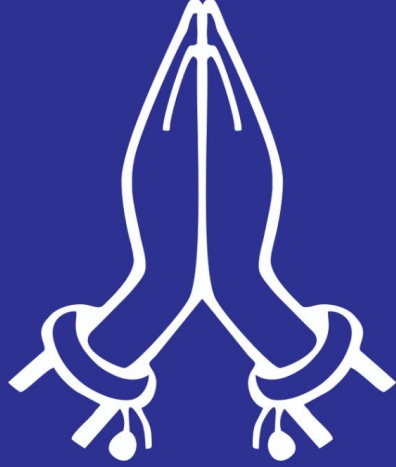

Strengthening of Home or facility Isolation

- Assessment of medical condition and home environment for home isolation.
- Strict facility isolation where home isolation is practically not possible at local Covid Care Centre.
- Availability of facility isolated at local level who will be willing for that. (Community COVID Care Centre)
- During first home visit proper counselling for medicines, health monitoring, diet etc & regular tele-consultation. Leaflet can be used as IEC tool.
- Medical monitoring by tele consultation of home isolated patients with E-Sanjeevani application.
- Composing group of volunteers at local village and society to help home isolated families in their daily needs

Community COVID care center
